Not appl cable fo th s pe od.

7c. Community Benefit Group and Developer Partnership Please describe in the space below the nature of the partnership and how the MM grant funds being used as a result of grant to provide community support for the infrastructure project.

Not applicable for this period.

F. CLIMATE RESILIENCE

CLIMATE RESILIENCE

Recipients must demonstrate that they have sufficiently accounted for current and future weather and climate related risks to new MM infrastructure projects. At present, weather and climate related risks to broadband networks include wildfires, extreme heat and cold, inland and coastal flooding, and the extreme winds produced by weather events such as tornadoes, hurricanes, and other weather events. Because of the tiered nature of infrastructure projects and broadband might be expected to have a lifetime of 20 years or more, recipients must account not only for current risks but also for how the frequency, severity, and nature of these extreme events may plausibly evolve as our climate continues to change over the coming decades.

Climate Resiliency Risk Mitigation

This purpose of this section is for the recipient to demonstrate that they have sufficiently accounted for current and future weather and climate-related risks to new MM infrastructure projects. In part 1 of this section, each recipient should demonstrate how they've addressed the known and identifiable risks of current and future projected weather and climate conditions through measures such as (but not limited to) choice of a technology platform, routing table to the climate risk of the region, relinquishing or retiring facilities (i.e., underground construction when aerial option exists), retrofitting or hardening of existing assets, and use of network redundancy to safeguard digital assets not the extent to infrastructure.

8a. Were any geographic areas identified for this reporting period subject to an initial and/or updated hazard screening for future weather and climate related risk? If so, please provide the date of the screening and provide related documentation as an attachment to this report.

Not applicable for this period.

8b Climate Resilience Category	8c. Date of Most Recent Hazard Screening	8d. Name and Title of Representative Completing Most Recent Hazard Screening	8e. Date of Report Completion
Not applicable for this period.	Not applicable for this period.	Not applicable for this period.	Not applicable for this period.

8f. Identified Risk For you MM project, what are the potential weather and climate hazards that may be most important to be addressed that could impact the resiliency of the middle mile infrastructure deployed (i.e. wildfires, extreme heat and cold, inland and coastal flooding, extreme winds, tornadoes, hurricanes and other weather events)?

Potential weather and climate hazards for our middle mile project include extreme temperature ranges, winter storms, high winds, tornadoes and flooding. Some of the equipment and studies and then the actual installation activities are planned for the optimal weather conditions, based on historical trends and average ages. All these activities can be significantly impacted by extremes of heat, cold, wind, and other conditions affected by what might be considered the mean. Adjustments can and must be made to the expected timeframes and the processes equipment and study and then to install in the methods within the least impact. The materials to be used are designed for minimal long-term impact on the environment, and minimal impact to from the environment on the cable. Once the optical fiber cable is installed it can be expected to be nearly impervious to any climate changes except the most extreme weather events. PFN's planning process incorporates robust system design practices to respond automatically to any impacts rimmediately once they occur. This planning includes outreach for respective, planned vegetation maintenance, and repairs to all network components including but not limited to hazards related to climate change.

8g. Weather and Climate Hazards We are aware of recent climate weather hazards experienced during the process (i.e., floods, tornadoes) impacting infrastructure building projects. Effectively describe how you monitored for weather and climate caused issues for the reliability of the system. If so, please provide the date of the disaster, location and backup documentation related (i.e., news article).

PFN's staff and consultants have not experienced any disruptions to operations during the process. During the engineering phases the anticipated impacts include the snow / ice seasons which certainly impact field work. Pedestrian and underwater surveys may be affected by early snow or freezing temperatures. However, PFN's planning takes into account expected weather-related limitations and is prepared to adapt to any anomalies or major events.

8h. Risks to Deployment of New Infrastructure Has the team identified any risks impacting the deployment of new or repaired infrastructure due to current and future weather and climate-related threats during the process?

No new climate-related risks were identified during the process.

8i. Risk Mitigation How will the project avoid and/or mitigate the risk identified? If not applicable, please explain why.

PFN's risk mitigation plan accounts for extreme temperature ranges, winter storms, high winds, tornadoes and flooding using input from permitting, environmental assessments, and surveys of the site location. All PFN network installations follow these mitigation strategies to provide maximum accessibility, reliability and redundancy to ensure our facilities can withstand weather events and keep our clients connected.

