Subject:

Please do NOT privatize the ICANN

I'm writing to formally oppose the effort underway to privatize the ICANN.

It's really very simple: I believe the only way to maintain some semblance of oversight over this critical organization is for it to remain under governmental administration. As the Internet becomes increasingly ubiquitous, this is all the more important.

So, please resist any and all efforts to make the ICANN private, and thus, less subject to regulation and oversight.

Sincerely, John
