ABSTRACT

*Current Population Survey, November 2019: Computer and Internet Use Supplement
microdata file]/ conducted by the Census Bureau for the
U.S. Department of Commerce, National Telecommunications and Information Administration.
Washington: U.S. Census Bureau [producer and distributor], 2020.*

Type of File

Microdata; unit of observation is individuals within housing units.

Universe Description

The universe consists of all persons in the civilian noninstitutional population of the United States living in households. The probability sample selected to represent the universe consists of approximately 50,000 households.

Subject-Matter Description

Data are provided on labor force activity for the week prior to the survey. Comprehensive data are available on the employment status, occupation, and industry of persons 16 years old and over. Also shown are personal characteristics such as age, sex, race, marital status, veteran status, household relationship, educational background, and Hispanic origin.

The Computer and Internet Use Supplement collected household information from all eligible CPS households, as well as person information from household members 3 years old and over. Data are provided about the household's computer and internet use and about each household member's use of the internet from any location in the past year. It also asked about a random respondent's use of the Internet.

Geographic Coverage

States, regions and divisions are identified in their entirety. Within confidentiality restrictions; indicators are provided for 278 selected core-based statistical areas (CBSA), 30 selected combined statistical areas (CSA), 217 counties, and 76 central cities in multi-central city core-based statistical areas or combined statistical areas. Also within confidentiality restrictions, indicators are provided for metropolitan/non-metropolitan, central city/balance metropolitan, and CBSA size.

Technical Description

File Structure: Rectangular.

File Size: 138,850 logical records; 1,236 character logical record length.

File Sort Sequence: State rank by CBSA rank by household identification number by line number.

Reference Materials:

Current Population Survey, November 2019: Computer and Internet Use Supplement Technical Documentation. Documentation contains this abstract, questionnaire facsimiles, and record layouts of the file.

U.S. Census Bureau. *The Current Population Survey Design and Methodology* (Technical Paper 77) describes in detail the sample design and survey procedures used as well as the accuracy of estimates and sampling errors. Copy is available at <https://www.census.gov/programs-surveys/cps/technical-documentation/ccomplete.html>.

For information about the Current Population Survey and other Census Bureau data products, be sure to visit our online Question & Answer Center on the Census Bureau's home page (<http://www.census.gov/>) where you can search our knowledge base and submit questions.

Microdata and technical documentation are available through the Current Population Survey website at <https://www.census.gov/programs-surveys/cps.html>.

ATTACHMENT 2

OVERVIEW

Current Population Survey

Introduction

The Current Population Survey (CPS) is the source of the official government statistics on employment and unemployment. The CPS has been conducted monthly for over 50 years. Currently, we obtain interviews from about 54,000 households monthly, scientifically selected on the basis of area of residence to represent the nation as a whole, individual states, and other specified areas. Each household is interviewed once a month for four consecutive months one year, and again for the corresponding time period a year later. This technique enables us to obtain reliable month-to-month and year-to-year comparisons at a reasonable cost while minimizing the inconvenience to any one household.

Although the main purpose of the survey is to collect information on the employment situation, a very important secondary purpose is to collect information on demographic characteristics such as age, sex, race, marital status, educational attainment, family relationship, occupation, and industry. From time to time, additional questions are included on health, education, income, and previous work experience. The statistics resulting from these questions serve to update similar information collected once every 10 years through the decennial census, and are used by government policymakers and legislators as important indicators of our nation's economic situation and for planning and evaluating many government programs.

The CPS provides current estimates of the economic status and activities of the population of the United States. Because it is not possible to develop one or two overall figures (such as the number of unemployed) that would adequately describe the whole complex of labor market phenomena, the CPS is designed to provide a large amount of detailed and supplementary data. Such data are made available to meet a wide variety of needs on the part of users of labor market information.

Thus, the CPS is the only source of monthly estimates of total employment (both farm and nonfarm); nonfarm self-employed persons, domestics, and unpaid helpers in nonfarm family enterprises; wage and salaried employees; and, finally, estimates of total unemployment.

It provides the only available distribution of workers by the number of hours worked (as distinguished from aggregate or average hours for an industry), permitting separate analyses of part-time workers, workers on overtime, etc. The survey is also the only comprehensive current source of information on the occupation of workers and the industries in which they work. Information is available from the survey not only for persons currently in the labor force but also for those who are outside the labor force. The characteristics of such persons - whether married women with or without young children, disabled persons, students, older retired workers, etc., can be determined. Information on their current desire for work, their past work experience, and their intentions as to job seeking are also available.

For a more detailed discussion about the basic labor force data gathered on a monthly basis in the CPS survey, see "Explanatory Notes and Estimates of Error" in any recent issue of the *Employment and Earnings*, a Bureau of Labor Statistics periodical. This source is referred to on the next page.

CPS Sample Design

The Current Population Survey (CPS) is a monthly survey designed primarily to produce national and state estimates of labor force characteristics of the civilian noninstitutional population (CNP) 16 years of age and older. It is conducted in approximately 60,000 eligible housing units throughout the United States. (Note: 'Eligible' can be simplistically defined as an occupied housing unit having at least one person in the CNP.) This sample includes 10,000 eligible housing units from the monthly supplementary sample to improve state-level estimates of health insurance coverage for low-income children, also known as the CHIP expansion. This supplementary sample has been part of the official CPS since July 2001. Thirty-two states plus the District of Columbia contain this supplementary sample each month.

The CPS sample is based on information from the 2010 Decennial Census, in accordance with usual practice. Historically, the CPS sample has been redesigned after each Decennial Census.

The CPS sample is a probability sample based on a stratified two-stage sampling scheme: selection of sample primary sampling units (PSUs) and selection of sample housing units within those PSUs. In general, the CPS sample is selected from lists of addresses obtained from the Master Address File (MAF) with updates from the United States Postal Service (USPS) twice a year. The MAF is the Census Bureau's permanent list of addresses, including their geographic locations, for individual living quarters. It is continuously maintained through partnerships with the USPS; with Federal, State, regional, and local agencies; and with the private sector, and it is used as a sample frame by many Census Bureau demographic surveys.

Approximately 72,000 housing units are assigned for interview each month, of which about 60,000 are occupied and thus eligible for interview. The remainder are units found to be destroyed, vacant, converted to nonresidential use, containing persons whose usual place of residence is elsewhere, or ineligible for other reasons. Of the 60,000 occupied housing units, approximately 10 percent are not interviewed in a given month due to temporary absence (vacation, etc.), the residents are not found at home after repeated attempts, inability of persons contacted to respond, unavailability for other reasons, and refusals to cooperate. The interviewed households contain approximately 108,000 persons 15 years old and over, approximately 27,000 children 0-14 years old, and about 450 Armed Forces members living with civilians either on or off base within these households. A more precise explanation regarding the CPS sample design is provided in "Explanatory Notes and Estimates of Error: Household Data - Sampling" in any issue of *Employment and Earnings*.

Relationship of Current Population Survey Files to Publications

Each month, a significant amount of information about the labor force is published by the Bureau of Labor Statistics in the *Employment and Earnings* and *Monthly Labor Review* reports.

