2.	Agency and Program FY18 Appropriated Funding	5
3.	Agency Interview Contacts	8

List of full agency names and acronyms

Agency
Appalachian Regional Commission (ARC)
Delta Regional Authority (DRA)
Department of Commerce - (EDA)
Department of Commerce – (NTIA)
Department of Commerce – FirstNet
Department of Education (Dept. Ed)
Department of Housing and Urban Development (HUD)
Department of the Interior (DOI)
Department of Transportation (DOT)
Department of Treasury (NMTC)
Federal Communications Commission (FCC)
Institute of Museum and Library Services (IMLS)
National Science Foundation (NSF)
Northern Border Regional Commission (NBRC)
USDA Rural Business Service (RBS)
USDA Rural Housing Service (RHS)
USDA Rural Utilities Service (RUS)

Appropriated Fiscal Year 18 Funding as reported in the 2018 OMB Data call (1 of 3)

Agency Reporting FY18 Appropriated Funding	Programs Reported as having FY18 Appropriated Funding	FY18 Appropriated Funding Reported
Appalachian Regional Commission*	Area Development	\$155,000,000.00
	Special Broadband Allocation (KY, TN, WV)	\$10,000,000.00
	Distressed Counties	\$17,100,000.00
	POWER	\$50,000,000.00
	Agency Total:	\$232,100,000.00
Delta Regional Authority*	Agency Wide (note, no information was provided on individual DRA Programs)	\$25,000,000.00
	Agency Total:	\$25,000,000.00
Department of Agriculture (RBS)*	Business and Industry (B&I) Guaranteed Loan Program	\$919,000,000.00
	Rural Economic Development Loan and Grant Program (REDLG)	\$10,000,000.00
	Rural Economic Development Loan and Grant Program (REDLG)	\$33,000,000.00
	Agency Total:	\$962,000,000.00
	Department of Agriculture (RHS)*	Rural Housing Service/Community Facilities Direct Loan and Grant Program
Rural Housing Service/Community Facilities Direct Loan and Grant Program		\$2,800,000,000.00
Rural Housing Service/Community Facilities Guaranteed Loan Program		\$148,287,462.00
Agency Total:		\$2,978,287,462.00
Department of Agriculture (RUS)		Broadband Loan/Grant Combination Pilot Program (Note: The funding for this program was provided but no further information was provided within the data call – therefore, this program is not included in the assessment)
	Rural Utilities Service Distance Learning Telemedicine (DLT) Grant Program	\$49,000,000.00
	Rural Utilities Service Telecommunications Infrastructure Loan Program	\$690,000,000.00
	Rural Utilities Service Broadband Loan Program	\$29,851,000.00
	Rural Utilities Service (RUS) Community Connect Grant Program	\$30,000,000.00
	Agency Total:	\$1,398,851,000.00

*Note: agencies marked with an asterisk did not report broadband-specific funding

Appropriated Fiscal Year 18 Funding as reported in the 2018 OMB Data call (2 of 3)

Agency Reporting FY18 Appropriated Funding	Programs Reported as having FY18 Appropriated Funding	FY18 Appropriated Funding Reported
Department of Commerce (EDA)*	Economic Development Assistance programs (EDAP)	\$184,500,000.00
	FY 2018 EDA Disaster Supplemental Notice of Funding Opportunity (FY18 Disaster Supplemental NO FO)	\$600,000,000.00
	Agency Total:	\$784,500,000.00
Department of Commerce (NTIA)	Broadband Availability Mapping	\$7,500,000.00
	BroadbandUSA	\$8,200,000.00
	Agency Total:	\$15,700,000.00
Department of Education*	Alaska Native and Native Hawaiian-Serving Institutions	\$15,772,000.00
	American Indian Tribally Controlled Colleges and Universities	\$31,539,000.00
	Asian American and Native American Pacific Islander-Serving Institutions	\$3,826,000.00
	Impact Aid	\$1,414,112,000.00
	Native American-Serving Nontribal Institutions	\$3,826,000.00
	Promise Neighborhoods	\$78,000,000.00
	Rural, Low-Income School Program	\$90,420,000.00
	Small, Rural School Achievement Program	\$90,420,000.00
	Title I, Part A	\$15,800,000,000.00
	Title III, Part A: Strengthening Institutions	\$98,886,000.00
	Title III, Part B: Strengthening Historically Black Colleges and Universities Program	\$279,624,000.00
	Title IV, Part A	\$1,100,000,000.00
Department of Education*	Agency Total:	\$19,006,425,000.00

*Note: agencies marked with an asterisk did not report broadband-specific funding

Agency Reporting FY18 Appropriated Funding	Programs Reported as having FY18 Appropriated Funding	FY18 Appropriated Funding Reported
	Public and Indian Housing Neighborhood Networks (Capital Fund)	\$2,750,000,000.00
	Public and Indian Housing Neighborhood Networks (Operating Fund)	\$4,550,000,000.00
	Section 108 Loan Guarantee	\$300,000,000.00
	Indian Community Development Block Grant	\$65,000,000.00
	Native American Housing Block Grant	\$655,000,000.00
	Title VI Loan Guarantee Program	\$2,000,000.00
	Community Development Block Grant (CDBG)	\$3,300,000,000.00
Department of Housing and Urban Development*	Agency Total:	\$11,622,000,000.00
	Bureau of Indian Education (BIE): Education IT	\$200,000.00
	Agency Total:	\$200,000.00
Department of Interior*		
	BUILD	\$1,500,000,000.00
	All DOT Programs	\$44,973,212,000.00
	Agency Total:	\$46,473,212,000.00
Department of Transportation*		
	Native American Library Services Basic Grants	\$1,844,442.00
	Grants to States Program	\$160,803,000.00
	Agency Total:	\$162,647,442.00
Institute of Museum and Library Services*		
	Campus Cyberinfrastructure	\$15,140,000.00
	Platforms for Advanced Wireless Research	\$8,000,000.00
	Smart and Connected Communities	\$21,700,000.00
	US Ignite, Smart Gigabit Communities, NSF WINS Challenge	\$0.00
National Science Foundation*	Agency Total:	\$44,840,000.00
	Economic & Infrastructure Development Program	\$15,000,000.00
	Agency Total:	\$15,000,000.00
Northern Border Regional Commission*		

***Note: agencies marked with an asterisk did not report broadband-specific funding**

****FCC, FirstNet, and Treasury CDFI did not report FY18 appropriated funding**

Agency Interviews: Complete as of 10/05/18

In total, 17 interviews were conducted with individual agencies and offices

Agency	Contact Type
USDA (Rural Utilities Service (RUS), Rural Housing Service (RHS))	Rural Development/Rural Housing Service/Community Facilities Programs/Guaranteed Loan & Grant Processing & Servicing Division
	Rural Utilities Service
Appalachian Regional Commission (ARC)	Telecommunications Initiative Manager
Department of Treasury (NMTC)	CDFI Fund
	Office of the Comptroller of the Currency
Department of Commerce – FirstNet	Government Affairs
	Office of Chief Counsel
	Program Management and Strategy
USDA (Rural Business Service)	Rural Business Service
Department of Education	ED/OESE – Tiger Team Member
	ED/OS – Tiger Team Member
Department of Interior (DOI)	Deputy Associated Chief Information Officer
	Telecommunications Branch Manager
Department of Transportation (DOT)	FHWA
National Science Foundation (NSF)	Program Director
	Staff Associate
	Deputy Division Director
Department of Commerce - EDA	Senior Engagement Administrator
Department of Commerce – NTIA	Communications Program Specialist (NTIA)
	Senior Advisor to the Assistant Secretary
	Chief of External Affairs at Broadband USDA
Delta Regional Authority (DRA)	Chief of Staff
	Program Manager
	Senior Advisor
	Director of Project Development and Manager
Federal Communications Commission (FCC)	Chief of Staff Wireline Competition
	Division Chief of Telecommunications Access Policy Division
	Chief Data Officer
Northern Border Regional Commission (NBRC)	Program Director
Department of Housing and Urban Development (HUD)	Senior Advisor Office of the Secretary
Institute of Museum and Library Services (IMLS)	Deputy Director for Libraries
	Senior Library Program Officer
	General Counsel

Appendix B

Data Addendum

Appendix B Table of Contents

	Topics	Page
1.	Introduction	11
2.	Phase 1 Validation: Overview	12
3.	Phase 2 Discover and Analyze: Overview	16

The Federal Funding workstream sought to assess existing federal grants and subsidy programs devoted to or used for deploying broadband. The current state assessment of federally funded programs was conducted through the following process, which began with the distribution of an Office of Management and Budget (OMB) Broadband Programming Data Call to Federal Agencies

Assessing the Efficacy of Federal Broadband Programs Analysis Approach

Phase I

Validate

Consistency and Accuracy

What is the scope of Federal Funding for broadband?

