

Total Annual Cost: \$1,200,000.

Privacy Act Impact Assessment: No impact(s).

Nature of Extent of Confidentiality: This collection does not address information of a confidential nature.

Needs and Uses: Section 64.904(a) states that each incumbent LEC required to file a cost allocation manual shall elect to either have an attest engagement performed by an independent auditor every two years, covering the prior two year period, or have a financial audit performed by an independent auditor biennially. In either case, the initial engagement shall be performed in the calendar year after the carrier is first required to file a cost allocation manual. See Section 64.904(a)–(c). Instead of requiring mid-sized carriers to incur the expense of a biennial attestation engagement, they now file a certification with the Commission stating that they are in compliance with 47 CFR 64.901 of the Commission’s rules, which sets out the rules regarding allocation of costs. The certification must be signed, under oath, by an officer of the incumbent LEC, and filed with the Commission on an annual basis. Such certification of compliance represents a less costly means of enforcing compliance with our cost allocation rules. See 47 CFR 64.905 of the Commission’s rules. The requirements are imposed to ensure that the carriers are properly complying with Commission rules. They serve as an important aid in the Commission’s monitoring program. Section 64.905 requires mid-sized LECs to file a certification with the Commission stating that they are complying with section 64.901. The certification must be signed, under oath, by an officer of the mid-sized LEC, and filed with the Commission on an annual basis at the time that the mid-sized incumbent LEC files the annual reports required by section 43.21(e)(2).

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

[WT Docket No. 19–348; DA 21–645; FRS 36568]

The Federal Communications Commission and National Telecommunications and Information Administration: Coordination Procedures in the 3.45–3.55 GHz Band

AGENCY: Federal Communications Commission and National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice.

SUMMARY: The Federal Communications Commission’s Wireless Telecommunications Bureau (WTB) and the National Telecommunications and Information Administration (NTIA) issue this joint *Public Notice* to provide information about the cooperative sharing framework for federal and non-federal coordination in certain, defined areas where and when federal incumbents require continued access in the 3.45–3.55 GHz band. The *Public Notice* provides information and guidance on the overall coordination process, as contemplated by the *3.45 GHz Band 2d R&O*, including informal pre-coordination discussions, the formal process of submitting coordination requests, and receiving results from relevant federal incumbents. The *Public Notice* also provides a streamlined coordination process for high-power radar sites.

ADDRESSES: Federal Communications Commission, 45 L Street NE, Washington, DC 20554 and U.S. Department of Commerce, National Telecommunications and Information Administration, 1401 Constitution Avenue NW, Washington, DC 20230.

DATES: Issued on July 19, 2021.

FOR FURTHER INFORMATION CONTACT:

Joyce Jones at (202) 418–1327 or joyce.jones@fcc.gov, Mobility Division, Wireless Telecommunications Bureau, FCC, or Gabriel Gersten at (202) 482–1182 or TransitionPlanS@ntia.gov, Strategic Planning Division, Office of Spectrum Management, NTIA.

SUPPLEMENTARY INFORMATION: This is a summary of a public notice of the coordination procedures in the 3.45–3.55 GHz band, released jointly by the Federal Communications Commission’s Wireless Telecommunications Bureau

and the United States Department of Commerce, National Telecommunications and Information Administration, WT Docket No. 19–348, DA 21–645, on June 2, 2021. The full text of this document including all Appendices, is available for public inspection at the following internet address: <https://ecfsapi.fcc.gov/file/06021352508295/DA-21-645A1.pdf>. Alternative formats are available for people with disabilities (Braille, large print, electronic files, audio format), by sending an email to FCC504@fcc.gov or calling the Consumer and Governmental Affairs Bureau at 202–418–0530 (voice) or 202–418–0432 (TTY).

Synopsis

I. Introduction

In March 2021, the Federal Communications Commission announced a planned auction of new flexible-use licenses in the 3.45–3.55 GHz band (Auction 110). See *Auction of Flexible-Use Service Licenses in the 3.45–3.55 GHz Band for Next-Generation Wireless Services; Comment Sought on Competitive Bidding Procedures for Auction 110*, AU Docket No. 21–62, Public Notice, 2021 WL 1086298 (2021); see also *Facilitating Shared Use in the 3100–3550 MHz Band*, WT Docket No. 19–348, Second Report and Order, Order on Reconsideration, and Order of Proposed Modification, 2021 WL 1086295 (2021) (*3.45 GHz Band 2d R&O*). Auction 110 will offer 4,060 new licenses throughout the contiguous United States, subject to cooperative sharing requirements in certain, defined areas where and when federal incumbents¹ require continued access to the band. The Commission, NTIA, and the Department of Defense (DoD) are working collaboratively towards these goals. By this *Public Notice*, the Commission, through WTB, and NTIA, provide (i) information for potential bidders in the 3.45 GHz Service auction and (ii) guidance to the ultimate 3.45 GHz Service licensees and the affected federal incumbents regarding coordination procedures for shared use of the 3.45 GHz band. The joint nature of this *Public Notice* reflects the intersecting jurisdictions of the Commission (which administers spectrum for non-federal uses) and NTIA (which administers spectrum for federal uses) in the radio spectrum, including in this band.