As mentioned previously, the CPS also serves as a vehicle for supplemental inquiries on subjects other than employment, which are periodically added to the questionnaire. From the basic and supplemental data, the Bureau of the Census issues three series of publications under the general title Current Population Reports:

- P-20 Population Characteristics
- P-23 Special Studies
- P-60 Consumer Income

All Current Population Reports, including the other series for population estimates and projections and special censuses, may be obtained by subscription from the U.S. Government Printing Office at 202-783-3238. Subscriptions are available as follows: Population Characteristics, Special Studies, and Consumer Income series (P-20, P-23, P-60) combined, \$101 per year (sold as a package only); Population Estimates and Projections, (P-25),

\$27 per year. Single issues may be ordered separately; ordering information and prices are provided in the Bureau of the *Census Catalog and Guide*, the *Monthly Product Announcement* (MPA), and in *Census and You*. Selected reports also may be accessed on the INTERNET at <http://census.gov/library/publications.html>.

Geographic Limitations

The CPS sample was selected so that specific reliability criteria were met nationally, for each of the 50 States and for the District of Columbia. Since 1985, these reliability criteria have been maintained through periodic additions and deletions in the State samples. Estimates formed for geographic areas identified on the microdata file which are smaller than states are not as reliable.

Weights

Under the estimating methods used in the CPS, all of the results for a given month become available simultaneously and are based on returns for the entire panel of respondents. The CPS estimation procedure involves weighting the data from each sample person. The base weight, which is the inverse of the probability of the person being in the sample, is a rough measure of the number of actual persons that the sample person represents. Almost all sample persons in the same state have the same base weight, but the weights across states are different. Selection probabilities may also differ for some sample areas due to field subsampling, which is done when areas selected for the sample contain many more households than expected. The base weights are then adjusted for noninterview, and the ratio estimation procedure is applied.

1. **Noninterview adjustment.** The weights for all interviewed households are adjusted to the extent needed to account for occupied sample households for which no information was obtained because of absence, impassable roads, refusals, or unavailability of the respondent for other reasons. This noninterview adjustment is made separately for clusters of similar sample areas that are usually, but not necessarily, contained within a state. Similarity of sample areas is based on Core-Based Statistical Area (CBSA) status and size. Within each cluster, there is a further breakdown by residence. Each CBSA cluster is split by "principal city" and "balance of the CBSA." The proportion of occupied sample households not interviewed fluctuates around 8 percent depending on weather, vacations, etc.
2. **Ratio estimates.** The distribution of the population selected for the sample may differ somewhat, by chance, from that of the population as a whole in such characteristics as age, race, sex, and state of residence. Because these characteristics are closely correlated with labor force participation and other principal measurements made from the sample, the survey estimates can be substantially improved when weighted appropriately by the known distribution of these population characteristics. This is accomplished through two stages of ratio adjustment as follows:
 - a. *First-stage ratio estimate.* The purpose of the first-stage ratio adjustment is to reduce the contribution to variance that results from selecting a sample of PSUs rather than drawing sample households from every PSU in the nation. This adjustment is made to the CPS weights in two race cells: black and nonblack; it is applied only to PSUs that are nonself-representing and for those states that have a substantial number of black households. The procedure corrects for differences that existed in each state cell at the time of the 2000 census between 1) the race distribution of the population in sample PSUs and 2) the race distribution of all PSUs (both 1 and 2 exclude self-representing PSUs).
 - b. *Second-stage ratio estimate.* This procedure substantially reduces the variability of estimates and corrects, to some extent, for CPS undercoverage. The CPS sample weights are adjusted to ensure that sample-based estimates of population match independent population controls. Three sets of controls are used:
 - 1) 51 state controls of the civilian noninstitutional population 16 years of age and older
 - 2) national civilian noninstitutional population controls for 14 hispanic and 5 nonhispanic age-sex categories
 - 3) national civilian noninstitutional population controls for 66 white, 42 black, and 10 "other" age-sex categories

The independent population controls are prepared by projecting forward the resident population as enumerated on April 1, 2000. The projections are derived by updating demographic census data with information from a variety of other data sources that account for births, deaths, and net migration. Estimated numbers of resident Armed Forces personnel and institutionalized persons reduce the resident population to the civilian noninstitutional population. Estimates of net census undercount, determined from the Post Enumeration Survey, are added to the population projections. Prior to January 2003, the projections were based on earlier censuses, and prior to January 1994, there was no correction for census undercount. A summary of the current procedures used to make population projections is given in "Revisions in the Current Population Survey Effective January 2003" in the January 2003 issue of Employment and Earnings..

Comparability of CPS From Microdata Files With Published Sources

Although total estimates of the total population will equal published estimates, labor force estimates produced from a microdata file may not be directly comparable or identical with the published nonseasonally adjusted labor force data. The official labor force statistics published by the Bureau of Labor Statistics (BLS) are calculated using the CPS composite weight (PWCMPWGT). Anyone wanting to replicate not seasonally adjusted BLS estimates should use this weight. However, not all estimates made from a public use file will match such weighted published estimates. This is because of various steps taken in the creation of CPS public use files to protect the confidentiality of CPS respondents. Top side estimates for most major demographic and economic categories such as age, race, gender and major labor force status will agree with the published totals; however, estimates for small groups/combinations of these characteristics will differ. The same is true for any estimates for any demographic or labor force characteristic not listed above. Such estimates will be similar but not identical.

Another factor also inhibits microdata comparison with published labor force data. This is the seasonal adjustment that is applied to many published statistics. This adjustment is used to adjust for normal seasonal variations to help distinguish the underlying economic situation in month-to-month changes and is not reflected in any of the weights or variables included on the public use files.

Shown below are data from January and July 2015 which demonstrate how estimates compiled using the final weights from the microdata file may differ from the published composited estimates, with and without seasonal adjustment. Note that the composite estimation procedure was not used for estimates published from January 1994 to May 1994. For a further description of both the composite estimator and seasonal adjustment, see the most recent of the CPS Technical Paper (66 or 77).

Comparison of CPS Estimates from Microdata Files with Published Sources

	Civilian Noninstitutional Population	Civilian Labor Force	Employed	Unemployed	Not in Labor Force

January 2015 Data (000's)					
Final Weights	249,723	156,311	146,658	9,653	93,412
Composited (Not Seasonally Adjusted)	249,723	156,050	146,552	9,498	93,674
Composited (Seasonally Adjusted)	249,723	157,180	148,201	8,979	92,544

July 1993 Data (000's)					
Final Weights	250,876	159,112	150,176	8,936	91,764
Composited (Not Seasonally Adjusted)	250,876	158,527	149,722	8,805	92,349
Composited (Seasonally Adjusted)	250,876	157,106	148,840	8,266	93,770

ATTACHMENT 3

OVERVIEW

November 2019: Computer and Internet Use Supplement

General

The November 2019 Computer and Internet Use Supplement was conducted as a supplement to that month's Current Population Survey (CPS). The CPS is a monthly labor force survey conducted in approximately 52,000 interviewed households across the country. Attachment 8 is a facsimile of the document used by the CPS with the November 2019 Computer and Internet Use Supplement questions. See "Overview-Current Population Survey" (Attachment 2) for a description of the CPS; the following describes the November 2019 Computer and Internet Use Supplement questions asked of persons 3 years old and over.

