Dear Secretary Redl:

As you know, the National Telecommunications and Information Administration (NTIA) has previously announced requirements for the State and Local Implementation Grant (SLIGP) Program 2.0. The notice described the programmatic requirements under which NTIA will award grants to assist state, local, and tribal governments to use while planning a nationwide, interoperable, public safety broadband network.

The Act directs each state to include, in its application for grant funds, a designated officer or governmental body to serve as the coordinator of the grant funds. To serve as the coordinator of implementation of the SLIGP grant funds, I designate the Office of Information Technology, State of Alabama as the governmental body for SLIGP 2. I would like to designate Jim Purcell, Acting Secretary of Information Technology, as the point of contact within the Office of Information Technology.

Application Narrative

The Alabama Law Enforcement Office was awarded a grant for SLIGP 1.0 and in turn, was responsible for the administration of said grant and associated activities. The application and management of the SLIGP 2.0 grant is being transitioned from the Alabama Law Enforcement Office (ALEA) to the Alabama Office of Information Technology (OIT). As a result of recent legislative restructuring, the Information Services Division (ISD) was separated from the Alabama Department of Finance and merged directly with the Office of Information Technology (OIT). The established Policy, Governance, Technology and Administrative support skills inherent in the new, consolidated OIT better aligned with requirements to administer the SLIGP 2.0 grant and associated activities.

Alabama did opt-in to the FirstNet plan provided by AT&T and will use the SLIGP 2.0 grant to conduct the activities related to deploying the NTSBN, FirstNet with the RAN service provider AT&T. These activities include, but are not limited to the following activities.

Activities

Activity 1: Provide a single officer (or governmental body) and staff to, at a minimum, provide for ongoing coordination with NTIA and implementation of grant funds.

Description: The State and Local Grant Program (SLIGP) will be administered by the Office of Information Technology. OIT will provide two full time positions for the SLIGP 2.0 grant period. These resources will report to the Acting Secretary of Information Technology. OIT is already legislatively mandated to provide governance on large capital projects (> \$1.0 MM) for the State and has the processes and tools to effectively administer this grant.

The first position is that of Alabama FirstNet Program Director. The Alabama FirstNet Program Director has the overall responsibility for the success of SLIGP 2.0 in Alabama. This position will require extensive knowledge in information technology management and collaboration and communication skills. It will work with FirstNet to convene stakeholder outreach events such as Regional focus groups and conferences and participate in all outreach and communication events as requested by FirstNet.

The Alabama FirstNet Program Director will sit on the Alabama First Responder Wireless Commission (AFRWC) currently chaired by the State's Homeland Security Director and utilize the significant capabilities of AFRWC to identify stakeholders and facilitate communication to the first responder network. The Alabama FirstNet Program Director will monitor and communicate to FirstNet service provider user issues, needs requests, and existing gaps in service to continue planning for NPSBN implementations.

The Alabama FirstNet Program Director will be assigned a Grant Manager. The Grant Manager will support the Alabama FirstNet Program Director by providing office management and administrative assistance required to manage FirstNet grant implementation.

Additionally, the Alabama FirstNet Program Director has access to OIT resources in Wireless Technical Support Group, Project Management, and Financial support areas for additional support if required.

Expectation: That OIT will assign sufficient experienced resources necessary to execute all of the FirstNet requirements required to implement a NPSBN and successfully meet all of the NTIA administrative grant reporting and audit requirements.

Activity 2: To provide input and contribute towards planning activities to further identify potential public safety users of the NPSBN and prepare for data sharing.

Description: This will be accomplished using the Alabama First Responder Wireless Commission (AFRWC) as the governance body, of which the Alabama FirstNet Program Director is a member. The mission of the AFRWC is to utilize a consensus-based approach to mission-critical wireless communications development and promote interagency partnerships that lead to seamless communications among public safety agencies serving the citizens of Alabama. Responsibilities of the Commission include strategic planning of public safety spectrum and serving as the intergovernmental bridge between federal, state, local, tribal, and private entities to foster and promote collaboration and information sharing and to promote the efficient use of public resources to ensure that essential public safety personnel have effective communications.