- **Compare to existing information:**
Cross-walk OMB data call with prior data calls, “Agency Spotlights”, and NTIA’s BroadbandUSA website information
- **Calculate and validate funding levels:**
Sum inputs provided, and cross-check inputs with publicly available information and program owners (where possible)
- **Classify statutory and regulatory requirements, existing coordination, and geographical (or logistical) limits**
- **Identify critical information gaps:**
Identify targeted asks of program owners

Phase II

Discover and Analyze

Themes and Trends

What limits the efficacy of these programs?

- **Review legislative citations and identify statutory / regulatory requirements**
- **Evaluate program challenges, and existing performance measures** with agencies
- **Summarize core limitations faced by broadband funding programs**, including existing coordination efforts / gaps, and geographical / logistical limits

Phase III

Identify and Recommend

Opportunities and Strategies

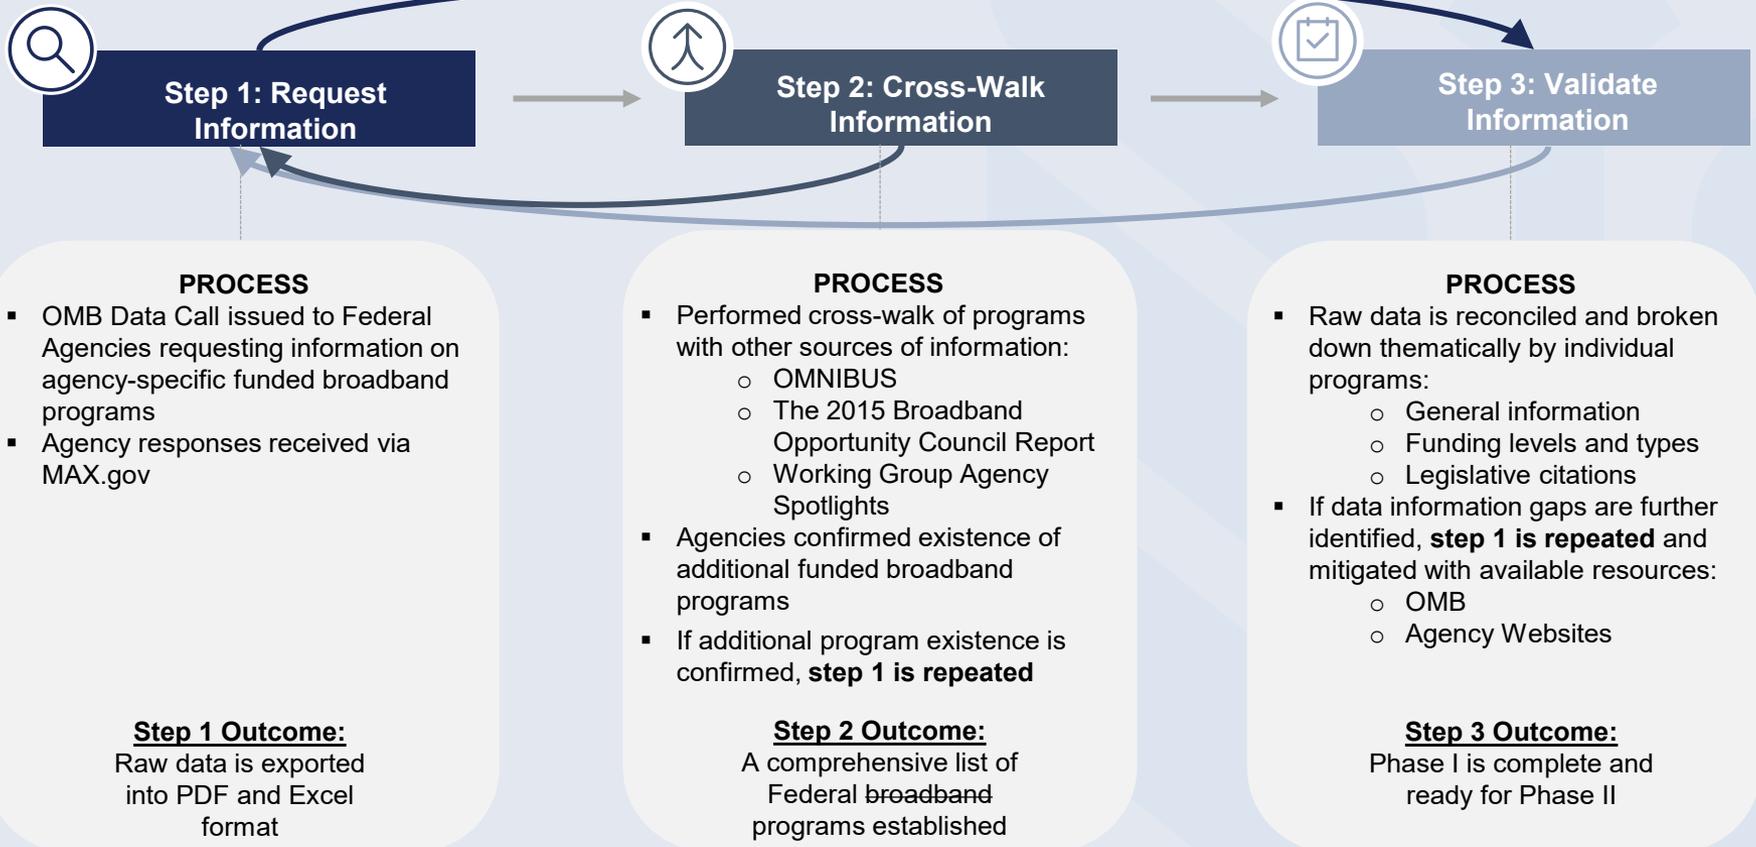

How might we improve (opportunities and solutions)?