Data Collection

The November 2019 Computer and Internet Use Supplement collected household information from all eligible CPS households, as well as person information from household members 3 years old and over. Proxy responses were allowed. The supplement contained questions about the household's computer and internet use and about the household member's use of the internet from any location in the past year. It also asked about a random respondent's use of the Internet. Interviews were conducted during the period of November 10 - 19, 2019. Interviewers were provided with a two-hour home study for completing the basic CPS labor force exercises, supplement exercises, and a practice interview concerning the supplement.

Data Processing

The data processing involved a consistency edit and allocation module for all computer and internet use supplement items. The consistency edit mainly ensured that the entries within an individual record followed the correct skip pattern. Items with missing values were assigned values, if appropriate. When a response is not obtained for a particular data item, or an inconsistency in reported items is detected, an "imputed" response is entered in the field. Imputation is performed using a "hot deck" method, whereby a response from another sample person with similar demographic and economic characteristics is used for the nonresponse. The imputation procedure is performed one item at a time.

The values and universes for each variable are defined in the supplement record layout (Attachment 7).

November 2019 Computer and Internet Use Supplement Computer File

The November 2019 Computer and Internet Use File consists of two parts: the CPS labor force data and the supplement data.

A. The CPS Labor Force Data

The November 2019 CPS file contains 138,850 records. The first 1,000 characters contain the labor force data for each record. Attachment 6 contains the CPS Basic Items Record Layout, which includes the variable name, character size, location on the record, universe, and the possible values of each basic CPS variable included on the file.

The variable PRPERTYP (located in positions 161-162 on the CPS Basic Items Record Layout) determines the type of person as follows:

PRPERTYP

- 1 = Child household member (0-14 years old)
- 2 = Adult civilian household member (15+ years old)
- 3 = Adult Armed Forces household member (15+ years old)

The variable HRINTSTA (located in positions 57-58 on the CPS Basic Items Record Layout) determines the interview status of the household.

HRINTSTA

- 1 = Interview
- 2 = Type A Noninterview (These records represent households that were eligible for the August CPS interview but were not interviewed because no one was home, household members were temporarily absent, etc.)
- 3 = Type B Noninterview (These records represent sample addresses determined to be ineligible for the CPS by virtue of being vacant, demolished, nonresidential, etc.)
- 4 = Type C Noninterview (See explanation for Type B above)

By combining the values of PRPERTYP (1-3) and HRINTSTA (2-4), the number of records can be determined.

The values of PRPERTYP are:

Unweighted Counts

1 = Child	20,747
2 = Adult Civilian, 15+	96,927
3 = Adult, Armed Forces	423

The values of HRINTSTA are:

1 = Interview	49,528
2 = Type A Noninterview	10,179
3 = Type B Noninterview	10,020
4 = Type C Noninterview	554

B. November 2019 Computer and Internet Use Supplement Data

The November supplement data are in locations 1001-1236. (See Attachment 7)

C. Tallying the November 2019 Supplement File

The November 2019 supplement universe consists of the CPS sample for all households and for civilian persons age 3 and over.

D. Weighting

The November 2019 Computer and Internet Use supplement is a fully allocated supplement. The basic CPS person (PWSSWGT) and household (HWHHWGT) weights may be used to tally the supplement.

There is, however, a weight associated with the random respondent questions. This weight, PWPRMWGT, should be used with the random respondent questions which include PEEMAIL through PEHOMIOT. This weight must be used when tallying these supplement questions.

Attachment 13 is a tally listing of unweighted counts from selected supplement items. Use these totals to ensure that the file is being accessed properly.

E. Data Contact

For questions regarding the November 2019 supplement data, call the CPS Branch on (301) 763-3806.

ATTACHMENT 4

GLOSSARY

Current Population Survey

Age—Age classification is based on the age of the person at his/her last birthday. The adult universe (i.e., population of marriageable age) is comprised of persons 15 years and over for CPS labor force data.

Allocation Flag—Each edited item has a corresponding allocation flag indicating the nature of the edit. See the attachment on allocation flags for more information. The second character of the item name is always "X".

Armed Forces—Demographic information for Armed Forces members (enumerated in off-base housing or on-base with their families) is included on the CPS data files. No labor force information is collected of Armed Forces members in any month. In March, supplemental data on income are included for Armed Forces members. This is the only month that non-demographic information is included for Armed Forces members.

Civilian Labor Force—(See Labor Force.)

Class of Worker—This refers to the broad classification of the person's employer. These broad classifications for current jobs are:

- 1) Federal government
- 2) State government
- 3) Local government
- 4) Private industry (including self-employed, incorporated)
- 5) Self-employed (not incorporated)
- 6) Working without pay

Domain—The domain for an item is a list or range of its possible values. Note that all unedited items have possible values of -1 (blank), -2 (don't know), and -3 (refused). Since all items have these possible values, they are not shown as valid entries for each item.

Duration of Unemployment—Duration of unemployment represents the length of time (through the current survey week) during which persons classified as unemployed are continuously looking for work. For persons on layoff, duration of unemployment represents the number of full weeks since the termination of their most recent employment. A period of two weeks or more during which a person is employed or ceased looking for work is considered to break the continuity of the present period of seeking work.

Earners, Number of—The file includes all persons 15 years old and over in the household with \$1 or more in wages and salaries, or \$1 or more of a loss in net income from farm or nonfarm self-employment during the preceding year.

Edited item—An edited item is allocated or imputed by the processing system. In most cases this means allocating a value where the unedited item contains a value of blank, "don't know", or "refused". The second character of the item name is always "E".

An edited version of an item exists only if that item is processed through the edits. If the edits never deal with a particular item, then that item only has an unedited version.

Since the instrument enforces skip patterns and consistency between many items, the edits are left mainly with the job of allocating missing values. Also, since an interviewer is allowed to "back up" in the interview, there may be "off-path" items filled in the unedited data. The edits also blank these off-path items if an edited version of the items exists.

Education—(See Level of School Completed.)

Employed—(See Labor Force.)

Family—A family is a group of two persons or more (one of whom is the householder) residing together and related by birth, marriage, or adoption. All such persons (including related subfamily members) are considered as members of one family. Beginning with the 1980 CPS, unrelated subfamilies (referred to in the past as secondary families) are no longer included in the count of families, nor are the members of unrelated subfamilies included in the count of family members.

Family Household—A family household is a household maintained by a family (as defined above), and may include among the household members any unrelated persons (unrelated subfamily members and/or secondary individuals) who may be residing there. The number of family households is equal to the number of families. The count of family household members differs from the count of family members, however, in that the family household members include all persons living in the household, whereas family members include only the householder and his/her relatives. (See the definition of Family).

Family Weight—This weight is used only for tallying family characteristics. In March, the weight on the family record is the March supplement weight of the householder or reference person.

