

CSMAC LESSONS LEARNED

Categories

- Collaboration
- Defining tasks and scoping
- Technical parameters and data improvements
- Time and resources
- Organization and participation
- Trusted agent and information sharing
- Production, processes, and output

NTIA ACTIONS

1. NTIA will incorporate CSMAC lessons learned into its strategic planning process through the NTIA Strategic Plan (draft):
 - ✓ cooperation and *collaboration*
 - ✓ *technologies* that promote spectrum efficiencies, including *data improvements*
 - ✓ *information sharing* between federal agencies and industry

NTIA ACTIONS (con't)

2. NTIA will establish:

- ✓ a sustainable and repeatable private/public sector collaboration framework (e.g., new sub-committee)
- ✓ a CSMAC Secretariat function to support the DFO
- ✓ a centralized (electronic) repository of information to facilitate information sharing and exchange
- ✓ OSM liaisons assigned to each subcommittee to facilitate information sharing and exchange

NTIA ACTIONS (con't)

3. NTIA will work with the CSMAC co-chairs to:
- ✓ explicitly define scope and expectations of all CSMAC subcommittees and working groups
 - ✓ review on at least a yearly basis for modifications
 - ✓ engage the OSM liaisons to identify changes
 - ✓ establish a consensus process which will result in accepted:
 - ✓ technical and operational parameters
 - ✓ analytical methods
 - ✓ Tools
 - ✓ data sources