The *Public Notice* proceeds as follows. In section II, we provide

¹ References to federal incumbents in this *Public Notice* refer to the individual military departments with which 3.45 GHz Service licensees will negotiate coordination agreements.

general background information about federal/non-federal coordination in the areas of the 3.45 GHz band in which federal incumbents have spectrum assignments. In section III, we provide information and guidance on the overall coordination process in areas subject to coordination, consistent with the requirements of the *3.45 GHz Band 2d R&O*, including informal pre-coordination discussions and the formal process of submitting coordination requests and receiving results from relevant federal incumbents.

II. Background

3.45 GHz Band 2d R&O. On March 17, 2021, the Commission adopted rules governing flexible use of spectrum in the 3.45–3.55 GHz band, thereby making 100 megahertz of mid-band spectrum available for flexible-use wireless services, including 5G. Under the Commission’s framework for the band, developed in collaboration with the Executive Branch, non-federal systems generally will have unencumbered use of the entire band across the contiguous United States and, with limited exceptions, federal systems operating in the band may not cause harmful interference to non-federal operations in the band. In limited circumstances and in locations where current incumbent federal systems will remain in the band, however, non-federal systems will not be entitled to protection against harmful interference from federal operations (and restrictions may be placed on non-federal operations). These exceptions will occur only in geographic areas specifically identified as Cooperative Planning Areas and Periodic Use Areas.

Cooperative Planning Areas and Periodic Use Areas. Cooperative Planning Areas and Periodic Use Areas are defined in US Footnote US431B to the U.S. Table of Frequency Allocations. US431B also identifies the boundaries of each of the 33 Cooperative Planning Areas, as well as the 23 overlapping Periodic Use Areas, by reference to either a point and radius or a series of coordinates (which create a polygon). 3.45 GHz Service licensees must successfully coordinate their operations with federal incumbent(s) before commencing operation in any Cooperative Planning Area or Periodic Use Area. Several statutory provisions encourage negotiation, coordination, and spectrum sharing between non-federal users and federal entities.²

² See NTIA Manual, Annex O (Relocation or Sharing by Federal Government Stations in Support of Reallocation) § O.5.1 (Negotiation and Coordination with Non-Federal Users), citing, e.g., 47 U.S.C. 923(g)(3)(A)(iv)(II) and (g)(3)(B)(i), 923(h)(2)(F); see also *id.* at § 928(d)(3)(B)(i)(II).

Beyond simply coordinating within those areas, federal and non-federal operators are encouraged to enter into mutually acceptable operator-to-operator agreements. Such agreements may permit more extensive flexible use within Cooperative Planning and Periodic Use Areas by adopting a technical approach that mitigates the interference risk to federal operations. The parameters of Cooperative Planning and Periodic Use Areas defined in US431B are the default, but in practice should be a starting point for negotiations between flexible-use licensees and federal incumbents; more expansive use by the flexible-use licensee can be agreed to in areas and under circumstances or parameters acceptable to the federal incumbent.

Fort Bragg and Little Rock. As noted in the 3.45 GHz Band 2d R&O, in all but two of the Cooperative Planning and Periodic Use Areas, 3.45 GHz Service licensees must coordinate with federal incumbents across all 100 megahertz of spectrum within the areas. In the Fort Bragg, North Carolina, Cooperative Planning Area and Periodic Use Area, in contrast, licensees will only need to coordinate in the lower 40 megahertz of the band, *i.e.*, 3450–3490 MHz, because the federal incumbent will only use the lower 40 megahertz of the band in this area, leaving the upper 60 megahertz unencumbered and available for full-power, flexible-use operations in accordance with the rules adopted herein. Thus, licensees in the upper portion of the band, *i.e.*, 3490–3550 MHz, need not coordinate with the federal incumbent in the Fort Bragg areas. In the Little Rock, Arkansas Cooperative Planning Area, for approximately the first 12 months following the close of the auction for this band, licensees will have to coordinate with the federal incumbent across all 100 megahertz of the spectrum within the Little Rock area. After this time period, however, licensees will only need to coordinate in the lower 40 megahertz of the band in the Little Rock area, as the federal incumbent will vacate the upper 60 megahertz, *i.e.*, 3490–3550 MHz, by that time.³

Information on Incumbent Federal Operations. Information about incumbent federal operations is generally available through the affected federal incumbents’ Transition Plans. By way of background, federal incumbents in the 3.45 GHz band were required to develop and submit

³ The DoD will provide notice to licensee(s) via their portal account(s) and will post a notice on its portal front page, and NTIA will post a similar notice on its 3450–3550 MHz web page (<https://www.ntia.gov/category/3450-3550-mhz>).

Transition Plans to implement relocation or sharing arrangements and affected federal incumbents have done so. Transition Plans contain information on these federal systems, including the frequencies used, emission bandwidth, system use, geographic service area, authorized radius of operation, and estimated timelines and costs for relocation or sharing. Affected federal incumbents are permitted to redact from the publicly released Transition Plans classified national security information and “other information for which there is a legal basis for nondisclosure and the public disclosure of which would be detrimental to national security, homeland security, or public safety or would jeopardize a law enforcement investigation.”⁴ NTIA expects to publish the publicly available Transition Plans on its website no later than June 7, 2021.⁵ Other publicly available information from NTIA regarding the 3.45 GHz band is also available through the same website.