Final Weight—Used in tabulating labor force items in all months, including March. The final weight is controlled to independent estimates for:

- 1) States
- 2) Origin, Sex, and Age
- 3) Age, Race, and Sex

This weight should not be used when tabulating March supplement data.

Full-Time Worker—Persons on full-time schedules include persons working 35 hours or more, persons who worked 1-34 hours for noneconomic reasons (e.g., illness) and usually work full-time, and persons "with a job but not at work" who usually work full-time.

Group Quarters—Group quarters are noninstitutional living arrangements for groups not living in conventional housing units or groups living in housing units containing nine or more persons unrelated to the person in charge.

Head Versus Householder—Beginning with the March 1980 CPS, the Bureau of the Census discontinued the use of the terms "head of household" and "head of family." Instead, the terms "householder" and "family householder" are used.

Highest Grade of School Attended—(See Level of School Completed.)

Hispanic/Non-Hispanic Origin—A person's Hispanic/Non-Hispanic status in this file is determined on the basis of a question that simply asks "(Is/Are) (Name/you) Hispanic?"

Hours of Work—Hours of work statistics relate to the actual number of hours worked during the survey week. For example, a person who normally works 40 hours a week but who is off on the Veterans Day holiday is reported as working 32 hours even though he is paid for the holiday.

For persons working in more than one job, the figures related to the number of hours worked in all jobs during the week. However, all the hours are credited to the major job.

Household—A household consists of all the persons who occupy a house, an apartment, or other group of rooms, or a room, which constitutes a housing unit. A group of rooms or a single room is regarded as a housing unit when it is occupied as separate living quarters; that is, when the occupants do not live with any other person in the structure, and when there is direct access from the outside or through a common hall. The count of households excludes persons living in group quarters, such as military barracks and institutions. Inmates of institutions (mental hospitals, rest homes, correctional institutions, etc.) are not included in the survey.

Household Weight—The household weight is used for tallying household characteristics. In March, the household weight is the March Supplement weight of the householder.

Householder—The householder refers to the person (or one of the persons) in whose name the housing unit is owned or rented (maintained) or, if there is no such person, any adult member, excluding roomers, boarders, or paid employees. If the house is owned or rented jointly by a married couple, the householder may be either the husband or the wife. The person designated as the householder is the "reference person" to whom the relationship of all other household members, if any, is recorded.

Householder With No Other Relatives in Household—A householder who has no relatives living in the household. This is the entry for a person living alone. Another example is the designated householder of an apartment shared by two or more unrelated individuals.

Householder With Other Relatives (Including Spouse) in Household—The person designated as householder if he/she has one or more relatives (including spouse) living in the household.

Industry, Occupation, and Class of Worker (I&O)—Current Job (basic data)—For the employed, current job is the job held in the reference week (the week before the survey). Persons with two or more jobs are classified in the job at which they worked the most hours during the reference week. The unemployed are classified according to their latest full-time job lasting two or more weeks or by the job (either full-time or part-time). The I & O questions are also asked of persons not in the labor force who are in the fourth and eighth months in sample and who have worked in the last five years.

Job Seekers—All unemployed persons who made specific efforts to find a job sometime during the 4-week period preceding the survey week.

Longitudinal Weight—Used for gross flows analysis. Only found on adult records matched from month to month.

PEMLR (Major Labor Force Recode)—This classification is available for each civilian 15 years old and over according to his/her responses to the monthly (basic) labor force items.

Labor Force—Persons are classified as in the labor force if they are employed, unemployed, or in the Armed Forces during the survey week. The "civilian labor force" includes all civilians classified as employed or unemployed. The file includes labor force data for civilians age 15 and over. However, the official definition of the civilian labor force is age 16 and over.

1. *Employed*

Employed persons comprise (1) all civilians who, during the survey week, do any work at all as paid employees or in their own business or profession, or on their own farm, or who work 15 hours or more as unpaid workers on a farm in a business operated by a member of the family; and (2) all those who have jobs but who are not working because of illness, bad weather, vacation, or labor-management dispute, or because they are taking time off for personal reasons, whether or not they are seeking other jobs. These persons would have a Monthly Labor Force Recode (MLR) of 1 or 2 respectively in characters 180-181 of the person record which designates "at work" and "with a job, but not at work." Each employed person is counted only once. Those persons who held more than one job are counted in the job at which they worked the greatest number of hours during the survey week. If they worked an equal number of hours at more than one job, they are counted at the job they held the longest.

2. *Unemployed*

Unemployed persons are those civilians who, during the survey week, have no employment but are available for work, and (1) have engaged in any specific job seeking activity within the past 4 weeks such as registering at a public or private employment office, meeting with prospective employers, checking with friends or relatives, placing or answering advertisements, writing letters of application, or being on a union or professional register; (2) are waiting to be called back to a job from which they had been laid off; or (3) are waiting to report to a new wage or salary job within 30 days. These persons would have an MLR code of 3 or 4 in characters 180-181 of the person record. The unemployed includes job leavers, job losers, new job entrants, and job reentrants.

a. *Job Leavers*

Persons who quit or otherwise terminate their employment voluntarily and immediately begin looking for work.

b. *Job Losers*

Persons whose employment ends involuntarily, who immediately begin looking for work, and those persons who are already on layoff.

c. *New Job Entrants*

Persons who never worked at a full-time job lasting two weeks or longer.

d. *Job Reentrants*

Persons who previously worked at a full-time job lasting two weeks or longer but are out of the labor force prior to beginning to look for work.

Finally, it should be noted that the unemployment rate represents the number of persons unemployed as a percent of the civilian labor force 16 years old and over. This measure can also be computed for groups within the labor force classified by sex, age, marital status, race, etc. The job loser, job leaver, reentrant, and new entrant rates are each calculated as a percent of the civilian labor force 16 years old and over; the sum of the rates for the four groups thus equals the total unemployment rate.

3. *Not in Labor Force*

All civilians 15 years old and over who are not classified as employed or unemployed. These persons are further classified by major activity: retired, unable to work because of long-term physical or mental illness, and other. The "other" group includes, for the most part, students and persons keeping house. Persons who report doing unpaid work in a family farm or business for less than 15 hours are also classified as not in the labor force.

For persons not in the labor force, data on previous work experience, intentions to seek work again, desire for a job at the time of interview, and reasons for not looking for work are asked only in those households that are in the fourth and eighth months of the sample, i.e., the "outgoing" groups, those which had been in the sample for three previous months and would not be in for the subsequent month.

Persons classified as NILF have an MLR code of 5-7 in characters 180-181 of the person record.

Layoff—A person who is unemployed but expects to be called back to a specific job. If he/she expects to be called back within 30 days, it is considered a temporary layoff; otherwise, it is an indefinite layoff.

Level of School Completed/Degree Received—These data changed beginning with the January 1992 file. A new question, "What is the highest level of school ... has completed or the highest degree ... has received?" replaced the old "Highest grade attended" and "Year completed" questions. The new question provides more accurate data on the degree status of college students. Educational attainment applies only to progress in "regular" school. Such schools include graded public, private, and parochial elementary and high schools (both junior and senior high), colleges, universities, and professional schools, whether day schools or night schools. Thus, regular schooling is that which may advance a person toward an elementary school certificate or high school diploma, or a college, university, or professional school degree. Schooling in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system.

Looking for Work—A person who is trying to get work or trying to establish a business or profession.

Marital Status—The marital status classification identifies four major categories: single (never married), married, widowed, and divorced. These terms refer to the marital status at the time of enumeration.

The category "married" is further divided into "married, civilian spouse present," "married, Armed Force spouse present," "married, spouse absent," "married, Armed Force spouse absent," and "separated." A person is classified as "married, spouse present" if the husband or wife is reported as a member of the household even though he or she may be temporarily absent on business or on vacation, visiting, in a hospital, etc., at the time of the enumeration. Persons reported as "separated" included those with legal separations, those living apart with intentions of obtaining a divorce, and other persons permanently or temporarily estranged from their spouses because of marital discord.

For the purpose of this file, the group "other marital status" includes "widowed and divorced," "separated," and "other married, spouse absent."

Month-In-Sample—The term is defined as the number of times a unit is interviewed. Each unit is interviewed eight times during the life of the sample.

Never Worked—A person who has never held a full-time civilian job lasting two consecutive weeks or more.

Nonfamily Householder—A nonfamily householder (formerly called a primary individual) is a person maintaining a household while living alone or with nonrelatives only.

Nonworker—A person who does not do any work in the calendar year preceding the survey.

Nonrelative of Householder With No Own Relatives in Household—A nonrelative of the householder who has no relative(s) of his own in the household. This category includes such nonrelatives as a foster child, a ward, a lodger, a servant, or a hired hand, who has no relatives of his own living with him in the household.

Nonrelative of Householder With Own Relatives (Including Spouse) in Household—Any household member who is not related to the householder but has relatives of his own in the household; for example, a lodger, his spouse, and their son.

Other Relative of Householder—Any relative of the householder other than his spouse or child; for example, father, mother, grandson, daughter-in-law, etc.

Out Variable—An instrument-created item that stores the results of another item.

Own Child—A child related by birth, marriage, or adoption to the family householder.

Part-Time, Economic Reasons—The item includes slack work, material shortages, repairs to plant or equipment, start or termination of job during the week, and inability to find full-time work. (See also Full-Time Worker.)

Part-Time, Other Reasons—The item includes labor dispute, bad weather, own illness, vacation, demands of home housework, school, no desire for full-time work, and full-time worker only during peak season.

Part-Time Work—Persons who work between 1 and 34 hours are designated as working "part-time" in the current job held during the reference week. For the March supplement, a person is classified as having worked part-time during the preceding calendar year if he worked less than 35 hours per week in a majority of the weeks in which he worked during the year. Conversely, he is classified as having worked full-time if he worked 35 hours or more per week during a majority of the weeks in which he worked.

Part-Year Work—Part-year work is classified as less than 50 weeks' work.

Population Coverage—Population coverage includes the civilian population of the United States plus approximately one million members of the Armed Forces in the United States living off post or with their families on post but excludes all other members of the Armed Forces. This file excludes inmates of institutions. The labor force and work experience data are not collected for Armed Forces members.

Processing Recode—An item calculated by the processing system from a combination of other items in the database. The second character of the item name is always "R".

Race—The population is divided into six groups on the basis of race: White, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian or Other Pacific Islander, and Other races. The 2011 CPS uses the Census 2010 question on race that allows for more than one race reporting, but does not include the Census 2010 "Some Other Race" category.

Reentrants—Persons who previously worked at a full-time job lasting two weeks or longer, but who are out of the labor force prior to beginning to look for work.

Related Children—Related children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption. For each type of family unit identified in the CPS, the count of own children under 18 years old is limited to single (never married) children; however, "own children under 25" and "own children of any age," include all children regardless of marital status. The totals include never-married children living away from home in college dormitories.

Related Subfamily—A related subfamily is a married couple with or without children, or one parent with one or more own single (never married) children under 18 years old, living in a household and related to, but not including, the householder or spouse. The most common example of a related subfamily is a young married couple sharing the home of the husband's or wife's parents. The number of related subfamilies is not included in the number of families.

School, Major Activity—A person who spent most of his time during the survey week attending any kind of public or private school, including trade or vocational schools in which students receive no compensation in money or kind.

Secondary Individual—A secondary individual is a person in a household or group quarters such as a guest, roomer, boarder, or resident employee (excluding nonfamily households and inmates of institutions) who is not related to any other person in the household or group quarters.

Self-Employed—Self-employed persons are those who work for profit or fees in their own business, profession or trade, or operate a farm.

Stretches of Unemployment—A continuous stretch is one that is not interrupted by the person getting a job or leaving the labor market to go to school, to keep house, etc. A period of two weeks or more during which a person is employed or ceased looking for work is considered to break the continuity of the period of seeking work.

Unable to Work—A person is classified as unable to work because of long-term physical or mental illness, lasting six months or longer.

Unedited item—An item that is produced by the computer automated instrument, either collected during the interview or created by the instrument. The second character of the item name is always "U".

Unemployed—(See Labor Force.)

Unpaid Family Workers—Unpaid family workers are persons working without pay for 15 hours a week or more on a farm or in a business operated by a member of the household to whom they are related by birth or marriage.

Unrelated Individuals—Unrelated individuals are persons of any age (other than inmates of institutions) who are not living with any relatives. An unrelated individual may be (1) a nonfamily householder living alone or with nonrelatives only, (2) a roomer, boarder, or resident employee with no relatives in the household, or (3) a group quarters member who has no relatives living with him/her. Thus, a widow who occupies her house alone or with one or more other persons not related to her, a roomer not related to anyone else in the housing unit, a maid living as a member of her employer's household but with no relatives in the household, and a resident staff member in a hospital living apart from any relatives are all examples of unrelated individuals.

Unrelated Subfamily—An unrelated subfamily is a family that does not include among its members the householder and relatives of the householder. Members of unrelated subfamilies may include persons such as guests, roomers, boarders, or resident employees and their relatives living in a household. The number of unrelated subfamily members is included in the number of household members but is not included in the count of family members.

Persons living with relatives in group quarters were formerly considered as members of families. However, the number of such unrelated subfamilies became so small (37,000 in 1967) that beginning with the data for 1968 (and beginning with the census data for 1960) the Bureau of the Census includes persons in these unrelated subfamilies in the count of secondary individuals.

Veteran Status—If a person served at any time during the four most recent wartime periods, the codes for all periods of service are entered. A person can report up to 4 periods of service. The following codes are used:

- 0 Children under 15
- 1 September 2001 or later
- 2 August 1990 to August 2001
- 3 May 1975 to July 1990
- 4 Vietnam era (Aug 1964 to Apr 1975)
- 5 February 1955 to July 1964
- 6 Korean War (July 1950 to January 1955)
- 7 January 1947 to June 1950
- 8 World War II (December 1941 to December 1946)
- 9 November 1941 or earlier

Wage and Salary Workers—Wage and salary workers receive wages, salary, commission, tips, or pay in kind from a private employer or from a governmental unit. Also included are persons who are self-employed in an incorporated business.

Workers—(See Labor Force--Employed.)

Work Experience—Includes those persons who during the preceding calendar year did any work for pay or profit or worked without pay on a family-operated farm or business at any time during the year, on a part-time or full-time basis.

Year-Round Full-Time Worker—A year-round full-time worker is one who usually worked 35 hours or more per week for 50 weeks or more during the preceding calendar year.

ATTACHMENT 5

HOW TO USE THE RECORD LAYOUT

Data users familiar with the CPS data files in prior years will see many similarities between the format of this file and those files released before January 1994. As in the past, there are numeric locations on the file which correspond to each variable. There is only one record layout which contains the variables for children, adults, and armed forces members. In prior years, each type of person had a separate record layout.

Item Naming Conventions

∅ The first character of each variable name is one of the following:

H - Household item

G - Geography item

* P - Person item (includes adult items, child items, and armed forces items)

* There is no need to distinguish adult, child, and armed forces items in the variable names in the new system. The recode **PRPERTYP** (located in positions 161-162) tells you what category the person is in.

∅ The second character of each variable name is one of the following:

E - Edited item

U - Unedited item

X - Allocation flag (see Attachment 15 for more information)

W - Weight

R - Recode

∅ The remaining characters describe the variable.

∅ For multiple entry items, the file contains a separate variable for each possible response. Each item has the same descriptive name but a number is added as the last digit. For example, Question 22A allows separate entries for up to 6 job search methods. The item names are **PELKM1** (this item is edited), **PULKM2**, (this item is unedited), **PULKM3**, etc. These items are located in positions 296-307 of the record layout.

EDITED UNIVERSE:

HEINTRAV = 1, 2

VALID ENTRIES:

1 Yes

2 No

PEINLICO

2

Who uses the Internet at a library, community center, park, or other public place?

1047-1048

EDITED UNIVERSE:

HEINLICO = 1

VALID ENTRIES:

1 Yes

2 No

HEINELHO

2

What about at someone else's home? (Do you/Does anyone in this household) use the

1049-1050

Internet at someone else's home?

EDITED UNIVERSE:

HEINLICO = 1, 2

VALID ENTRIES:

1 Yes

2 No

PEINELHO 2 Who uses the Internet at someone else's home? 1051-1052

EDITED UNIVERSE:

HEINELHO = 1

VALID ENTRIES:

1 Yes

2 No

HEINOTHR 2 (Do you/Does anyone in this household) use the Internet at some other location we haven't covered yet? 1053-1054

EDITED UNIVERSE:

HEINELHO = 1, 2

VALID ENTRIES:

1 Yes

2 No

PEINOTHR 2 Who uses the Internet at some other location we haven't covered? 1055-1056

EDITED UNIVERSE:

HEINOTHR = 1

VALID ENTRIES:

1 Yes

2 No

HENETCHK 2 Based on your responses, it sounds like (fill NAMES where all INHOME, INWORK, INCAFE, INTRAV, INLICO, INELHO, INOTHR = 2) do not use the Internet. Did we miss anyone in your household who uses the Internet from any location, and for any purpose? 1057-1058

VALID ENTRIES:

- 1 Yes
- 2 No
- 2 Don't Know
- 3 Refused

PENETCK2 2 Who uses the Internet from any location, and for any purpose? 1059-1060

EDITED UNIVERSE:

HENETCHK = 1 and more than one person displayed in HENETCHK.

VALID ENTRIES:

- 1 Person uses the Internet
- 2 Person does not use the Internet

HEMOBDAT 2 (Do you/Does anyone in this household) access the Internet using a data plan for a cell phone, smartphone, tablet, mobile hotspot, or other device? This type of Internet service is provided by a wireless carrier, and may be part of a package that also includes voice calls from a cell phone or smartphone. 1061-1062

EDITED UNIVERSE:

Any IN*[1-16] = 1 (anyone goes online anywhere) OR HENETCHK = 1 for any line number.

VALID ENTRIES:

- 1 Yes
- 2 No

HEHMINT1 2 In addition to your household's mobile Internet service or data plan, we are interested in whether your household also uses any other type of Internet service when at home. 1063-1064

EDITED UNIVERSE:

HEMOBDAT = 1 AND HEINHOME = 1

VALID ENTRIES:

- 1 Continue

HEHMINT2 2 You mentioned that someone in this household uses the Internet at home. 1065-1066

EDITED UNIVERSE:

HEMOBDAT = 2 AND ANY HEINHOME = 1

VALID ENTRIES:

1 Continue

HEHOMSU 2 Thinking about the company or organization that provides your home Internet service, who provides your Internet service? 1067-1068

EDITED UNIVERSE:

HEHOMTE1 OR HEHOMETE2 OR HEHOMETE3
OR HEHOMTE4 = 1-5 AND
ANY HEINHOME = 1

VALID ENTRIES:

1 Internet service is provided by a company that sells Internet service, such as a cable or phone company.

2 Internet service is provided by a nonprofit organization, public agency, or cooperative that sells Internet service.

3 Internet service is provided for the entire apartment building, condominium, campus, or other community and included in housing costs.

4 Internet service is publicly available and provided at no charge.

5 Internet service is provided through some other method.

HEHOMTE1 2 I am going to read a list of ways that people access the Internet from their homes, other than a mobile data plan. At home, (do you/ does anyone in this household) access the Internet using:
High-speed Internet service installed at home, such as cable, DSL, or fiber optic service? 1069-1070

EDITED UNIVERSE:

Any PEINHOME = 1 and HEMOBDAT = 1 or 2

VALID ENTRIES:

1 Yes

2 No

HEHOMTE2 2 1071-1072

I am going to read a list of ways that people access the Internet from their homes, other than a mobile data plan. At home, (do you/ does anyone in this household) access the Internet using:
Satellite Internet service?

EDITED UNIVERSE:

Any PEINHOME = 1 and HEMOBDAT = 1 or 2

VALID ENTRIES:

1 Yes

2 No

HEHOMTE3 2 1073-1074

I am going to read a list of ways that people access the Internet from their homes, other than a mobile data plan. At home, (do you/ does anyone in this household) access the Internet using:
Dial-up service?

EDITED UNIVERSE:

Any PEINHOME = 1 and HEMOBDAT = 1 or 2

VALID ENTRIES:

1 Yes

2 No

HEHOMTE4 2 1075-1076

I am going to read a list of ways that people access the Internet from their homes, other than a mobile data plan. At home, (do you/ does anyone in this household) access the Internet using:
Some other service?

EDITED UNIVERSE:

Any PEINHOME = 1 and HEMOBDAT = 1 or 2

VALID ENTRIES:

1 Yes

2 No

HEPECOMP 2 1077-1078

To the best of your knowledge, are there (other /any) cable or phone companies or organizations where you live that would offer high-speed Internet service installed in your home, such as cable, DSL, or

fiber-optic service?

EDITED UNIVERSE:

HEHOMSU = 1-5 AND any PEINHOM = 1

VALID ENTRIES:

1 Yes

2 No

PEEMAIL 2 (Do you/Does NAME) use email? 1079-1080

EDITED UNIVERSE:

ANY PEIN* = 1 AND PRTAGE = 15+
AND PUELGFLG = 20

VALID ENTRIES:

1 Yes

2 No

PETEXTIM 2 What about texting or instant messaging? (Do you/Does NAME) text or use instant messaging? 1081-1082

EDITED UNIVERSE:

PEEMAIL = 1, 2

VALID ENTRIES:

1 Yes

2 No

PESOCIAL 2 What about using social networks, such as Facebook, Twitter, or Instagram? (Do you/Does NAME) use social networks? 1083-1084

EDITED UNIVERSE:

PETEXTIM = 1, 2

VALID ENTRIES:

1 Yes

2 No

PECONFER 2 In the past six months, (have/has) (you/NAME) participated in video or voice calls or conferencing over the Internet, such as with SKYPE or Face Time? (Do you/Does NAME) participate in video or voice calls or conferencing? 1085-1086

EDITED UNIVERSE:

PESOCIAL = 1, 2

VALID ENTRIES:

1 Yes

2 No

PEVIDEO 2 What about streaming or watching videos?
(Do you/Does NAME) watch videos over the
Internet? Examples include You Tube and
Netflix. 1087-1088

VALID ENTRIES:

1 Yes

2 No

PEAUDIO 2 What about streaming or downloading music,
radio programs, or podcasts? (Do you/
Does NAME) stream or download music,
radio programs, or podcasts? 1089-1090

EDITED UNIVERSE:

PEVIDEO = 1, 2

VALID ENTRIES:

1 Yes

2 No

PEPUBLISH 2 What about posting or uploading blog posts,
original videos, or other content that
(you/NAME) created? Do not include photos
or videos taken for personal use and
shared to social media. (Do you/Does
NAME) publish or upload original content
that (you/NAME) created for the Internet? 1091-1092

EDITED UNIVERSE:

PEAUDIO = 1, 2

VALID ENTRIES:

1 Yes

2 No

PETELEWK 2 (Do you/Does NAME) use the Internet to
telecommute or work while away from
(your/his/her) usual workplace, such as
working from home? 1093-1094

EDITED UNIVERSE:

PEMLR = 1, 2 AND PUELGFLG = 20
AND PEPUBLISH = 1, 2

VALID ENTRIES:

1 Yes
2 No

PEJOBSCH 2 In the past six months, (have you/has NAME) used the Internet to search or apply for a job? (Do you/Does NAME) use the Internet to search or apply for a job? 1095-1096

EDITED UNIVERSE:

PEPUBLISH = 1, 2

VALID ENTRIES:

1 Yes
2 No

PEEDTRAI 2 What about online classes or job training? (Do you/Does NAME) use the Internet for educational classes or job training? 1097-1098

EDITED UNIVERSE:

PEJOBSCH = 1, 2

VALID ENTRIES:

1 Yes
2 No

PEUSESVC 2 What about requesting services provided by other people, for example hailing a ride using Uber or Lyft, reserving a room through Airbnb, or requesting a home repair through Angie's List? (Do you/Does NAME) use the Internet to request services provided by other people? 1099-1100

EDITED UNIVERSE:

PEEDTRAI = 1, 2

VALID ENTRIES:

1 Yes
2 No

PEESRVCS	2	<p>What about offering (your/his/her) own services for sale via the Internet? Examples include offering rentals on Airbnb and driving for Uber or Lyft. Do not include any goods or possessions sold online, such as clothing, shoes, or crafts. (Do you/Does NAME) offer (your/his/her) own services for sale via the Internet?</p> <p>EDITED UNIVERSE:</p> <p>PEUSESVC = 1, 2</p> <p>VALID ENTRIES:</p> <p>1 Yes 2 No</p>	1101-1102

PEEGOODS = 1, 2

VALID ENTRIES:

1 Yes

2 No

PEHOMIOT 2 What about interacting with household equipment or appliances that are connected to the Internet, such as a connected thermostat, light bulb, or security system? (Do you/Does NAME) use the Internet to interact with household equipment or appliances? 1109-1110

EDITED UNIVERSE:

PEFINANC = 1, 2

VALID ENTRIES:

1 Yes

2 No

HEMEDDOC 2 (Do/Does) (you/anyone in this household, including you,) communicate with a doctor or other health professional using the Internet? 1111-1112

EDITED UNIVERSE:

Any PEIN*[1-16] = 1

VALID ENTRIES:

1 Yes

2 No

HEMEDREC 2 What about accessing health records or health insurance records online? (Do you/Does anyone in this household) access health records or health insurance records online? 1113-1114

EDITED UNIVERSE:

HEMEDDOC = 1, 2

VALID ENTRIES:

1 Yes

2 No

HEMEDINF 2 (Do you/Does anyone in this household) research health information online, such 1115-1116

as with WebMD or similar services?

EDITED UNIVERSE:

HEMEDREC = 1, 2

VALID ENTRIES:

1 Yes

2 No

HEMEDMON 2

(Do you/Does anyone in this household) use an electronic health monitoring service that collects and sends data to your doctor or health care provider through the Internet? Examples include connected devices that monitor vital statistics, blood glucose levels, or blood pressure.

1117-1118

EDITED UNIVERSE:

HEMEDINF = 1, 2

VALID ENTRIES:

1 Yes

2 No

HEPSPRE1 2

During the past year, have concerns about privacy or security stopped (you/anyone in this household) from doing any of these activities online:

Conducting financial transactions such as banking, investing, or paying bills online?

1119-1120

EDITED UNIVERSE:

PEMEDMON = 1, 2 OR

ANY PEIN* = 1

VALID ENTRIES:

1 Yes

2 No

HEPSPRE2 2

During the past year, have concerns about privacy or security stopped (you/anyone in this household) from doing any of these activities online:

Buying goods or services online?

1121-1122

EDITED UNIVERSE:

HEPSPRE1 = 1, 2

VALID ENTRIES:

- 1 Yes
- 2 No

HEPSPRE3 2

During the past year, have concerns about privacy or security stopped (you/anyone in this household) from doing any of these activities online:
Posting photos, status updates, or other information on social networks?

1123-1124

EDITED UNIVERSE:

HEPSPRE2 = 1, 2

VALID ENTRIES:

- 1 Yes
- 2 No

HEPSPRE4 2

During the past year, have concerns about privacy or security stopped (you/anyone in this household) from doing any of these activities online:
Expressing an opinion on a controversial or political issue on a blog or social network, or in a forum, email or any other venue?

1125-1126

EDITED UNIVERSE:

HEPSPRE3 = 1, 2

VALID ENTRIES:

- 1 Yes
- 2 No

HEPSPRE5 2

During the past year, have concerns about privacy or security stopped (you/anyone in this household) from doing any of these activities online:
Searching for information using a platform such as Google Search, Yahoo Search, Microsoft Bing, or another web search engine?

