

I have been trying to get DSL
for several months now. The
carrier Windstream said they would
only come 4 miles from Farmington
I - but I live six miles from
there. There are 80 families along
this area that can't get DSL
I realize it is a financial
problem but it shouldn't be.
We are on the Iowa - Missouri
border which makes things
even more bothersome. We have
an Iowa address but live in
Missouri so who should service
us.
