**Subject:** NTIA Asks for Input from Organizations That Have Implemented IPv6  
**Date:** Friday, August 19, 2016 7:09:49 AM

---

Dear Sir,

It is great to know that USA's agency NTIA is conducting survey and asking for comments on the following:

- What are the benefits of and obstacles related to implementing IPv6?
- What factors contribute to an organization's decision to implement IPv6?
- What is the anticipated return on an IPv6-related investment?
- How long does the planning process for IPv6 implementation take, and what are the different types of costs involved?

Let me request you to kindly share the results with me too as I am dealing in IPv6 transition in India and responsible for formulation of IPv6 policies etc.

It is kindly requested to share the outcome of the same.

Regards,

N Ram