The 3.45 GHz band currently is used by the DoD for high- and low-powered radar systems on a variety of platforms in the 3 GHz band, including fixed, mobile, shipborne, and airborne operations, along with testing infrastructure and training operations. Generally, incumbent federal operations in 3.45 GHz band include the following categories of systems:

- High-powered shipborne radars
- Lower power airborne radars
- Lower power ground-based radars
- Testing infrastructure
- Training operations

For information on the incumbent federal operations, please see the Transition Plans and DoD’s Workbook and associated file(s) once they are published on NTIA’s website.⁶

Below, we describe the specific coordination requirements set forth in the 3.45 GHz Band 2d R&O and we provide guidance regarding how such requirements might be addressed.

⁴ See 47 U.S.C. 923(h)(7). Each federal entity that requested pre-auction funds attested in its Transition Plan that it will, during the transition period, make available to a non-federal user with appropriate security clearances any classified information regarding the relocation process, on a need-to-know basis, to assist the non-federal user in the relocation process with the eligible federal entity or other eligible federal entities. *Accord* 47 U.S.C. 928(d)(3)(B)(ii)(4); see also NTIA Manual of Regulations and Procedures for Federal Radio Frequency Management (NTIA Manual), Annex O at §§ O.4.1 ¶ 3, O.6.1, and at Appendix: Common Format for Transition Plans, Tab B.

⁵ See 47 U.S.C. 923(h)(5) (requiring NTIA to publish approved plans on its website no later than 120 days before the start of the auction). See <https://www.ntia.gov/category/3450-3550-mhz>.

⁶ <https://www.ntia.gov/category/3450-3550-mhz>.

III. Coordination Process Guidance

Before a 3.45 GHz Service licensee commences operations in a Cooperative Planning Area or Periodic Use Area, it must first successfully coordinate with the federal incumbent(s) associated with that area. The purpose of coordination is to facilitate shared use of the band in these specified areas and during specified time periods. The coordination procedures outlined here will apply to all 3.45 GHz Service licensees seeking to operate in a Cooperative Planning Area or Periodic Use Area, unless the 3.45 GHz Service licensee and the federal incumbent(s) have reached a mutually agreeable coordination arrangement that provides otherwise. Such arrangements could, for example, document specific notification and activation procedures. Moreover, additional coordination requirements, procedures, and scenarios may be developed, consistent with any Administrative Procedure Act or other legal requirement that may apply, in future public notices, specific operator-to-operator agreements, or other mechanisms. We expect 3.45 GHz Service licensees and federal incumbents to negotiate in good faith throughout the coordination process (e.g., sharing information about their respective systems and communicating results to facilitate commercial use⁷ of the band).

A. Contact

The DoD will create an online portal through which any 3.45 GHz Service licensee that intends to commence operations within a Cooperative Planning Area or Periodic Use Area must initiate formal coordination requests for its relevant systems within the associated area.

B. Informal Discussions

Before a 3.45 GHz Service licensee submits a formal coordination request, it may share draft proposals or request that federal incumbent coordination staff discuss draft coordination proposals. These discussions are voluntary, informal, and non-binding and can begin at any time after the conclusion of the auction. 3.45 GHz Service licensees may discuss their proposed deployments and seek guidance from the federal incumbent(s) on appropriate measures to ensure that electromagnetic compatibility (EMC) analyses undertaken by the federal

incumbent(s) produce positive results. 3.45 GHz Service licensees and federal representatives also may develop an analysis methodology that reflects the characteristics of licensees' proposed deployments and the federal incumbents' operation. These discussions also can involve developing a process for identification and resolution of harmful interference.

Informal discussions are intended to allow federal incumbents and 3.45 GHz Service licensees to share information about their respective system designs and to identify potential issues before a formal coordination request will be submitted through the DoD's online portal. The federal incumbents involved, unless they specify otherwise in writing, would not be committing to any final determination regarding the outcome of the formal coordination. We strongly encourage parties to use informal, non-binding discussions to minimize or resolve basic methodological issues upfront, before having the 3.45 GHz Service licensees submit formal coordination requests. The DoD will provide a single point of contact on NTIA's website upon conclusion of the auction through which a licensee may initiate informal discussions.

C. Formal Coordination

We provide guidance for the formal coordination process below. This description is general, and the process may differ between federal incumbents and is subject to modification by the federal incumbents and licensees as agreed to on an operator-to-operator basis. We expect and encourage federal incumbents and 3.45 GHz Service licensees to engage in good faith coordination.

1. Initiation

Coordination shall be initiated by the 3.45 GHz Service licensee by formally requesting access to operate within a Cooperative Planning Area or Periodic Use Area. This request must be made directly through the DoD's online portal. The 3.45 GHz Service licensee must set up its portal account and, once established, the 3.45 GHz Service licensee will receive a user guide and training on the use of the portal.

2. Timing

No formal coordination for nine (9) months. As set forth in the *3.45 GHz Band 2d R&O*, unless a 3.45 GHz Service licensee and the relevant federal incumbent otherwise agree, no formal coordination requests may be submitted until nine (9) months after the date of the auction closing Public Notice. 3.45

GHz Service licensees may request informal discussions during this nine-month time period as described above in section B.

Timing Generally and Affirmative Concurrence. Nine (9) months after the close of the auction, federal incumbents are expected to timely review and respond to formal coordination requests. We encourage licensees and incumbents, through informal discussions, to serialize formal coordination requests as appropriate to avoid an overwhelming influx of coordination requests at the conclusion of the nine (9) month quiet period. For example, a licensee holding licenses in multiple Cooperative Planning or Periodic Use Areas could provide a prioritized list of coordination requests to be acted upon by the federal incumbent(s). This informal information exchange may aid the licensee in creating its prioritized list of deployments, which is required as part of its formal coordination request. We also encourage licensees and federal incumbents to discuss, as appropriate, extended review timelines to the extent that the incumbents' coordination resources are exhausted due to a large number of requests within a short time period after the quiet period. This will help maximize the quick and efficient review of coordination requests.