- **Identify program performance measures** for funding sources and connect to customer types/needs to enable ongoing tracking and monitoring
- **Surface leading practices.** Promote actionable strategies that agencies can implement immediately and independently
- **Articulate policy recommendations.** Pinpoint opportunities for improved program coordination with respect to statutory / regulatory requirements
- **Identify a web portal** to house the findings of the analysis and use it as a source of information for cross-agency collaboration and public awareness

Phase I Validation: Putting the Pieces Together

Phase I required several data normalization activities to standardize responses prior to beginning the current state assessment

Steps 1, 2 and 3 act as a cyclical process until Phase I validation outcome is achieved

Phase I outcome: A comprehensive document containing all available program information, sorted thematically, to act as a starting point for agency interviews and data analysis

Creating the Data Call:

- Determine if the platform for surveying allows for comprehensive exports
 - E.g., If an agency did not answer a question, the exported word / PDF files would omit the question entirely giving an incomplete view of the questions asked
 - E.g., Excel files would contain blank cells due to program specific questions being answered in paragraph form (potential solution: tables for each question, allowing a column for program name and answer)
- Ensure the data call form allows for numerical inputs
 - E.g., Phone numbers were exported in the thousands
 - E.g., Agencies had difficulty inputting FY funding info due to formatting
- Best Practice Recommendation: Issuing agency should perform data call dry run to ensure proper formatting and function

Issuing the Data Call:

- The intent of the data call should be made clear to ensure that agencies report ALL applicable programs, with a clear definition of what program parameters are (e.g., directly or indirectly fund broadband programs ranging from construction to implementation support, etc.)
- Data call instructions should advise agencies to keep consistency in program responses, meaning that they should not switch the order of programs throughout the document
- Agencies should be advised to answer ALL question whether applicable or not, providing responses for why something is not applicable if the answer to a question is “no”, or “N/A”
- Best Practice Recommendation: Provide very clear instructions, and make every question response mandatory

Question specific:

- Questions 7 & 8 (FY 17 & 18 Authorized and Appropriated funding levels): Nomenclature for funding names differ from program names, creating inconsistencies
- Question 12 (Funded activities): In addition to what is funded, agencies should provide information on what is NOT funded to eliminate any confusion
- Best Practice Recommendation: Ask agencies to link funding names to program names so that is it clear where funding is sourced

Phase II & III Methodology

The current state assessment was conducted during Phase II; findings will be produced in Phase III

Phase II: Discover & Analyze

Phase III: Identify & Recommend

1. 2018 OMB Data Call Response Analysis

2. Agency Interview Preparation

3. Agency Interview Execution

4. Current State Analysis & Recommendation Preparation

5. Draft Findings and Recommendations

- **Closed remaining gaps** from the OMB data call issued in May 2018
- **Performed quantitative analysis** of the OMB data call responses
- **Analyzed the qualitative components of the data call**
- **Developed baseline understanding from analysis** of inter/intra agency coordination, eligibility, funding, and themes to inform agency interviews

- **Analyzed quantitative variances** to develop **agency agnostic interview questions**
- **Developed agency specific scenarios** to develop **agency specific interview questions**
- **Coordinated with** Broadband Interagency Working Group (BIWG) members to identify POCs for interviews
- **Prepared agency specific read-aheads** outlining agency OMB responses, initial high-level analysis (agency profiles), agency specific, and agency agnostic questions

- **Facilitated 17 agency-specific interviews with 33 agency POCs** to gather insights on coordination, funding, best practices, and perspectives regarding broadband programming
- **Updated agency profiles** based on feedback and additional information obtained during interviews