PFN has equipment, spare parts, technicians and other personnel, at the ready to deploy and each our facilities is routinely manned should a disruption occur from a weather event. Outages are assessed for damage and replacement parts are ordered as needed to apply restoration efforts to our customers.

As a general practice, PFN uses buried technques to place fiber plant underground minimizing exposure to weather events. Fiber for this project will be constructed using buried technques and water tight splice cases to strengthen availability of service. Additionally, PFN's mapping and monitoring system allows us to monitor and anticipate climate related impacts. As new outages and equipment are added, ought only new, they are added to PFN's mapping and monitoring systems.

For this project PFN has designed a network with increased capacity and redundancy for each route to maintain service availability, should isolated parts of the network become compromised.

Electronics, cabinets and hut locations

PFN uses electronics that are temperature aware. Hardened, withstand ing fluctuations from -40 degrees Celsius to 65 degrees Celsius.

Stress with temperature aware sensitive electronics are temperature aware controlled by HVAC systems with battery backups capable of running a minimum of 8 hours within the event of a commercial power failure.

Passive cooling aspects of the cabinets, airflow, shade and openness within the cabinets assist with heat transfer.

If critical temperature aware equipment would trigger, immediately notify our Network Operations Center and technicians would be dispatched to mitigate the impact to PFN's electronics by deploying fans or portable cooling units.

The safety mechanisms allows for the quickest returns to available service or response temperature aware equipment to tolerable levels.

CO building rugs and cabinets have backup power generators to ensure in the event of extended power outages.

8j. Additional Information Is there any additional information you would like to share during this reporting period that the grant team should be aware of regarding the management of sustainable climate resiliency for you MM project?

Not applicable for this period.

8k. Additional Resources
Has the team utilized the available resources to assist with the mitigation and long-term planning efforts for this reporting period? If so, which resources?
2018 National Climate Assessment
NOAA's 2022 State Climate Summaries
NOAA Disaster and Risk Mapping Tool
NOAA's Storm Event Database
NOAA Climate Explorer and Digital Coast
FEMA National Risk Index
Consulted FEMA-approved Hazard Mitigation Plans prepared by states which they propose to build in middle mile infrastructure to help identify key risks and hazards

Historical reference to 10-year floodplain maps and insurance data have been analyzed as extreme weather events affect this data and expectations. As this data expands, PFN will continue to adapt operations plans and practices to response to any network-impacting events, and/or risks that might be mitigated. The redundancy of the proposed equipment, expectably the cable paths, is the first step in preparation. Ongoing adjustments to processes are anticipated. PFN's greatest resources are hands-on experience construction and operation communication facilities in this region. This experience allows us to anticipate potential problems and develop a proactive plan.

G. Workforce

DAVIS-BACON ACT CERTIFICATION

For projects exceeding over $5 000,000 (based on expected total cost), as determined by the U.S. Secretary of Labor by subchapter IV of chapter 31 of title 40, United States Code (commonly known as the Davis-Bacon Act), all laborers and mechanics employed by contractors and subcontractors in the performance of such project are paid wages at rates not less than those prevailing.

Davis-Bacon Act Certification

9a. Does the recipient have access to the information requested (all laborers and mechanics employed by contractors and subcontractors in the performance of such project are paid wages at rates not less than those prevailing?)	Yes ☐	No ☑	

LOCAL HIRE PRIORITIZATION AND IMPACT

Local Hire Prioritization and Impact

Local hiring is a goal of equipment to hire people who live close to the place of work. This is more often more specifically stated as a equipment for contractors awarded certain types of publicly funded projects to recruit a certain proportion of the people working on the project from a particular area. **Please provide all direct hires and contractors supporting the MM infrastructure project.**

Please use the table below to describe how the project proposes to address local hiring.

Hires by Race, Ethnicity and Gender	Number of Hires																					
	Race/Ethnicity																					
	9b. Hispanic or Latino			9c. Non-Hispanic/Non-Latino																		Totals

Davis-Bacon Act Wages

Please confirm if wages are at least prevailing*

*As stated in the MM NOFO as determined by the U.S. Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code (commonly known as the Davis-Bacon Act), for the corresponding classes of laborers and mechanics employed on projects of a character similar to the contract work in the civil subdivisions of the State (or the District of Columbia) in which the work is to be performed.