Expectation: To ensure that all of the stakeholders and their issues are identified and communicated to the FirstNet provider.

Activity 3: Data collection in specific areas identified to be helpful as requested by FirstNet.

Description: Some examples of data collection would be the survey of first responders and emergency management personnel operating in the State of Alabama. The State will utilize the Communication Asset and Survey Mapping (CASM) tool and an online survey tool provided by the Office of Emergency Communication's Interoperable Communications Technical Assistance Program (OEC/ICTAP) to capture numerous data sets. OIT anticipates developing a new website for informational purposes only which would capture the necessary data and utilize the experience of personnel in its Application Development group to determine the System requirements. Also, OIT will have personnel assigned to visit with local users to collect data if needed.

Expectation: OIT will exploit both outside consulting and internal System Development capability to ensure that the data collection needs as defined by FirstNet are met in timely and effective fashion.

Activity 4: Development of policies and agreements to increase sharing of data between existing public safety systems across various agencies within the State or territory using the NPSBN.

Discussion: Develop Standard Operating Procedures regarding mobile data applications to include Information Sharing, Mobile Data Applications, Device Management, and Push to Talk (PTT). OIT is responsible by law for the development and communication of all Technology and Security policies for the State with the exception of a few exempted areas such as ALEA and Department of Education. The Alabama FirstNet Program Director can utilize the existing policy development resources to develop the policy and utilize the program website to promulgate for comment draft policies.

Expectation: Alabama FirstNet Program Director can exploit the existing Policy development capability in OIT to develop required documents in a timely and standardized format.

Activity 5: Planning efforts to help FirstNet gain inclusion on applicable statewide contract vehicles.

Discussion: OIT procurement personnel will consult with the State Purchasing Division to create and manage a contract that can be used by all state, local, and tribal entities.

Expectation: The contract needs of the first responders have been communicated to the State purchasing office so that contracts covering all first responders are in place.

Activity 6: Transition planning activities to prepare for emergency communications technology transitions.

Discussion: Coordinate with state and local entities to identify and plan for the transition of public safety applications, software, and databases to facilitate the planning of State initiatives. The Alabama FirstNet Program Director will serve as the primary Point of Contact (POC) to coordinate these efforts in order to ensure a seamless transition from existing communications system to FirstNet. Examples of additional planning activities could include initiatives to support LMR Transition / Integration, developing plans for integration of MC_PTT services with LMR networks Statewide, including interoperability planning and cross network fleet maps, applications transition planning, and facilitating QPP (QoS, Priority, and Pre-emption) planning.

Expectation: Effective transition planning will facilitate reducing the time and effort involved in implementation of the new Broadband system. This will also create a more positive image of the new system by the first responders.

Activity 7: Identifying and documenting on-going coverage needs/gaps within the State.

Discussion: The Alabama FirstNet Program Director will facilitate the selection of a methodology for capturing coverage gaps (how to capture single and other performance information including crowd source data). Additionally, the Alabama FirstNet Program Director will develop and implement a plan for data capture, leveraging local resources where possible. The data will then be analyzed to identify key coverage gaps in service and communicate to FirstNet service provider.

Expectation: The number and location of cell towers installed by AT&T will be sufficient, such that rural and tribal first responders will have coverage based on the initial layout plan.

Dear Secretary Redl:

As you know, the National Telecommunications and Information Administration (NTIA) has previously announced requirements for the State and Local Implementation Grant (SLIGP) Program 2.0. The notice described the programmatic requirements under which NTIA will award grants to assist state, local, and tribal governments to use while planning a nationwide, interoperable, public safety broadband network.

The Act directs each state to include, in its application for grant funds, a designated officer or governmental body to serve as the coordinator of the grant funds. To serve as the coordinator of implementation of the SLIGP grant funds, I designate the Office of Information Technology, State of Alabama as the governmental body for SLIGP 2. I would like to designate Jim Purcell, Acting Secretary of Information Technology, as the point of contact within the Office of Information Technology.

Please direct all communications regarding this program to Secretary Purcell at the following address:
