Re: Development of a National Spectrum Strategy, Docket No. NTIA-2023-0003

Dear Mr. Harris:

On June 12, 2023 representatives of the Intelligent Transportation Society of America (“ITS America”) and the National Telecommunications and Information Administration (“NTIA”) met virtually to discuss NTIA’s development of the National Spectrum Strategy (“NSS”). A list of participants is attached.

ITS America provided a high-level overview of its [comments](#) to the NSS and its V2X National Deployment Plan which is available at <https://itsa.org/advocacy-material/its-america-national-v2x-deployment-plan/>. ITS America reaffirmed the importance placed by NTIA’s Request For Comments on providing spectrum to accommodate emerging advanced transportation services, including those enabled by Vehicle-to-Everything (V2X) systems that allow vehicles to communicate with other vehicles, infrastructure, law enforcement, and bicycle and pedestrian road users to avoid crashes and enhance safety.

Further, NTIA emphasized its efforts to identify at least 1500 MHz of spectrum for repurposing. NTIA and ITS America discussed the possibility of spectrum-sharing between advanced transportation services and other uses in the future. ITS America urged that the NSS provide opportunities for innovative new uses and users of spectrum.

If there are any questions regarding this notice, please contact the undersigned.

Sincerely,

/s/ Robert B. Kelly