When a licensee submits a formal request, the federal point of contact will affirmatively acknowledge receipt of the request within five (5) calendar days after the date of submission. Within ten (10) calendar days after the submission date, federal incumbent staff will notify the 3.45 GHz Service licensee that the request is complete or incomplete. Unless the federal incumbent finds the request incomplete or the federal incumbent and 3.45 GHz Service licensee agree to a different timeline, the federal response (the results letter discussed below) is due within sixty (60) calendar days after the deadline for the notice of completeness.

Unless otherwise agreed to in writing, the requirement to reach a coordination arrangement is satisfied only by obtaining the affirmative concurrence of the relevant federal incumbent(s) via the portal. This requirement is not satisfied by omission.

3. Submission Information

To submit a formal coordination request, the 3.45 GHz Service licensee must include information about the technical characteristics for its base stations and associated mobile units relevant to operation within the Cooperative Planning Area or Periodic Use Area. This information should be

⁷References to commercial use in this *Public Notice* refer to non-federal, primary, flexible use of the 3.45 GHz band and do not preclude use of the band for private mobile radio services. See 47 U.S.C. 332(d)(3); 47 CFR 20.3.

provided in accordance with the instructions provided in the DoD's online portal user's guide. The types of specific information, including the likely data fields in the portal, include basic technical operating parameters (e.g., system technology, mobile EIRP, frequency block, channel bandwidth, site name, latitude, and longitude). The portal will accept uploaded attachments that include narratives that explain area-wide deployments.

3.45 GHz Service licensees must prioritize their deployments in the Cooperative Planning Area or Periodic Use Area for each federal incumbent when submitting a formal coordination request. If a licensee seeks to coordinate with multiple systems or multiple locations of operation controlled by one federal incumbent, it must specify the order in which it prefers the federal incumbent process the request (*i.e.*, the order of systems or geographic locations).

4. Notice of Complete or Incomplete Request

Once a licensee submits a formal coordination request, the relevant federal incumbent's coordination staff will review the data to ensure that it is in the proper format and contains the proper content. Federal incumbent coordination staff will notify the 3.45 GHz Service licensee within ten (10) calendar days through the portal that its formal coordination request is complete or incomplete. If the federal incumbent coordination staff finds a request to be incomplete, it must identify the information that the licensee must provide in as much specificity as possible. We expect that parties will work collaboratively to achieve completeness in a timely manner.

5. Coordination Analysis

As noted above, unless a timely notice of incomplete application is sent to the 3.45 GHz Service licensee (or the parties agree to different a timeline), the clock for the federal response begins to run on the deadline for the notice of completeness. The federal response is due within sixty (60) calendar days thereafter, unless the 3.45 GHz Service licensee agrees otherwise. During these sixty (60) days, the federal incumbent will coordinate with appropriate internal units, complete EMC analysis, and post the 3.45 GHz Service concurrence, partial concurrence with operating conditions, or denial. Each federal incumbent is responsible for ensuring that it completes its internal, multi-level review in a timely manner. Federal incumbents are encouraged, through their designated internal

coordination point of contact or through other means, to ask any questions and discuss any issues that arise with the 3.45 GHz Service licensee.

Once the designated federal incumbent coordinator completes its analysis pursuant to the formal coordination request, the 3.45 GHz Service licensee and the relevant federal incumbent field offices will be notified automatically when a results letter is posted by the federal user in the portal. The result of a coordination request will be concurrence, partial concurrence with operating conditions that specify the terms in which the licensee may begin operations, or denial of the request. Because of the sensitive nature of the data involved in much of the EMC analysis, the results letter may not present details of the analysis, the federal frequency assignments affected, or timelines. If a federal incumbent does not provide a results letter within the sixty (60) day-deadline, or within the timeline otherwise agreed to by the 3.45 GHz Service licensee, the 3.45 GHz Service licensee may contact NTIA for assistance.

Once a results letter is posted by the federal incumbent coordinator in the portal, we strongly encourage the 3.45 GHz Service licensee to acknowledge receipt of the letter via the portal. If no affirmative acknowledgement is made via the portal, the 3.45 GHz Service licensee should be aware that the federal incumbent coordinator may close out the coordination request in the portal 60 days after posting the results letter. Notwithstanding the 3.45 GHz Service licensee's acknowledgement of receipt, if a 3.45 GHz Service licensee has questions about the result, it may contact the federal incumbent coordinator to propose network design modifications to help address EMC issues raised in the results letter. The federal incumbent coordinator may, where feasible, review technical proposals from the 3.45 GHz Service licensee to relieve or resolve a denial, partial concurrence or any operating condition contained in the results letter. Once the 3.45 GHz Service licensee has revised its network design, it must resubmit a new formal coordination request, and the 3.45 GHz Service formal coordination process will begin again.