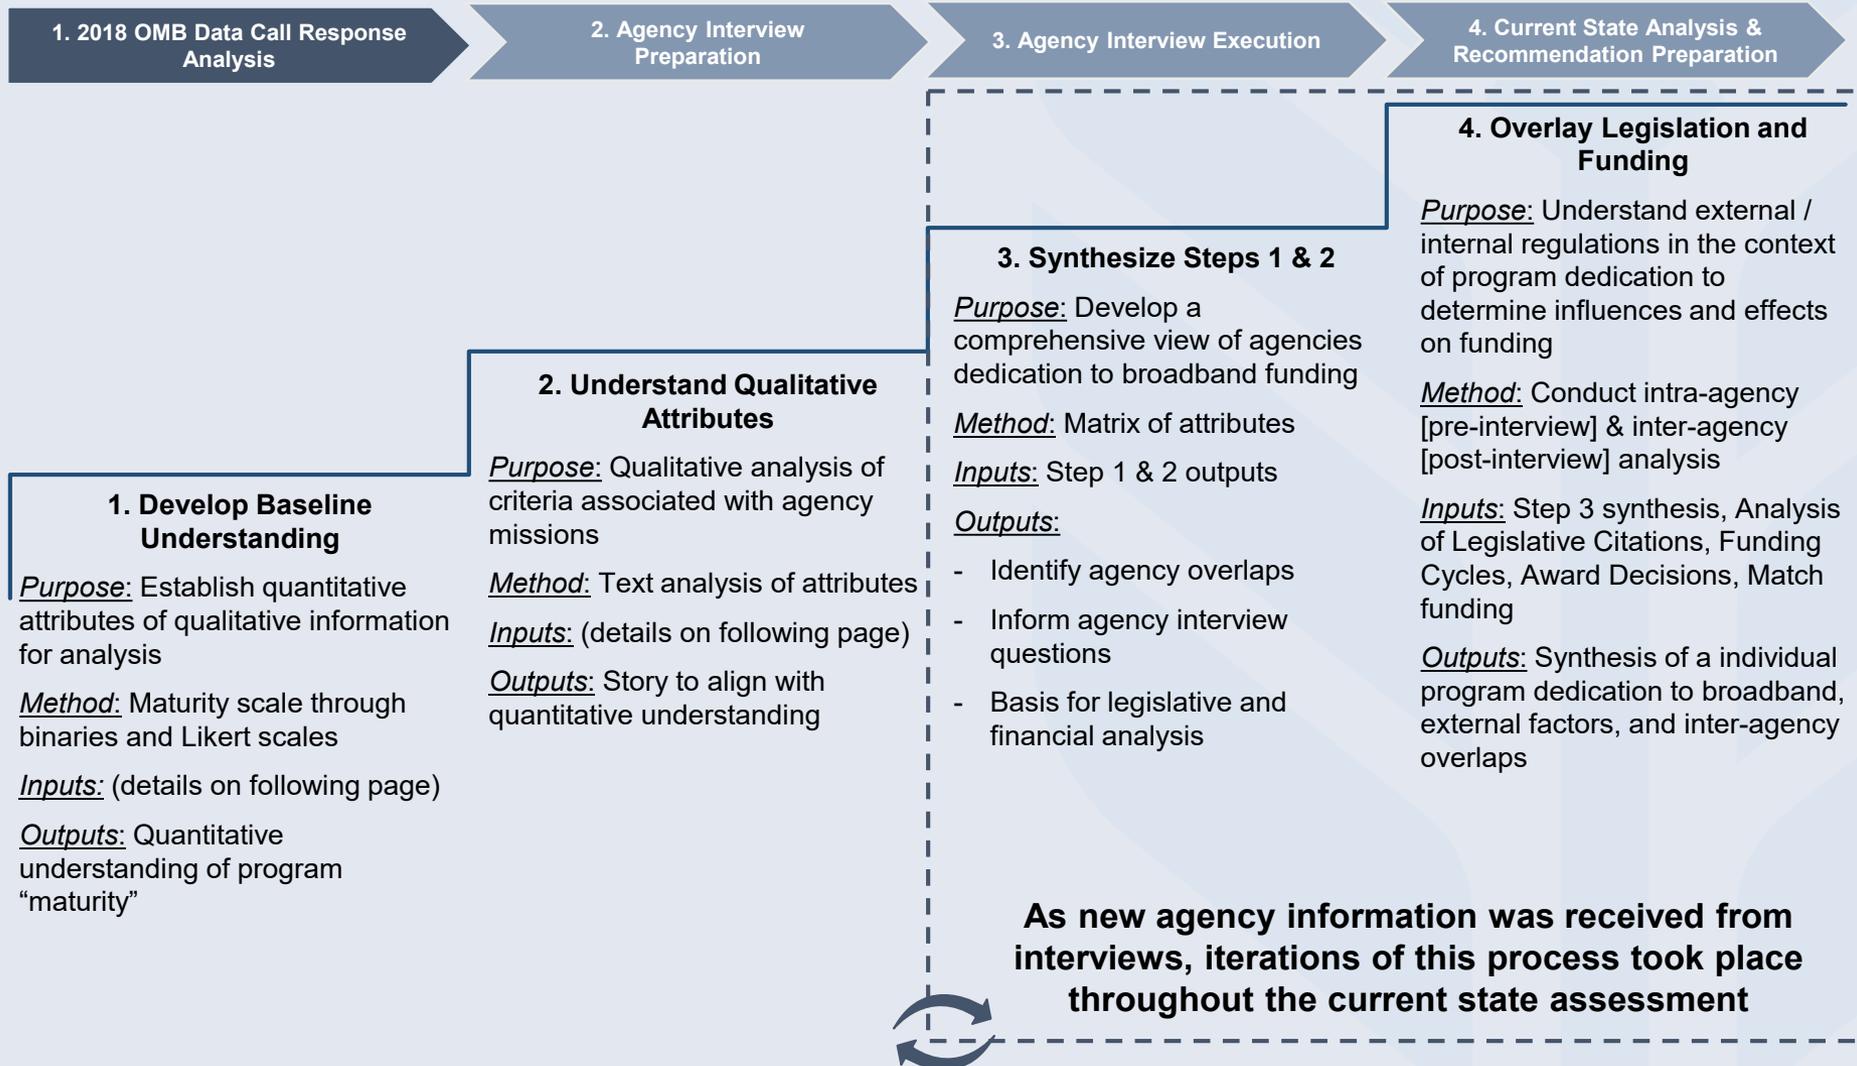

- **Developed insights into program overlap, duplication, and coordination** through analysis of OMB responses and interview outputs
- **Reviewed and validated current state insights and problem statements** with tiger team and Federal Funding working group
- **Developed insights to recommendations** based on analysis and feedback from Tiger Team/ Federal Funding working group

- **Identify program performance measures** for funding sources and connect to customer types/needs to enable tracking and monitoring
- **Surface leading practices** Promote actionable strategies that agencies can implement immediately and independently
- **Pinpoint opportunities** for improved program coordination with respect to statutory / regulatory requirements
- **Identify a web portal** to house the findings of the analysis and use it as a source of information for cross-agency collaboration and public awareness

Detailed **activities conducted to enable analysis** of existing federal programs for broadband related programming are outlined in subsequent slides, **resulting in an overview of aggregated responses from OMB Data Call.**

Phase II: Step 1 Activities

A 4-step process was utilized to analyze the data received in both the 2018 OMB data call and agency interviews

1. 2018 OMB Data Call Response Analysis

2. Agency Interview Preparation

3. Agency Interview Execution

4. Current State Analysis & Recommendation Preparation

Activities

1 >

Reviewed OMB data call responses for the following key questions:

- ✓ Types of activities funded in program scope
- ✓ Existence of documentation regarding broadband activities
- ✓ Existence of funding expenditures for broadband activities
- ✓ Insights into coordination within agency and across other federal agencies
- ✓ Identification of performance measurements

And developed agency agnostic and specific questions

2 >

Conducted additional research into individual programs:

- ✓ Reviewed program websites provided in OMB data call for additional insights into coordination, eligibility requirements, detailed overview of program mission
- ✓ Conducted due diligence on agency missions, and various legislative requirements

To further inform interview questions

3 >

Develop agency profiles for each agency interview:

- ✓ Included 2018 OMB data call information such as
 - ✓ Broadband Activities funded and restrictions
 - ✓ Eligible Entities
 - ✓ Broadband speeds
 - ✓ FY18 Funding

To inform agency interview POCs of data call responses

Step 2 Outputs:

- Agency specific read-aheads for interviews outlining:
 - Agency agnostic questions
 - Agency specific questions
 - 2018 OMB Data Call responses

Phase II: Step 3 Agency Interview Execution

In total, 17 individual agency interviews were conducted across 33 POCs

1. 2018 OMB Data Call Response Analysis

2. Agency Interview Preparation

3. Agency Interview Execution

4. Current State Analysis & Recommendation Preparation

Activities

2. Conduct interview and capture thematic notes

3. Review 2018 OMB data call information for any gaps or inaccuracies as informed by interviews

1. Provided agency interview POC with read-ahead materials 24-48 hours in advance of interview

4. Identify and perform any requested follow-up with agencies

Outputs from the agency interviews were updated into source 2018 OMB data accordingly and used to inform the current state analysis and recommendation preparation.

Phase II: Step 4 Current State Analysis and Recommendation Preparation for development of Findings.

1. 2018 OMB Data Call Response Analysis

2. Agency Interview Preparation

3. Agency Interview Execution

4. Current State Analysis & Recommendation Preparation

Activities

Develop Agency / Program Matrix

- Developed matrices of agencies and programs against eligible entities, program activities funded, funding cycles, and geographic parameters to unveil current state

Discover Ecosystem

- Discovered and developed a “Broadband Ecosystem” via analysis of program activities funded by Agencies/Programs

Analyze Agency Types

- Segmented Agencies/Programs into “Broadband Ecosystem” Categories
 - Broadband Focus Mission
 - Broadband as a Component to Economic Development
 - Broadband Access Support Agency Mission

Identify Duplication / Overlap

- Cross referenced programs against eligible entities and program activities funded to identify areas of duplication and overlap, and areas for coordination

Applicability of Analysis

- Created hypothetical scenarios to showcase how a potential applicant seeking to use federal programs for broadband related purposes may identify which programs it qualifies for

Subsequent slides outline the various matrices created and used in the assessment and determining recommendations pertaining to identifying duplication, overlap, and areas for enhanced coordination.

Chart 2: Activities Funded Across Agencies for Reported Federal Broadband Programs (Source: 2018 OMB Data Call)

Activity

1. 2018 OMB Data Call Response Analysis

2. Agency Interview Preparation

3. Agency Interview Execution

4. Current State Analysis & Recommendation Preparation

Program Activities Funded

Agency	Program	Eligible Entities	Feasibility	Equipment	Training/Adoption	Construction	Refinancing	Broadband Infrastructure	Maintenance	Technology Services	Internet Access
FCC	FCC E-rate Program	Libraries, Local Governments		Equipment		Construction		Broadband Infrastructure	Maintenance		Internet Access
	FCC High Cost Program (including Connect America Fu..	For Profit Businesses		Equipment		Construction		Broadband Infrastructure	Maintenance		Internet Access
	FCC Lifeline Program	For Profit Businesses		Equipment		Construction		Broadband Infrastructure	Maintenance		Internet Access
	FCC Rural Health Care Program	Native American/Trib.., Nonprofits		Equipment		Construction		Broadband Infrastructure	Maintenance		Internet Access
FirstNet	FirstNet - Nationwide Public Safety Broadband Network	Not Applicable (Eligibl..)	Feasibility								
NTIA	NTIA OPSC: State and Local Implementation Grant Program	Not Applicable (Eligibl..)	Feasibility								
	NTIA OTIA: Broadband Mapping	Not Applicable (Eligibl..)	Feasibility								
	NTIA OTIA: Broadband Program	Not Applicable (Eligibl..)	Feasibility								
USDA RUS	USDA Broadband Loan Program	State Governments, Local Governments, Libraries, Nonprofits		Equipment	Training/Adoption	Construction	Refinancing	Broadband Infrastructure			
	USDA Community Connect Grant Program	State Governments, Local Governments, Libraries, Nonprofits		Equipment		Construction		Broadband Infrastructure	Maintenance	Technology Services	Internet Access
	USDA Distance Learning Telemedicine (DLT) ..	State Governments, Local Governments, Libraries, Nonprofits	Feasibility	Equipment	Training/Adoption	Construction			Maintenance	Technology Services	
	USDA Telecom Infrastructure Loan Program	State Governments, Local Governments, Libraries, Nonprofits	Feasibility	Equipment		Construction	Refinancing	Broadband Infrastructure	Maintenance		

