11a. Narrative description for each activity reported in Question 11 for this quarter; any challenges or obstacles encountered and mitigation strategies you have employed; planned major activities for the next quarter; and any additional project During this quarter, California held a CaiFRN Board Meeting (governance body) on June 13, 2018 in Sacramento, CA, to provide input to the single officer and to contribute towards planning efforts and prepare for data and information sharing. AT&T and FirstNet provided updates regarding the FirstNet deployment, tribal engagement and the commitments to California. SLIGP staff participated in contract negotiations with AT&T, and the California Department of Technology (CDT) to help FirstNet gain inclusion on applicable statewide contract vehicles. We continue to collaborate with AT&T to develop site placement and coverage priorities, coordinate on outreach events, as well as discuss the Local Control Tool functionality and capabilities. Planned major activities for the next quarter include meetings with AT&T and FirstNet, a governance body meeting, continued contract negotiations, and continued outreach to stakeholders to identify and document on-going coverage needs/gaps within the State.

11.7 Data Sharing Policies/Agreements Developed: In coordination with the Department of Homeland Security (DHS), SLIGP staff participated in a Statewide Communications Interoperability Plan (SCIP) workshop to continue planning activities to prepare for emergency communications technology transitions. Participants developed goals and objectives to plan for a comprehensive approach to share information with elected officials, decision makers, end users, and the public. California is continuously working on ensuring that the Communication Assets Survey and Mapping Tool (CASM) will be utilized to support the state's efforts in managing its emergency communications assets