10a. Are wages at least the Davis-Bacon prevailing wage for all laborers?	Yes ☑	No ☐	10c. Are wages at least the prevailing wage for all mechanics?	Yes ☑	No ☐
10b. Please certify you source of how this information was gathered (for 10a).	No hiring has taken place yet for PFN or our subcontractor, 123NET. Our intent is to hire at the Davis Bacon prevailing wage.		10d. Please certify you source of how this information was gathered (for 10c).	No hiring has taken place yet for PFN or our subcontractor, 123NET. Our intent is to hire at the Davis Bacon prevailing wage.	

10e. If you answe ed No to e the 10a. o 10c., please p ov de an attachment expo t ng the wages and benef ts of wo ke s on the p oject by ob class f cat on, and whethe those wages a e less than the p eva l ng wage.

WORKFORCE DEMOGRAPHICS

Workforce Demographic Data

Jobs by Race, Ethnicity and Gender	Number of Jobs																						
	Race/Ethnicity

J. BROADBAND ACCESS KEY INDICATOR SUBSCRIBERS AND SPEED

PROJECTED NUMBER OF SUBSCRIBERS AND SPEED

Please use the follow ng table to p ov de ant c pated key nd cato s w th the p ojected totals fo each benef c a y catego y, access type and speed catego y fo you nf ast uctu e se v ce o p oject. Except as nd cated, nfo mat on should be epo ted cumulat vely f om awa d ncept on th ough the end of the b -annual pe od fo B -Annual Ind cato s. Please w te the numbe "0" f you p o ect does not nclude th s nd cato .

PROJECTED NUMBER OF SUBSCR BERS AND SPEED		Year 1		Year 2		Year 3		Year 4		Year 5	
SUBSCRIBER TYPE	ACCESS TYPE	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2
15a. Anchor Institutions (AIs)	15a-1. Total number of AIs passed	0	0	0	0	32	32	63	63	63	63
	15a-2. Number of AIs within 1,000 feet of the m ddle mile infrastructure	0	0	0	0	32	32	63	63	63	63
	15a-3. Total number of AIs served	0	0	0	0	0	0	0	0	0	0
	15a-4. AIs w th new access	0	0	0	0	0	0	0	0	0	0
	15a-5. AIs w th improved access	0	0	0	0	0	0	0	0	0	0
	15a-6. Total number of AIs served w th speeds of at least 1/1Gbps	0	0	0	0	0	0	0	0	0	0
15b. Broadband Wholesalers or Last Mile Providers	15b-1.Total number of broadband wholesalers or last mile providers served	0	0	0	0	0	0	5	5	5	5
	15b-2. Broadband wholesalers or last mile providers with new access	0	0	0	0	0	0	0	0	0	0
	15b-3. Broadband wholesalers or last mile providers with mproved access	0	0	0	0	0	0	5	5	5	5
	15b-4. Total number of broadband wholesalers or last mile prov ders offering speeds of at least 25/3 Mbps	0	0	0	0	0	0	2	2	2	2
	15b-5. Total number of broadband wholesalers or last mile prov ders offering speeds of at least 100/20 Mbps	0	0	0	0	0	0	5	5	5	5
	15b-6. Total number of broadband wholesalers or last mile prov ders offering speeds of at least 1/1 Gbps	0	0	0	0	0	0	5	5	5	5

K. BROADBAND ACCESS KEY INDICATOR NETWORK BUILD PROGRESS

NETWORK BU LD PROGRESS

Please use the follow ng table to p ov de ant c pated key nd cato s and p og ess of you Inf ast uctu e p oject. Except as nd cated, nfo mat on should be epo ted cumulat vely f om awa d ncept on th ough the end of the b -annual pe od . Please w te the numbe "0" f you p oject does not nclude th s nd cato .

NETWORK BUILD PROGRESS	Year 1		Year 2		Year 3		Year 4		Year 5	
KEY INDICATOR	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2
16a. Total of new fiber m les (aerial or buried)	0	0	0	0	106	106	460	460	460	460
16b. Total of fiber miles leased	0	0	0	0	0	0	0	0	0	0
16c. Total of ex sting fiber m les upgraded	0	0	0	0	0	0	0	0	0	0
16d. Total of new microwave links	0	0	0	0	0	0	0	0	0	0
16e. Total of new towers	0	0	0	0	0	0	0	0	0	0
16f. Total of new nterconnection points	0	0	0	0	2	2	5	5	5	5
16g. Total of signed agreements with broadband wholesalers or last mile providers	0	0	0	0	0	0	0	0	0	0
16h. Total of potential agreements (.e., agreements currently being negotiated) w th broadband wholesalers or last mile providers (This Total should NOT be reported cumulatively)	0	0	0	0	0	0	0	0	0	0

L. QUANTIFIABLE METRICS

FIBER OPTIC BASED

Quantifiable Metrics - Sect on des gned to ass st w th **reporting** and **audit** pu pose to quant fy how much p og ess was made and t ack the locat on of whe e the p og ess was made.