Eligible Entities/Potential Applicants

- Blue: Educational Institutio..
- Light Blue: For Profit Businesses
- Orange: Libraries
- Light Orange: Local Governments
- Green: Native American/Trib..
- Light Green: Nonprofits
- Yellow: Not Applicable (Eligibl..)
- Light Yellow: Sum of Private Lenders
- Teal: Sum of Higher Educati..
- Light Teal: Public Entities
- Red: State Governments
- Light Red: Tribal Government

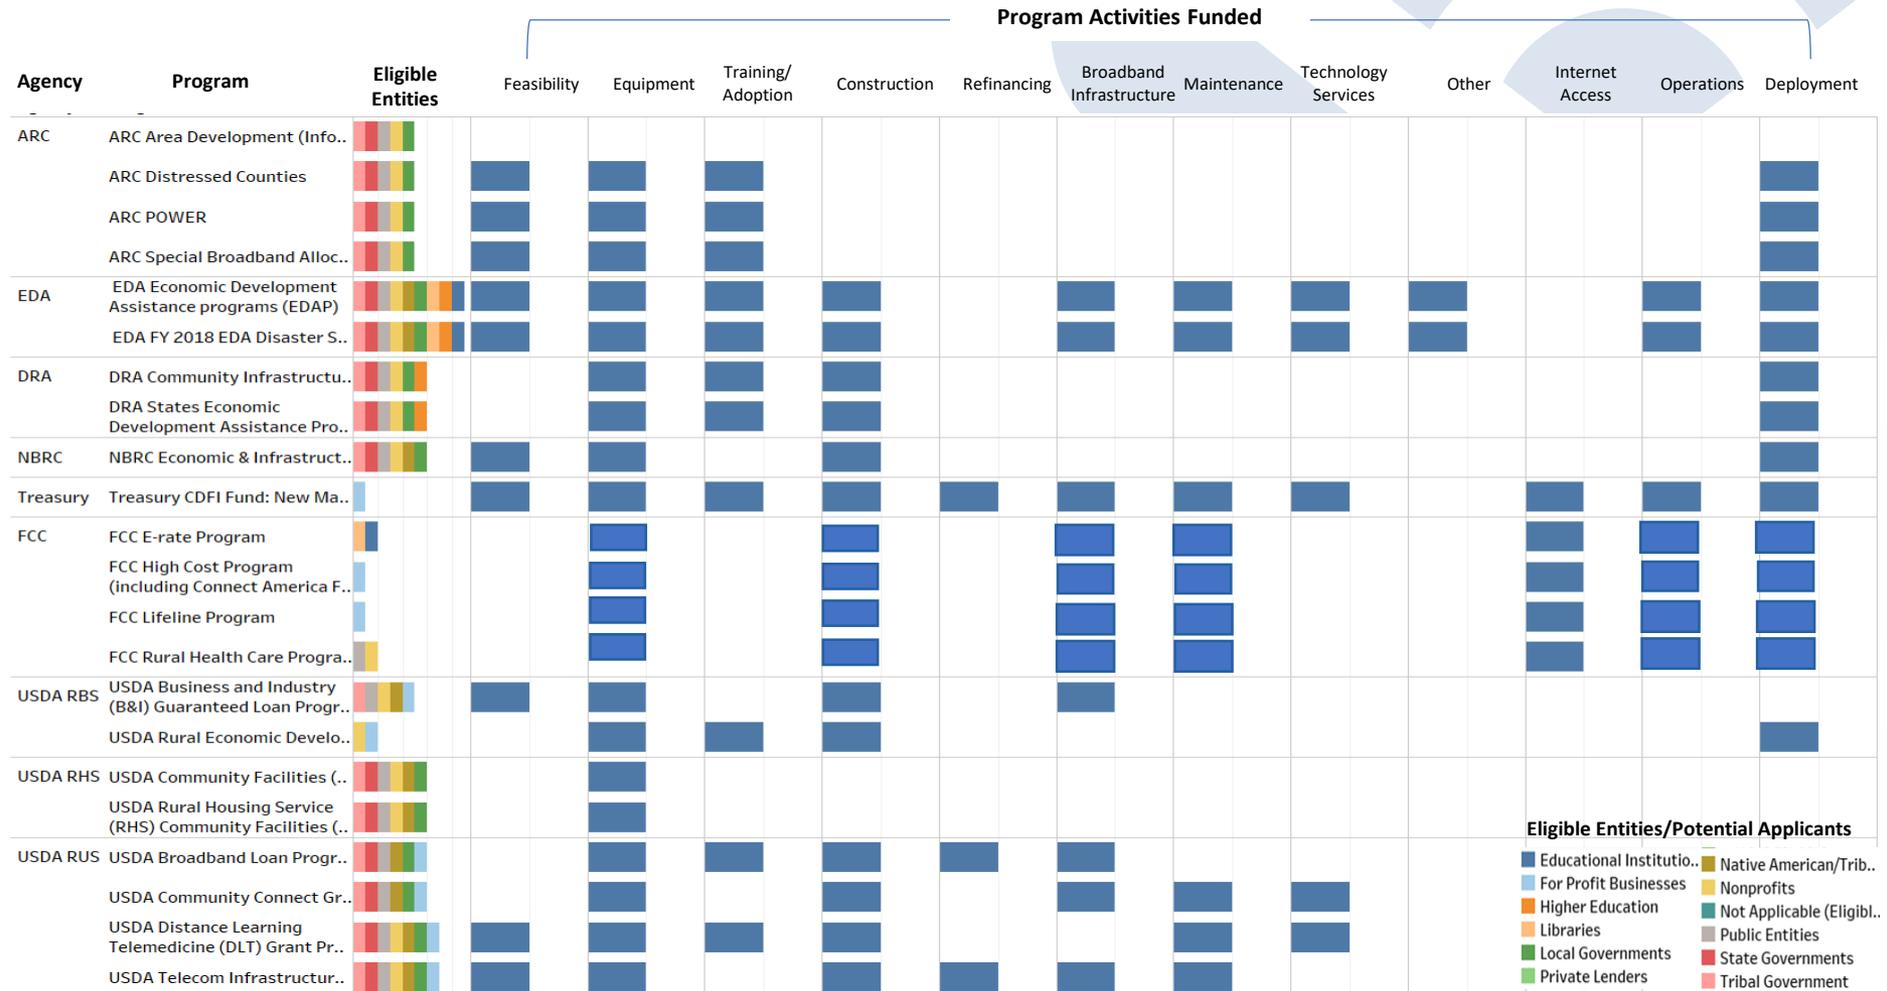

Phase II Analysis Conclusion for Phase III Input: Broadband Focused Agency Programs have common potential applicants and varying program activities, resulting in opportunities for coordination.

1. 2018 OMB Data Call Response Analysis

2. Agency Interview Preparation

3. Agency Interview Execution

4. Current State Analysis & Recommendation Preparation

Phase II Analysis Conclusion for Phase III Input: Broadband Component Agency Programs have common potential applicants and varying program activities, resulting in opportunities for coordination.

Phase II: Step 4, Current State Analysis and Recommendation Preparation for development of Findings (cont.)

1. 2018 OMB Data Call Response Analysis

2. Agency Interview Preparation

3. Agency Interview Execution

4. Current State Analysis & Recommendation Preparation

Informal coordination is not regulated by rules and conventions and performed at the discretion and will of agencies.

