Matthew,

Thanks for the feedback. Rest assured that Vermont is committed to Universal Service and will be considering any approved technology necessary to get to that goal.

With warm regards,
Christine Hallquist

Subject: The Green Mountain State of Vermont Statewide supports all technology advancements for internet connectivity!

Greetings Staff Members of BEAD- [NTIA.gov](https://www.ntia.gov). And Vermont Statewide Community broadband members of Vermont. Myself An Individual of Color Support all internet connectivity technology even if those are satellite wireless internet services or technology that needs to be updated with 6G advanced technology Wi-Fi devices and products to promote better connectivity and availability and durability throughout the Green Mountain State of Vermont I'm sending this message now to everyone because I support All the above programs to promote inclusion diversity and equity and this process of broadband internet connectivity and reliability and durability build out and States like the Green Mountain State of Vermont that I am currently living in but I do agree fiber optics or new technology on the horizon and future of Internet with light patterns or using lighting equipment for fast internet connectivity for everyone is important

Thank-you Everyone for doing your best to provide internet Broadband fiber throughout the United States of America and in New England states like the Green Mountain State of Vermont.

Sincerely Matthew LeFluer From Alburgh Vermont
