DOD\AF 3550-3650 (Rev. 1) (Sufficient) - Interactions

Interaction Name	Interaction Description
1	AF-3550-1: No interactions with NTIA regulators needed.
2	AF-3550-2: If interference from commercial wireless to Air Force systems are detected promptly inform the NTIA regulators. Work with NTIA and FCC on resolution of interference cases.

Releasable

DOD\AF 3550-3650 (Rev. 1) (Sufficient) - Impact Factors

Factor Name	Factor Description
Exclusion Zone	Any non-Federal use of the 3550-3650 MHz band, in areas and frequencies designated as exclusion areas, is not permitted.
Sensitive Information that is not releasable to the public is included in the Transition Plan	In accordance with 47 USC 929 - National Security and Other Sensitive Information, the Service Secretary has determined that public release of the information marked as sensitive U//FOUO, taken in the aggregate as presented in this TP would reveal sensitive national security information. Withholding the sensitive information has no impact on fulfillment of this transition plan as the protection areas already identified are inclusive. The information deemed sensitive is: Tab Frequencies [Center Lower Frequency Limit (MHz), Upper Band Limit (MHz) (if appl), Emission Bandwidth (MHz), Receiver Bandwidth (MHz), Operation Area, Transmitter Latitude, Transmitter Longitude, Receiver Latitude, and Receiver Longitude, Alternate Frequency Assignment (if appl)], and Tab Notes, as applicable.
Spectrum Monitoring Equipment	The Air Force cannot implement and execute this transition plan without spectrum monitoring systems at our installations.

Releasable

DOD\AF 3550-3650 (Rev. 1) (Sufficient) - Notes

Note Name	Note Text
Air Force Executive Summary	<p>The Department of the Air Force 3550-3650 MHz Transition Plan focuses on operations at the Nevada Test and Training Range (NTTR). The engineering and sharing support component of the Air Force Transition Plan will provide the Air Force with qualified personnel to support working group coverage and engineering management needed to implement the DoD sharing strategy in coordination with industry, NTIA, and FCC. The designated Air Force engineering team will support all components of the Air Force sharing plan. The EME Sensing and Monitoring component of the Air Force Transition Plan provides for the procurement, installation, and maintenance of sensing and monitoring systems at the NTTR. This system will analyze and quantify RF radar measurements ensuring radar performance is not degraded while assessing the newly shared environment.</p>
NTIA Collaboration	<p>NTIA will be invited to participate in the execution of the efforts funded by this transition plan. Data, analysis, software capabilities (including source code), reports, and other products resulting from the activities funded by the DoD Transition Plans can and will be shared with NTIA.</p>
Sharing Costs	<p>All requested funding in the DoD Transition Plans is an allowable use of the Spectrum Relocation Fund for the 3550-3650 MHz band. DoD is entitled to full protection as the incumbent under the CBRS sharing rules and is currently incurring sharing costs in connection with the auction of 3550-3650 MHz Priority Access Licenses (PAL). The transition activities are required to maintain comparable capability in terms of risk of interference and DoD's ability to address any interference that may occur, at least equivalent to the risk and ability to mitigate interference as before the Citizens Broadband Radio Service (CBRS) sharing arrangement and PAL auction.</p> <p>Prior to the sharing arrangement, the DoD was able to effectively operate all of its spectrum dependent systems in the 3550-3650 MHz band. DoD's implementation of an indefinite sharing arrangement with new uses and users in the 3550-3650 MHz band inevitably involves the sharing costs as identified in 47 U.S.C. §923(g)(3). To ensure comparable operations and capabilities, DoD is and will continue to incur costs to mitigate against harmful interference to its protected operations.</p> <p>The proposed activities are required to ensure DoD incumbent operations are protected. Any expanded capabilities are incidental to establishing the core capability that is needed for sharing the 3550-3650 MHz band with CBRS.</p>