We stress again the benefits of informal discussions among 3.45 GHz Service licensees and federal incumbents, including during the formal coordination process. While in many cases, federal incumbent staff may be unable to provide specific information about the protected federal operations and are not responsible for

designing the 3.45 GHz Service system, they may offer some suggestions on how to address or mitigate the issue, given the limited information that can be made available on some federal systems. If the parties agree that informal discussions would be helpful, the sixty (60)-day clock will be paused so the federal incumbents are not forced to formally decline or condition the pending, formal coordination request within the sixty (60)-day deadline.

6. Streamlined Coordination Process for High-Power Radar Sites

An optional streamlined framework is available to meet the coordination requirement associated with some of the high-power radar facilities identified with an asterisk (*) in footnote US431B of 47 CFR 2.106 as set forth in Appendix A. The list of sites for which streamlined coordination applies will be posted on NTIA's website at the same time as the Transition Plans. 3.45 GHz Service licensees requesting coordination for a Cooperative Planning Area have a streamlined option set forth in Appendix B of this *Public Notice* in the form of a template coordination agreement. Once a 3.45 GHz Service licensee completes and delivers (via the DoD portal) a signed copy of the template agreement set forth in Appendix B, and the federal incumbent countersigns, the Commission and NTIA will deem the coordination requirement satisfied for the 3.45 GHz Service licenses and Cooperative Planning Areas listed in Table A of the agreement. Federal incumbents will complete and countersign a template agreement within thirty (30) calendar days of receiving one signed by the 3.45 GHz Service licensee. Exchange of information during execution of these coordination agreements may be facilitated by use of the DoD portal described in section C.1 above.

7. Periodic Use Areas Operator-to-Operator Agreements

In accordance with the *3.45 GHz Band 2d R&O*, 3.45 GHz Service licensees and federal incumbents are expected to develop operator-to-operator agreements to define notification processes and timelines before commencement of federal operations within a Periodic Use Area. The operator-to-operator agreement could, for example, specify the notification process, content, and timelines (*i.e.*, the starting and ending dates and times of such use). The agreements also may specify that the 3.45 GHz Service licensee and the federal incumbent may use a scheduling tool to complete the notification process

or agree to technical limitations to commercial operations (e.g., reduced power levels and antenna pointing angles) in lieu of a notification process.

Upon receipt of a coordination request that includes a Periodic Use Area, the DoD will contact the licensee via the portal to schedule a time to discuss establishing an operator-to-operator agreement. Due to the complexities of the negotiations, operator-to-operator agreements may not be finalized during the 60-day coordination analysis process. Both parties are expected to negotiate in good faith.

In addition, an Incumbent Informing Capability (IIC) could be developed to facilitate coordination within the Periodic Use Areas. The IIC concept is a time- and location-based spectrum sharing uniform approach that would enable federal agencies to submit information, reliably and securely, about when and where they would be employing certain frequencies. This scheduling information would inform a licensee, allowing commercial network providers to adjust operations in near real time and avoid harmful interference. The goal is to enable efficient, secure, and reliable spectrum sharing between new commercial networks and the incumbent federal systems. As part of the DoD's funded Transition Plan, the DoD will develop an Automated Sharing Coordination System (ASCS) which could be used to provide notification of the activation of Periodic Use Areas by DoD incumbents. All use of these capabilities is dependent upon the operator-to-operator agreements.

D. Dispute Resolution

Disputes generally—during coordination or regarding a sharing agreement. If disputes arise during the coordination process, we strongly encourage parties to negotiate in good faith to resolve them. If a 3.45 GHz Service licensee believes that a federal incumbent is not negotiating in good faith, the licensee may seek the assistance of NTIA or it can inform the Commission. If a federal incumbent believes that a 3.45 GHz Service licensee is not negotiating in good faith, it must nonetheless timely respond to a formal request and would have the option to seek assistance from NTIA or the Commission. We encourage parties to enter into operator-to-operator agreements that have dispute resolution provisions for any or all possible disputes. If a dispute arises between an incumbent federal incumbent and a 3.45 GHz Service licensee over an operator-to-operator agreement, provisions

calling for informal negotiation, mediation, or non-binding arbitration between the parties will help to clearly define and narrow the issues for formal agency resolution by NTIA, the Commission, or both agencies acting jointly, as applicable.

Certain disputes for which the law and NTIA rules allow parties to request a dispute resolution board. If a dispute arises between a federal entity⁸ and a 3.45 GHz Service licensee regarding the execution, timing, or cost of the approved Transition Plan, the law provides that either the federal entity or the non-federal user may request that NTIA establish a dispute resolution board to resolve the dispute. See Section 113(i) of the NTIA Organization Act, as amended (47 U.S.C. 923(i)). NTIA has adopted regulations that govern the working of any dispute resolution boards established by NTIA. See 47 CFR part 301. Those regulations cover matters related to the workings of a board, including the content of any request to establish a board, the associated procedures for convening it, and the dispute resolution process itself.⁹

The Middle Class Tax Relief and Job Creation Act of 2012 requires a board to rule on the dispute within thirty (30) days after a party has requested NTIA to convene the board. As stated in Annex O, “[t]he statute’s 30-day deadline for responding to formal dispute resolution requests could possibly impact a board’s ability to convene, meet with the parties, and adequately address complex cases.” NTIA Manual, Annex O at § O.5.2 ¶ 3. See 47 CFR 301.200(a)(2). At the same time, however, the statute and Annex O encourage cooperation to assure timely transitions between federal and non-federal use of the spectrum. If and when differences surface among federal and non-federal parties, NTIA’s rules require the parties to make good faith efforts to solve these problems on an informal basis before submitting a formal request to establish a dispute resolution board. Informal negotiation, mediation, or non-binding arbitration between the parties will help

⁸ We note that the dispute resolution process detailed in 47 U.S.C. 923(i) references certain disputes that may arise between a “Federal entity” and a non-federal user. For purposes of this *Public Notice*, such a “Federal entity” is the same as a federal incumbent.

