---

Good morning – I’m sure my comments will be similar to plenty of others that you receive this year as they are based on the context of distance learning/remote work during the pandemic. Having spent more than two decades in the field of education technology, two topics came to mind as I read through the current list of survey questions:

1. Is the capacity of your internet connection adequate to provide the capacity needed for one or more of your household members to be online at the same time? (i.e. children completing remote school coursework while parents work remotely)
2. Are you concerned about the privacy and protection of children under the age of 18 when they are using the internet for distance learning activities? (i.e. CIPA/COPPA guidelines)

Thank you for your request for input – this is a critical topic.

Best regards,  
KO