Coordination Mechanism

Intra-agency – Not set by formal mechanisms, coordination that takes place within an agency at the discretion of the agency around a common goal – mostly used for knowledge sharing

Interview Example: ED Rural Intra-agency Working Group

Inter-agency – Not set by formal mechanisms, convening of agencies around a common goal and purpose at the discretion of agencies usually for the purposes of knowledge and resource sharing

Interview Example: BIWG Federal Funding Tiger Team

State / Local engagement – Not set by formal mechanisms, interaction with local stakeholders, entities, or individuals. Can be conducted from the HQ to state office level, or state office level to local stakeholder level

Interview Example: USDA GFRs, EDA CEDA, DRA, ARC, NBRC, HUD

Ad hoc sharing of information – Agency led efforts to share information with other agencies or applicants for the purposes of enhancing coordination of funding and program resources as needed

Interview Example: DRA leveraging ARC knowledge for program execution

Benefits:

- At will and discretion of departments
- Not bound by rules, reporting or other administrative tasks that more formal coordination can require
- Can end as soon as benefit has been exhausted
- Can lead to more formal coordination

- Ability to meet the needs of the local community
- Allows for direct POC access for local eligible entities and end-users
- Creates personalized service and larger impacts
- When coordinated properly with HQ levels, information sharing is consistent and HQ is better able to act on behalf of state offices

- Allows for agencies to share information with their respective stakeholders in a manner that best suits their mission and capabilities, via leveraging of formal information sharing and inter-agency groups

Potential Challenges:

- Potential for unclear goals, objectives and outcomes
- Not mandated by law or executive leadership, therefore lacks potential to be more than an information sharing venue
- Potential to “fizzle out”, should resources become burdened with other tasks
- Not required
- Lack of accountability and potential for lack of knowledge capture and sharing once coordination ends

- Often agencies have various programs supporting broadband, across various offices, and without formal processes to promote coordination can miss opportunities and remain siloed
- Missed opportunities for customers – who may not know what other funding opportunities exist

- Information sharing done in isolation of inter-agency knowledge sharing, that does not take into account critical information connections, and overlooks variances that may cause restrictions
- Lack of funding

1. 2018 OMB Data Call Response Analysis

2. Agency Interview Preparation

3. Agency Interview Execution

4. Current State Analysis & Recommendation Preparation

Formal coordination is done in accordance with rules and conventions as established by regulations, laws and official contract.

<u>Coordination Mechanism</u>	<u>Benefits:</u>	<u>Potential Challenges:</u>
<p>Statutory – Written law passed by legislative body</p> <p><i>Interview Example:</i> 20 USC 9121 – IMLS</p>	<ul style="list-style-type: none"> • A legally binding and defined mandate that agencies must adhere to 	<ul style="list-style-type: none"> • Often times written vaguely and open to interpretation which limits effect • Can be a long, lengthy process as statutes must be passed by Congress
<p>Regulatory – A rule or order issued by an executive authority or regulatory agency of a government and having the force of law</p> <p><i>Interview Example:</i> FR5890-F-02 - HUD</p>	<ul style="list-style-type: none"> • A legally binding and defined mandate that agencies must adhere to and often less timely and easier to implement/update than statute 	<ul style="list-style-type: none"> • Like statutes, often times written vaguely and open to interpretation
<p>Executive Orders – A rule or order issued by the President to an executive branch of the government and having the force of law</p> <p><i>Interview Example:</i> EO 13790 - Promoting Agriculture and Rural Prosperity in America</p>	<ul style="list-style-type: none"> • Demonstrates executive priority and commitment, is legally binding and usually written to accomplish a specific goal or task 	<ul style="list-style-type: none"> • If overly onerous or burdensome to any specific agency or if overturned by judicial review
<p>Contractual – A legally enforceable agreement between two or more parties</p> <p><i>Interview Example:</i> FirstNet and AT&T</p>	<ul style="list-style-type: none"> • Defined terms and conditions of work to be carried out signed and agreed upon by all parties 	<ul style="list-style-type: none"> • Can be inflexible and ineffective if not written properly and without regard to obliging parties capabilities
<p>MOUs – Formally written, but not legally binding, agreement between two or more entities usually with a certain set of objectives, goals and measures</p> <p><i>Interview Example:</i> USDA RBS and SBA</p>	<ul style="list-style-type: none"> • When written to leverage the mutual benefit of entities' unique or complementary attributes to achieve common goals with specific, measurable, achievable, results-focused, time-bound objectives 	<ul style="list-style-type: none"> • If written generally without SMART objectives and a common set of mutual goals / benefits to both parties

Appendix C

Agency Interview Profiles

Agency

(Note: Agencies with only one program have a consolidated profile and snapshot. FirstNET and NBRC do not have separate profiles and snapshots due to a lack of or similar program information within the OMB data call)

- 1. USDA (RUS, RBS, RHS) Profile & Snapshot**
- 2. DOC (FirstNet, NTIA, EDA) Profile & Snapshot**
- 5. FCC Profile & Snapshot**
- 6. ARC Profile & Snapshot**
- 7. DRA Snapshot**
- 8. NBRC Profile**
- 9. DOI Snapshot**
- 10. ED Profile & Snapshot**
- 11. HUD Profile & Snapshot**
- 12. DOT Profile & Snapshot**
- 13. Treasury CDFI Fund NMTC Snapshot**
- 14. NSF Profile & Snapshot**

USDA RUS, RHS, RBS Aggregated Profile

Overview:

RUS: Administers programs that provide much-needed infrastructure or infrastructure improvements to rural communities, these include water and waste treatment, electric power and telecommunications services

RHS: Offers a variety of programs to build or improve housing and essential community facilities in rural areas - offer loans, grants and loan guarantees for single- and multi-family housing, child care centers, fire and police stations, hospitals, libraries, nursing homes, schools, first responder vehicles and equipment, housing for farm laborers and much more

RBS: Helps provide the capital, technical support, educational opportunities and entrepreneurial skills that can help rural residents start and grow businesses or access jobs in agricultural markets and in the bio-based economy USDA, and public and private partners are connecting rural residents to the global economy

Agency Programs (source) & Respective Bureau (where applicable)	Themes	Funding Types	Rural Definition
All programs from 2018 data call <u>Rural Utilities Service:</u> <ul style="list-style-type: none"> Broadband Loan Program Community Connect Grant Program Distance Learning Telemedicine (DLT) Grant Program Telecom Infrastructure Loan Program <u>Rural Housing Service:</u> <ul style="list-style-type: none"> Community Facilities (CF) Guaranteed Loan Program Rural Housing Service (RHS) Community Facilities (CF) Direct Loan and Grant Program <u>Rural Business Service:</u> <ul style="list-style-type: none"> Business and Industry (B&I) Guaranteed Loan Program Rural Economic Development Loan and Grant Program (REDLG) 	<ul style="list-style-type: none"> Bureau Specific Missions No standard definition for rural Programs have various broadband speed definitions 	<ul style="list-style-type: none"> Grant Loan 	<ul style="list-style-type: none"> Varies by program, most programs classify Rural Definition as < 20,000 people in a community

Broadband Specific Activities	Restrictions to Broadband Tech	Broadband Speed Standard	Coordination Required	Geographic Reach
All programs encourage implicit/explicit broadband deployment activities	Varies based on program focus of either deploying broadband infrastructure or indirect broadband program support	No standard broadband speed standards across USDA programs	Coordination requirements vary by program	All programs reported a rural geographic reach
Funding: Expenditure Structure; Allocated Funds; Funded Activities; Restrictions			Coordinating Actors (Inter/Intra Agency, State/Local, Private Sector)	Eligible Entities for Funding
<ul style="list-style-type: none"> Expenditure & Allocated: <ul style="list-style-type: none"> All encompass: Construction of broadband facilities and expansion of broadband service into rural communities Can be used for advanced telecommunications services and computer networks for medical, educational, and job training services Allocation for bb is dependent on the program goals Restrictions: Mission focused 			<ul style="list-style-type: none"> Inter/Intra Agency State/Local Private Sector 	<ul style="list-style-type: none"> RHS: Public bodies, non-profits, Indian tribes RBS: individuals who are eligible and former RUS borrowers RUS: Corporations, LLCs, cooperative organs, Indian Tribes, state / local governments