⁹ Membership of a dispute resolution board shall be composed of a representative of OMB, NTIA, and the FCC, each appointed by the head of his or her respective agency. The OMB representative serves as the Chair of any board. With respect to the resolution of any disputes that may arise, the law and NTIA’s rules require a board to meet simultaneously with representatives of the federal entity and the non-federal user to discuss the dispute.

to clearly define and narrow the issues needed to be brought into the formal dispute resolution process.

The scope of a dispute resolution request and, consequently, a board’s decision, are limited by law and NTIA’s regulations to matters “regarding the execution, timing, or cost of the transition plan submitted by the Federal entity.” 47 U.S.C. 923(i)(1). The statute authorizes a dispute resolution board to make binding decisions on such matters that can be appealed to the United States Court of Appeals for the District of Columbia Circuit. *Id.* § 923(i)(7). Under NTIA’s rules, the dispute resolution board must also ensure that its decision does not have a detrimental impact on any national security, law enforcement, or public safety function made known to the board by an agency. See 47 CFR 301.220(b); see also NTIA Manual, Annex O at § O.5.2 ¶ 4. To fulfill that obligation, the board may request additional written submissions from an agency regarding the impact of such a decision on the agency’s operations, services, or functions.

E. Other Coordination Issues

Sharing of Sensitive and Classified Information. The DoD is establishing a mechanism for the sharing of sensitive and classified information. NTIA expects that further details regarding this process will be posted on NTIA’s website soon.

Interference Resolution Process. The introduction of non-federal, flexible-use licenses increases the possibility that harmful interference will occur between new entrants and incumbent federal users. As reflected in the new footnote US431B to the Table of Frequency Allocations, 3.45 GHz Service licensees in both types of coordination areas (Cooperative Planning Areas and Periodic Use Areas) must not cause harmful interference to federal users, and federal users should minimize the operational effect that they have on non-federal users. Furthermore, footnote US431B also provides that 3.45 GHz Service licensees cannot claim interference protection within the coordination areas, absent an operator-to-operator agreement that specifies otherwise. In addition, 3.45 GHz Service licensees may be required to “avoid, where possible, interference and potential damage to the non-Federal operators’ systems.” 47 CFR 2.106 US431B(a). In instances of identified harmful interference occurring between a federal user and a 3.45 GHz Service licensee not addressed by the coordination procedures or operator agreements, the 3.45 GHz Service licensee shall first attempt to resolve the

interference directly. If that effort is unsuccessful, the 3.45 GHz Service licensee, if adversely affected, may escalate the matter to the Commission.

Future Workshops and Workbooks. The DoD Transition Plans to be published on NTIA’s website will provide important information to prospective auction participants. They will be redacted to remove sensitive information as guided by statute. To supplement its Transition Plans, the DoD will be providing a “Workbook” that will offer additional publicly releasable information about its operations and coordination expectations and will be posted on NTIA’s website in conjunction with the redacted Transition Plans. The Workbook will be in the form of an Excel spreadsheet containing additional information about where the DoD anticipates its operations will encumber census tracts inside of the Cooperative Planning Areas and Periodic Use Areas based on frequency block and commercial tower height. Its structure will be similar to the AWS–3 DoD Workbook. As noted in both the NTIA letter to the FCC and the *3.45 GHz Band 2d R&O*, the Cooperative Planning Areas and Periodic Use Areas are based on 100-meter commercial towers. The DoD will be providing information on anticipated encumbered census tracts based on both 100-meter and 100-foot commercial towers on a frequency block basis. Additionally, the DoD will be providing anticipated power density level curves for the high-power radar locations via the mechanism for sharing sensitive information described in Section E of this *Public Notice*.

The DoD is also planning to host a public workshop in the July 2021 timeframe to discuss its Transition Plans and the Workbook and answer questions. Further details regarding the exact date, location, and registration

information will be made available on NTIA’s website in the near future.

Amy Brett,
Acting Chief of Staff, Wireless Telecommunications Bureau, Federal Communications Commission.

Kathy Smith,
Chief Counsel, National Telecommunications and Information Administration.

Appendix A

47 CFR 2.106 US431B

US431B The band 3450–3550 MHz is allocated on a primary basis to the Federal radiolocation service and to the non-Federal fixed and mobile, except aeronautical mobile, services on a nationwide basis. Federal operations in the band 3450–3550 MHz shall not cause harmful interference to non-Federal operations, except under the following circumstances.

(a) *Cooperative Planning Areas.* Cooperative Planning Areas (CPAs) are geographic locations in which non-Federal operations shall coordinate with Federal systems in the band to deploy non-Federal operations in a manner that shall not cause harmful interference to Federal systems operating in the band. In addition, operators of non-Federal stations may be required to modify their operations (e.g., reduce power, filtering, adjust antenna pointing angles, shielding, etc.) to protect Federal operations against harmful interference and to avoid, where possible, interference and potential damage to the non-Federal operators’ systems. In these areas, non-Federal operations may not claim interference protection from Federal systems. Federal and non-Federal operators may reach mutually acceptable operator-to-operator agreements to permit more extensive non-Federal use by identifying and mutually agreeing upon a technical approach that mitigates the interference risk to Federal operations. To the extent possible, Federal use in CPAs will be chosen to minimize operational impact on non-Federal users. The table in paragraph (d) identifies the locations of CPAs, including, for information, those with high powered Federal operations. CPAs may also be Periodic Use Areas as described below. Coordination between Federal users and non-Federal licensees in CPAs shall be consistent with rules and procedures established by the FCC and NTIA.