17a. F ber Optic Based	Year 1		Year 2		Year 3		Year 4		Year 5	
	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2
17a-1. Is the f ber a buried/aer al or undersea application?	Bu ed/ae al/unde sea									
17a-2. Number of strands deployed	0									
17a-3. Number of miles of buried f ber deployed	0									
17a-4. Number of miles of aer al fiber deployed	0									
17a-5. Est mated capacity of fiber (i.e. throughput)	Othe									
17a-6. Deployment cost per mile of bur ed fiber opt cs	0									
17a-7. Deployment cost per mile of aerial fiber optics	0									
17a-8. Total Spent on Buried Fiber Deployment this reporting period	0									
17a-9. Total Spent on Aerial Fiber Deployment this reporting period	0									
17a-10. Total spent on Fiber Deployment this reporting period	0									
17a-11. Please provide any additional informat on about the Fiber Optic deployment (200 words or less)	PFN s cu ently engaged n the env onmental assessment p ocess. Deployment has not begun.									
17a-12. Please provide the digital mappings (e.g., CAD, Revit, KMZ, KML) for the new aerial fiber and buried fiber equipment installed during this reporting period.										

17b. Microwave Based	Year 1		Year 2		Year 3		Year 4		Year 5	
	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2
17b-1. How many microwave nodes have been deployed?	0									
17b-2. How many microwave nodes are operat ng for reporting period?	0									

MICROWAVE BASED	17b-3. Installation cost per microwavable node	0									
	17b-4. Number of new towers bui t to support microwave structure	0									
	17b-5. If applicable, what type(s) of tower were constructed (a) Monopole (b) Self-Support, (c) Guyed or (d) Other dur ng this reporting period?	Othe									
	17b-6. Average cost per tower installed	0									
	17b-7. Total spend on Tower deployment this reporting period	0									
	17b-8. Total spend on microwave deployment this reporting period	0									
	17b-9. If you answered "Other" to question 17b-5 or if t is a combination of mult ple types, please prov de a detailed narrative description deta ling what type of tower or what combination of towers is used for the project and the their associated costs. (200 words or less).	PFN s not deploy ng m c owave based se v ces.									
	17b-10. Please provide the digital mappings (e.g., CAD, Revit, KMZ, KML) for the m crowave nodes created dur ng this reporting period.										
SATELLITE	17c. Sate lite	Year 1		Year 2		Year 3		Year 4		Year 5	
		Period 1	Period 2	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2	Period 1	Period 2
	17c-1. What satellite provider is being used?	0									
	17c-2. What is the estimated capacity of the satell te l nk (i.e. throughput)?	0									
	17c-3. What is the associated cost to use this satell te service?	0									
	17c-4. Please prov de any add tional information about the Satellite deployment (200 words or less)	PFN s not deploy ng satell te based se v ces.									
	17c-5. Please provide the digital mappings (e.g., CAD, Revit, KMZ, KML) for the sate lite network accessed during this reporting per od.										
CERTIFICATIONS	Certifications										
	18. Please p ov de ce t f cat on ev denc ng compl ance w th Fede al labo and employment laws along w th the equ ements of Inf ast uctu e Investment and Jobs Act and M ddle M le G ant P og am, fo the b-annual pe od fo wh ch th s epo t s be ng f led.										
	Not appl cable fo th s pe od.										
	19. Please p ov de ce t f cat on ev denc ng compl ance w th the Bu ld Ame ca, Buy Ame ca Act. The Bu ld Ame ca, Buy Ame ca Act equ es that a l of the on, steel, manufactu ed p oducts (nclud ng but not l m ted to f be -opt c commun cat ons fac l t es), and const uct on mate als used n the p oject o othe el g ble act v t es s e p oduced n the Un ted States unless a wa ve g anted.										
	Not appl cable fo th s pe od.										
	20. I certify to the best of my knowledge and bel of that this report is correct and complete for performance of activ t es for the purposes set forth n the award documents.