USDA RUS Program Snapshot

RUS Broadband Programs	Funding Types & FY 18 Funds	Eligible Entities	Broadband Activities by program	Definition of Rural
Broadband Loan Program [RUS] - Funds for the costs of construction, improvement, or acquisition to provide service at broadband lending speed in eligible rural areas	Loan (centralized / national office) • Appropriated - \$29,851,000 [100% dedicated to broadband]	<ul style="list-style-type: none"> - Corporations, LLCs - Cooperative or mutual organization - Indian tribes / tribal organizations - State / Local gov't 	Construction, improvement, and acquisition of facilities required to provide service & refinancing existing telecommunications loans	Community of 20,000 or less
Community Connect Grant Program [RUS] - Fund broadband deployment in rural communities where it is not economically viable for private sector	Grant (centralized / national office) • Appropriated - \$30,000,000 [100% dedicated to broadband]		Construction, acquisition, or leasing of facilities, spectrum, land or buildings; improvement, expansion, construction, or acquisition of a community center and provision of computer access point	
Distance Learning Telemedicine (DLT) Grant Program [RUS] - Using telecommunications to connect to the world in remote and low population density areas	Grant (centralized / national office) • Appropriated - \$49,000,000 [100% dedicated to broadband w/ limitations on DLT specific purposes]	<ul style="list-style-type: none"> - Incorporated organizations - Indian tribes / tribal organization - State/ Local gov't - Consortiums - Other legal entities (including private / for / non-profit) 	Acquisition and installation (by lease or purchase) and eligible equipment: purchases of extended warranties, site licenses, and maintenance contracts; acquisition or development of instructional programming; technical assistance and instruction for using eligible equipment; and purchase and installation of broadband facilities	
Telecom Infrastructure Loan Program [RUS] - Finances construction, maintenance, improvements and expansion of telephone service and broadband in rural areas	Loan (centralized / national office) • Appropriated - \$690,000,000 [100% dedicated to broadband]		Equipment, broadband facilities, construction, improvement, or expansion of telecommunications service, and engineering In certain cases, funding may go to acquisitions or refinancing of telecommunications service	

USDA RBS and RHS Program Snapshot

RBS Broadband-related Programs	Funding Types & FY 18 Funds	Eligible Entities	Broadband Activities by program	Definition of Rural
Rural Economic Development Loan and Grant Program (REDLG) [RBS] - Funding for rural projects through local utility organizations	Direct loan and grant (centralized / national office) <ul style="list-style-type: none"> • Loan: Appropriated - \$33,000,000 • Grant: Appropriated - \$10,000,000 	<ul style="list-style-type: none"> - Current RUS Electric or telecommunications borrowers - Any former RUS borrower and non-for-profit under the RUS Electrification Act 	Purchase of equipment, construction, and other related items for broadband supporting computer networks for medical, educational, and job training services	Any areas other than a city / town with a population greater than 50,000 or an urbanized area adjacent to such a city / town
Business and Industry (B&I) Guaranteed Loan Program [RBS] - Bolsters availability of private credit for rural businesses	Loan (centralized / national office) <ul style="list-style-type: none"> • Appropriated - \$919,000,000 	<ul style="list-style-type: none"> - Savings and Loans - Farm Credit banks - Credit Unions - Indian tribes - Federal/State Chartered Banks - For-profit businesses - Nonprofits - Public bodies - Individuals 	Entire projects from soft costs to hard costs – feasibility to construction ; can finance broadband projects for individual businesses	
Community Facilities (CF) Guaranteed Loan Program [RHS] - Help build essential community facilities in rural areas	Loan (centralized / national office) <ul style="list-style-type: none"> • Appropriated - \$148,287,462 	<ul style="list-style-type: none"> - Public bodies - Non-profits - Indian Tribes 	Distance learning and telemedicine equipment, end-user equipment and publicly available Wi-Fi systems	
Rural Housing Service Community Facilities (CF) Direct Loan and Grant Program [RHS] - Help build essential community facilities in rural areas	Direct loan and grant (centralized / national office) <ul style="list-style-type: none"> • Loan: Appropriated - \$2,800,000,000 • Grant: Appropriated – \$30,000,000 			Community of 20,000 or less

Department of Commerce Aggregated Profile (DOC) [FirstNet, NTIA, EDA]

Overview:

NTIA: principally responsible by law for advising the President on telecommunications and information policy issues NTIA's programs and policymaking focus largely on expanding broadband Internet access and adoption in America, expanding the use of spectrum by all users, and ensuring that the Internet remains an engine for continued innovation and economic growth - Administering grant programs that further the deployment and use of broadband and other technologies in America

EDA: establish a foundation for sustainable job growth and the building of durable regional economies builds upon two key economic drivers - innovation and regional collaboration

FirstNet: independent authority within the US Department of Commerce Authorized by Congress in 2012, its mission is to develop, build and operate the nationwide, broadband network that equips first responders to save lives and protect US communities

Department of the Interior (DOI) Bureau of Indian Education (BIE) Snapshot

DOI BIE Overview: Responsible for the program direction and operation of Indian schools

Themes

- FCC partnership
- Limited activities funded

DOI BIE Broadband-related Program	Funding Types & FY 18 Funds	Eligible Entities	Geographic Parameter	Definition of Rural
Bureau of Indian Education (BIE): Education IT (2018 Data)	Appropriated (Statutory) Appropriated: \$200,000	BIE funded schools and Tribal Postsecondary and Adult leaning centers	Rural	Tribal territories and BIE schools not located in urban areas

Encourage broadband/other indirect methods

Yes - Identified Tribal Dorms not eligible for E-rate resulting in an award from Verizon and Microsoft for Broadband to the facility and tablets for the students Funded LTE Cellar service for student buses for a school where the students have a commute time of over 1 hour one-way

Standard broadband speed definitions

Yes – 25:3

DOI BIE Broadband-related Program

Bureau of Indian Education (BIE): Education IT (2018 Data)

Broadband Activities by Program

Operating Expenses

Broadband technology restrictions by program

BIE must use a federal contract, limit the availability of technology options, tribal and other right of way issues, access to federal property for positioning antennas and radios

Coordination and Level

Indian schools use appropriated funding to pay for broadband subsidized by the FCC under the FCC-managed e-Rate program BIE applies annually for e-Rate discounts from the Federal Communication Commission

Performance Measures for Programs

Yes –BIE provides a Broadband Progress Report to the e-Rate program In the report, BIE provides program measures for the two types of schools: 1) BIE Operated Schools and 2) Tribal Controlled Schools For each of the two school types, the report provides the summation of the following program measures:

- Have Own Circuit
- Education Native American Network (ENAN) Primary Circuit
- Some Upgrade
- 10 Mbps / 100 Students
- Have Broadband Speed
- 100 Mbps
- Upgrades Pending vs Upgrades Completed

ED Program Snapshot (2 of 5)