(b) *Periodic Use Areas.* Periodic Use Areas (PUAs) are geographic locations in which non-Federal operations in the band shall not cause harmful interference to Federal

systems operating in the band for episodic periods. During these times and in these areas, Federal users will require interference protection from non-Federal operations. Operators of non-Federal stations may be required to temporarily modify their operations (e.g., reduce power, filtering, adjust antenna pointing angles, shielding, etc.) to protect Federal operations from harmful interference, which may include restrictions on non-Federal stations’ ability to radiate at certain locations during specific periods of time. During such episodic use, non-Federal users in PUAs must alter their operations to avoid harmful interference to Federal systems’ temporary use of the band, and during such times, non-Federal operations may not claim interference protection from Federal systems. Federal and non-Federal operators may reach mutually acceptable operator-to-operator agreements such that a Federal operator may not need to activate a PUA if a mutually agreeable technical approach mitigates the interference risk to Federal operations. To the extent possible, Federal use in PUAs will be chosen to minimize operational impact on non-Federal users. Coordination between Federal users and non-Federal licensees in PUAs shall be consistent with rules and procedures established by the FCC and NTIA. While all PUAs are co-located with CPAs, the exact geographic area used during periodic use may differ from the co-located CPA. The geographic locations of PUAs are identified in the table in paragraph (d). Restrictions and authorizations for the CPAs remain in effect during periodic use unless specifically relieved in the coordination process.

(c) For the CPA at Little Rock, AR, after approximately 12 months from the close of the auction, non-Federal operations shall coordinate with Federal systems in only the 3450–3490 MHz band segment and the 3490–3550 MHz band segment will be available for non-federal use without coordination. At Fort Bragg, NC, non-Federal operations shall coordinate with Federal systems in only the 3450–3490 MHz band segment.

(d) The following table identifies the coordinates for the location of each CPA and PUA. An area may be represented as either a polygon made up of several corresponding coordinates or a circle represented by a center point and a radius. If a CPA has a corresponding PUA, the PUA coordinates are provided. A location marked with an asterisk (*) indicates a high-power federal radiolocation facility. If a location includes a Shipboard Electronic Systems Evaluation Facility (SESEF) attached to a homeport, it specifies the associated SESEF.

Appendix B

**Streamlined Coordination Option—
Template Agreement Coordination
Agreement Between [3.45 GHz Service
Licensee] (“3.45 GHz Service Licensee”) and
[Federal Incumbent] (“Federal Incumbent”)**

1. Introduction

This Coordination Agreement is between [Insert name of 3.45 GHz Service Licensee](hereinafter referred to as the “3.45 GHz Service Licensee”), and [Insert name of Federal Incumbent] (hereinafter referred to as the “Federal Incumbent”), and sets forth the terms and conditions for their operations in the 3.45–3.55 GHz band.

2. Acknowledgement of Regulations

All 3.45 GHz Service licensees must accept interference caused by the operation of Federal Incumbent’s [high-powered radar] site(s) and shall protect Federal Agency’s high-powered radar operations, as required by 47 CFR 27.1602 and 47 CFR 2.106, footnote US431B. The parties agree that within the Cooperative Planning Areas listed in Table A below, the 3.45 GHz Service Licensee will coordinate with the Federal Incumbent by notifying the Federal Incumbent of the 3.45 GHz Service Licensee’s intent to commence flexible-use service within the Cooperative Planning Area and submitting the additional information as listed in Section 4 below, prior to use of the spectrum. In cases where interference from high-powered radar site(s) results in 3.45 GHz Service Licensee customer complaints, the 3.45 GHz Service Licensee will take actions to address those complaints and employ mitigation methods to reduce the likelihood of them reoccurring.

TABLE A—DESCRIPTION OF LICENSE(S)
SUBJECT TO THIS AGREEMENT

State, Site, 3.45 GHz Service License Call Sign(s),
Cooperative Planning Area.

3. Point-of-contact

The Federal Incumbent and the 3.45 GHz Service Licensee hereby authorize the individuals listed in Table B below to serve as their Points of Contact (POC) for purposes of compliance with the notification and communication requirements of this Coordination Agreement.

TABLE B—POINTS OF CONTACT

[Federal Agency]	[3.45 GHz service licensee]
Name:	Name:
Address:	Address:
Phone:	Phone:

4. 3.45 GHz Service Licensee Notification to Federal Incumbent

As required by Section 2 above, the 3.45 GHz Service Licensee will provide to the Federal Incumbent the following information:

- 3.45 GHz Service Licensee’s deployment plans in the Cooperative Planning Area;
- Methods the 3.45 GHz Service Licensee plans to use to mitigate interference into its base station receivers, and an explanation of how the methods will mitigate interference from high-powered radar(s) and prevent any impaired consumer experience;
- Contact information for the 3.45 GHz Service Licensee’s network operation center and local engineering staff; and
- Assurance that the 3.45 GHz Service Licensee will satisfy its obligations to provide safety of life services (i.e., 911) on bands other than the 3.45 GHz band in the Cooperative Planning Area as needed.