ED Broadband-related Programs	Funding Types & FY 18 Funds	Eligible Entities	Geographic Parameter	Definition of Rural
Promise Neighborhoods	Grant (Competitive) Appropriated: \$78,254,000 Authorized: \$72,266,760	Nonprofits, Local Educational Agencies, Institutions of Higher Education, Local Governments, Tribal Governments	Local	The Department uses the NCES local code designation for rural communities within CONUS to include the following: 32, 33, 41, 42, 43, New "Urban-Centric" Locale Codes 31 – Town, Fringe: Territory inside an urban cluster that is less than or equal to 10 miles from an urbanized area 32 – Town, Distant: Territory inside an urban cluster that is more than 10 miles and less than or equal to 35 miles from an urbanized area 33 – Town, Remote: Territory inside an urban cluster that is more than 35 miles from an urbanized area 41 – Rural, Fringe: Census-defined rural territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 25 miles from an urban cluster 42 – Rural, Distant: Census-defined rural territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, as well as rural territory that is more than 25 miles but less than or equal to 10 miles from an urban cluster 43 – Rural, Remote: Census-defined rural territory that is more than 25 miles from an urbanized area and is also more than 10 miles from an urban cluster
Rural, Low-Income School Program	Grant (formula through local Ed agencies) Appropriated: \$90,420,000 Authorized: \$84,920,000	State Educational Agencies, Local Educational Agencies, Schools	Local	
Small, Rural School Achievement Program	Grant (formula through local Ed agencies) Appropriated & Authorized: \$90,420,000	Local Educational Agencies, Schools		
Title I, Part A	Grant (formula through local Ed agencies) Appropriated & Authorized: \$15,759,802,000	State Educational Agencies, Local Educational Agencies, Schools		
Title III, Part A: Strengthening Institutions	Grant (competitive / discretionary, cooperative agreements) Appropriated: \$98,886,000	Institutions of Higher Education		
Title III, Part B: Strengthening Historically Black Colleges and Universities Program	Grant Appropriated: \$279,624,000	Institutions of Higher Education Historically Black Colleges and Universities (HBCUs)		
Title IV, Part A	Grant (competitive / discretionary, cooperative agreements) Appropriated: \$1,100,000,000 Authorized: \$1,650,000,000	State Educational Agencies, Local Educational Agencies		

ED Program Snapshot (3 of 5)

Encourage broadband/other indirect methods	Standard broadband speed definitions		
Yes – all programs encourage broadband	None provided for all programs		
ED Broadband-related Programs	Broadband Activities by Program	Broadband technology restrictions by program	Coordination and Level
Alaska Native and Native Hawaiian-Serving Institutions	<ul style="list-style-type: none"> Construction, maintenance, renovation and improvement in classrooms, libraries, laboratories, and other instructional facilities, including the integration of computer technology into institutional facilities to create smart buildings Creating or improving facilities for Internet or other distance learning academic instruction capabilities, including purchase or rental of telecommunications technology equipment or services 	None	Not Applicable
American Indian Tribally Controlled Colleges and Universities		None	Not Applicable
Asian American and Native American Pacific Islander-Serving Institutions		None	Not Applicable
Impact Aid	<ul style="list-style-type: none"> Impact Aid funds may be used to support connectivity if a district chooses Impact Aid districts may use the general aid money that they receive however they chose, as long as it's an allowable state or local expense They are not subject to the cost circulars Money that districts receive under the Impact Aid construction component or for educating children with disabilities (7003D) must be used for those purposes Districts need this money for just their day-to-day operations, so the whole appropriation would not be used for connectivity, but technically is available 	None	Not Applicable
Native American-Serving Nontribal Institutions	<ul style="list-style-type: none"> Construction, maintenance, renovation and improvement in classrooms, libraries, laboratories, and other instructional facilities, including the integration of computer technology into institutional facilities to create smart buildings Creating or improving facilities for Internet or other distance learning academic instruction capabilities, including purchase or rental of telecommunications technology equipment or services 	None	Not Applicable
Promise Neighborhoods	<ul style="list-style-type: none"> Feasibility/planning, equipment, leases for dark or lit fiber, operating expenses, training/adoption, broadband, internet access, IT devices (e.g., tablets, smart boards, computers) 	Cannot be used for construction or land	FEDERAL - STATE - LOCAL - As part of the application process, grantees must describe how they are using other federal, state, local, or private funds to match the funds received through Promise Neighborhoods
Rural, Low-Income School Program	Generally, RLIS can support broadband if the broadband involves necessary and reasonable costs, is installed consistent with the definition of "minor remodeling" in 34 CFR Part, and does not constitute supplanting. The program can also support IT devices (e.g., tablets, smart boards, computers)	The cost of materials and labor for such wiring is allowable as long as it meets the definition of "minor remodeling" in 34 CFR Part 77. The term does not include building construction, structural alterations to buildings, building maintenance, or repairs.	Not Applicable

ED Program Snapshot (4 of 5)

ED Broadband-related Programs	Broadband Activities by Program	Broadband technology restrictions by program	Coordination and Level
Small, Rural School Achievement Program	Generally, SRSA can support broadband if the broadband involves necessary and reasonable costs, is installed consistent with the definition of “minor remodeling” in 34 CFR Part, and does not constitute supplanting. The program can also support IT devices (e.g., tablets, smart boards, computers)	The cost of materials and labor for such wiring is allowable as long as it meets the definition of “minor remodeling” in 34 CFR Part 77. The term does not include building construction, structural alterations to buildings, building maintenance, or repairs.	Not Applicable
Title I, Part A	As a means to improve academic achievement of low-achieving students served by the program, minor remodeling, consistent with 34 CFR Part 77; high speed internet access in Title I schoolwide program schools; IT devices for Title I participants and schools (e.g., tablets, smart boards, computers)	The cost of materials and labor for such wiring is allowable as long as it meets the definition of “minor remodeling” in 34 CFR Part 77. The term does not include building construction, structural alterations to buildings, building maintenance, or repairs.	Yes, State Level
Title III, Part A: Strengthening Institutions	Renovation and improvement in classrooms, libraries, laboratories, and other instructional facilities, including the integration of computer technology into institutional facilities to create smart buildings: Creating or improving facilities for Internet or other distance learning academic instruction capabilities, including purchase or rental of telecommunications technology equipment or services. Construction and maintenance are not allowable activities in the Strengthening Institutions Program.	None	Not Applicable
Title III, Part B: Strengthening Historically Black Colleges and Universities	Construction, maintenance, renovation, and improvement in classroom, library, laboratory, and other instructional facilities, including purchase or rental of telecommunications technology equipment or services. Purchase of library books, periodicals, microfilm, and other educational materials, including telecommunications program materials. Funds and administrative management, and acquisition of equipment for use in strengthening funds management. Establishing or enhancing a program of teacher education designed to qualify students to teach in a public elementary or secondary school in the State that shall include, as part of such program, preparation for teacher certification. Establishing community outreach programs which will encourage elementary and secondary students to develop the academic skills and the interest to pursue postsecondary education. Acquisition of real property in connection with the construction, renovation, or addition to or improvement of campus facilities. Services necessary for the implementation of projects or activities that are described in the grant application and that are approved, in advance, by the Secretary, except that not more than two percent of the grant amount may be used for this purpose.	No award under this part may be used for telecommunications technology equipment, facilities or services, if such equipment, facilities or services are available pursuant to section 396(k) of the Communications Act of 1934.	Not Applicable

ED Broadband-related Programs	Broadband Activities by Program	Broadband technology restrictions by program	Coordination and Level
Title IV, Part A	<p>The cost of materials and labor for such wiring is allowable under the SSAE program as long as it meets the definition of "minor remodeling" in 34 CFR Part 77 That definition of minor remodeling means "minor alterations in a previously completed building The term also includes the extension of utility lines, such as water and electricity, from points beyond the confines of the space in which the minor remodeling is undertaken but within the confines of the previously completed building The term does not include building construction, structural alterations to buildings, building maintenance, or repairs"</p>	<p>The cost of materials and labor for such wiring is allowable under the SSAE program as long as it meets the definition of "minor remodeling" in 34 CFR Part 77</p> <p>A Special Rule in the SSAE program states that no more than 15 percent of funds for activities to support the effective use of technology may be used "for purchasing technology infrastructure as described in subsection (a)(2)(B), which includes technology infrastructure purchased for the activities under subsection (a)(4)(A)." To clarify, LEAs or consortiums of LEAs may not spend more than 15 percent of funding in this content area on devices, equipment, software applications, platforms, digital instructional resources and/or other one-time IT purchases. (ESEA section 4109(b)).</p>	<p>STATE - LOCAL –</p> <p>Local educational agencies in a State may form a consortium with other surrounding local educational agencies and combine the funds each such agency in the consortium receives under this section to jointly carry out the local activities described in this subpart.</p>