5. Continuing Communications Between 3.45 GHz Service Licensee and Federal Incumbent

The parties shall:
• Address with each other, when the need first arises, any consumer complaints associated with the 3.45 GHz Service Licensee’s operations near Federal high-powered radar(s). This may include the 3.45

GHz Service Licensee’s development of external communication regarding reports of interference or interruption of service using the 3.45 GHz band. This external communication should reflect the acknowledgement of regulations in Section 2 above; and

- Meet annually to discuss network deployments, current and future technologies, interference mitigation techniques, consumer experiences, and other relevant topics necessary to help the Federal Incumbent understand the evolving use of the band, and its impact upon 3.45 GHz Service operations;
- The above additional interactions can be initiated by either POC listed above.

6. Substantial Changes to High-Powered Radar Operations or 3.45 GHz Service Deployments

If either party plans operations that are substantially different from the [original] concept of operations, the differences must be discussed during the annual meeting required by Section 5 above unless an immediate meeting is required to mitigate new and/or unexpected interference.

7. Sensitive/Proprietary Information

All information exchanged under this Coordination Agreement is considered sensitive/proprietary. Any exchange of information associated with this Coordination Agreement should be marked as sensitive/proprietary.

8. Successful Coordination

Execution of and compliance with all terms of this Coordination Agreement meets the regulatory requirement for successful coordination in 47 CFR 27.1603.

Signatories:

[Federal Incumbent]

BILLING CODE 6712-01-P

FEDERAL RESERVE SYSTEM**Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB****AGENCY:** Board of Governors of the Federal Reserve System.**SUMMARY:** The Board of Governors of the Federal Reserve System (Board) is adopting a proposal to extend for three years, without revision, the Disclosure Requirements Associated with the Consumer Financial Protection Bureau's (Bureau) Regulation M (FR M; OMB No. 7100-0202).**FOR FURTHER INFORMATION CONTACT:**

Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452-3829.

Office of Management and Budget (OMB) Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395-6974.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the PRA to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. The OMB inventory, as well as copies of the PRA Submission, supporting statements, and approved collection of information instrument(s) are available at <https://www.reginfo.gov/public/do/PRAMain>. These documents are also available on the Federal Reserve Board's public website at <https://www.federalreserve.gov/apps/reportforms/review.aspx> or may be requested from the agency clearance officer, whose name appears above.**Final Approval Under OMB Delegated Authority of the Extension for Three Years, Without Revision, of the Following Information Collection***Report title:* Disclosure Requirements Associated with the Consumer Financial Protection Bureau's Regulation M.*Agency form number:* FR M.*OMB control number:* 7100-0202.*Frequency:* On occasion.*Respondents:* The FR M panel comprises state member banks with assets of \$10 billion or less that are not affiliated with an insured depository institution with assets over \$10 billion (irrespective of the consolidated assets of any holding company); non-depository affiliates of such state member banks; and non-depository affiliates of bank holding companies that are not affiliated with an insured depository institution with assets over \$10 billion. Notwithstanding the foregoing, the Bureau, and not the Board, has supervisory authority for Regulation M with respect to automobile leasing over non-banks defined as "larger participants" in the automobile finance market pursuant to 12 U.S.C. 5514 (implemented by 12 CFR 1090.108).*Estimated number of respondents:* 4.*Estimated average hours per response:* Lease disclosures, 0.11; Advertising rules, 0.42.*Estimated annual burden hours:* Lease disclosures, 252; Advertising rules, 7.*General description of report:* The Consumer Leasing Act (CLA) and Regulation M are intended to provide consumers with meaningful disclosures about the costs and terms of leases for personal property. The disclosures enable consumers to compare the terms for a particular lease with those for other leases and, when appropriate, to compare lease terms with those for credit transactions. The CLA and Regulation M also contain rules about advertising consumer leases and limit the size of balloon payments in consumer lease transactions.

The Bureau's Regulation M applies to all types of lessors of personal property (except motor vehicle dealers excluded from the Bureau's authority under Dodd-Frank Act section 1029, which are covered by the Board's Regulation M). The CLA and Regulation M require lessors uniformly to disclose to consumers the costs, liabilities, and terms of consumer lease transactions.

Legal authorization and confidentiality: The FR M is authorized pursuant to sections 105(a) and 187 of the Truth in Lending Act (TILA), which require that the Bureau prescribe regulations regarding the disclosure requirements relating to consumer lease transactions. The FR M is mandatory.

Because the disclosures and records comprising the FR M are maintained at each banking organization, the Freedom of Information Act (FOIA) would only be implicated if the Board obtained such records as part of the examination or supervision of a banking organization. In the event the records are obtained by

the Board as part of an examination or supervision of a financial institution, this information may be considered confidential pursuant to exemption 8 of the FOIA, which protects information contained in "examination, operating, or condition reports" obtained in the bank supervisory process.¹*Current actions:* On April 16, 2021, the Board published an initial notice in the **Federal Register** (86 FR 20155) requesting public comment for 60 days on the extension, without revision, of the FR M. The comment period for this notice expired on June 15, 2021. The Board did not receive any comments.

Board of Governors of the Federal Reserve System, July 13, 2021.

Michele Taylor Fennell,*Deputy Associate Secretary of the Board.*