1127-1128

EDITED UNIVERSE:

HEPSPRE4 = 1, 2

VALID ENTRIES:

- 1 Yes

		2 No	
HEPSCON1	2	Overall, what concerns (you/members of this household) the most when it comes to online privacy and security risks? Identity theft	1129-1130

SUPPLEMENT QUESTIONNAIRE

November 2019 CPS Computer and Internet Use Supplement

PRESUP This month we are asking some additional questions about the Internet, computers, mobile phones, tablets, and other Internet-connected devices. First, we will ask what types of computers and other devices [you/members of your household] currently use. Please focus on devices [you/members of your household] currently have access to, and have used at least occasionally during the past six months. We are interested in devices used at any location, whether at home, work, school, a library, or anywhere else.

Press (1) to Continue

DESKTP (Do you/Does anyone in this household, including you,) use a desktop computer?
A desktop is a personal computer that is too large or heavy to be frequently moved from place to place.

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

DESKTPW (Do you/Does anyone in this household, including you,) use a desktop computer?

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

LAPTOP What about a laptop or notebook?
(Do you/Does anyone in this household) use a laptop or notebook computer?

- A laptop, sometimes known as a notebook, is a personal computer that is portable and includes a built-in keyboard and screen.

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

LAPTOPW (Do you/Does anyone in this household) use a laptop or notebook computer?

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

TABLET What about a tablet or e-book reader, such as an iPad or Kindle?
(Do you/Does anyone in this household) use a tablet or e-book reader?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

TABLETW (Do you/Does anyone in this household) use a tablet or e-book reader?

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

MPHONE What about a smartphone, or a cell phone that connects to the Internet?
(Do you/Does anyone in this household) use a smartphone?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

MPHONNEW (Do you/Does anyone in this household) use a smartphone, or a cell phone that connects to the Internet?

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

WEARAB (Do you/Does anyone in this household) use a wearable device that is connected to the Internet, such as a smart watch or fitness band? Examples include an Apple Watch or Fitbit.

- (1) Yes
- (2) No

Blind (D) Don't Know

Blind (R) Refused

WEARABW (Do you/Does anyone in this household) use a wearable device that is connected to the Internet, such as a smart watch or fitness band? Examples include an Apple Watch or a Fitbit.

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

TVBOX (Do you/Does anyone in this household) use a smart TV, a game or video system, or another device that connects to the Internet and plays through a TV? Examples include an Xbox, Apple TV, PlayStation, ROKU, or a Blu-Ray player that can access the Internet.

- (1) Yes
- (2) No

Blind (D) Don't Know

Blind (R) Refused

TVBOXW (Do you/Does anyone in this household) use a smart TV, a game or video system, or another device that connects to the Internet and plays through a TV? Examples include an Xbox, Apple TV, PlayStation, Roku, or a Blu-Ray player that can access the Internet.

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

INTINT Next, we will ask where [you/members of your household] currently use the Internet. Please focus on places where [you/members of your household] have used the Internet at least occasionally during the past six months. People can use the Internet in many places, such as at work, school, or a library. Internet use includes a wide variety of activities, from checking email or browsing the Web to watching videos or using mobile apps. We are interested in all forms of Internet use on all devices, including the ones we just discussed.

Press (1) to Continue

INHOME (Do you/Does anyone in this household, including you,) use the Internet at home? This includes accessing the Internet with a cell phone, computer, tablet, or other device.

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

INHOMEW (Do you/Does anyone in this household, including you,) use the Internet at home?
This includes accessing the Internet with a cell phone, computer, tablet, or other device.

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

INWORK What about at work?
(Do you/Does anyone in this household) use the Internet at work?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

INWORKW (Do you/Does anyone in this household) use the Internet at work?

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

INSCHL What about at school? (Do you/Does anyone in this household) use the Internet at school? Please count students only, and do not include online classes.

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

INSCHLW (Do you/Does anyone in this household) use the Internet at school? Please count students only, and do not include online classes.

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

INCAFE What about at a coffee shop or other business that offers Internet access? (Do you/Does anyone in this household) use the Internet while at a coffee shop or other business that offers Internet access?

- (1) Yes

- (2) No

Blind (D) Don't Know
Blind (R) Refused

INELHOW What about at someone else's home? (Do you/Does anyone in this household) use the Internet at someone else's home?

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

INOTHR (Do you/Does anyone in this household) use the Internet at some other location we haven't covered?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

INOTHRW (Do you/Does anyone in this household) use the Internet at some other location we haven't covered?

Who is that?

- Enter all that apply, separate with commas.
- Probe: Anyone else?

NETCHK Based on your responses, it sounds like *(fill Names where all INHOMEW AND INSCHLW AND INCAFEW AND INTRAVW AND INLICOW AND INELHOW AND INOTHRW = 2, D, R, AND INWORKW = 2,D,R OR EMPTY)* (does/do) not use the Internet. (Does/Do) (he/she/these people in your household) use the Internet from any location, and for any purpose?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

NETCK2 Who uses the Internet from any location, and for any purpose?

ENTER (0) for No One.

- Enter all that apply, separate with commas.
- Probe: Anyone else?

TCHINT Next, we are interested in learning about the specific technologies households use to go online. Please focus on how your household as a whole connects to the Internet.

ENTER (1) TO CONTINUE

MOBDAT (Do you/Does anyone in this household) access the Internet using a data plan for a cell phone, smartphone, tablet, mobile hotspot, or other device? This type of Internet service is provided by a wireless carrier, and may be part of a package that also includes voice calls from a cell phone or smartphone.

(1) Yes

(2) No

Blind (D) Don't Know

Blind (R) Refused

HMINT1 In addition to (your/your household's) mobile Internet service or data plan, we are interested in whether (you/your household) also (use/uses) any other type of Internet service when at home.

ENTER (1) TO CONTINUE

HMINT2 You mentioned that (you/someone in this household/members of this household) (use/uses) the Internet at home.

ENTER (1) TO CONTINUE

HOMTE I am going to read a list of ways that people access the Internet from their homes, other than a mobile data plan. At home, (do you/does anyone in this household) access the Internet using:

Read and select all that apply; separate with commas

- (1) **High-speed Internet service installed at home, such as cable, DSL, or fiber-optic service? (If needed) This type of Internet service is often provided by a cable company or phone company.**
- (2) **Satellite Internet service? (If needed) This type of Internet service is received through a satellite dish installed at home.**
- (3) **Dial-up service?**
- (4) Some other service?
- (5) None of the above

Blind (D) Don't Know

Blind (R) Refused

TEOTHR What other service?

Enter verbatim response

HOMSU Thinking about the company or organization that provides your home Internet service, who provides your Internet service?

Read and select the best match

- (1) **Internet service is provided by a company that sells Internet service, such as a cable or phone company.**
- (2) **Internet service is provided by a nonprofit organization, public agency, or cooperative that sells Internet service.**
- (3) **Internet service is provided for the entire apartment building, condominium, campus, or other community and included in housing costs.**
- (4) **Internet service is publicly available and provided at no charge.**
- (5) Internet service is provided through some other method.

Blind (D) Don't Know

Blind (R) Refused

PECOMP To the best of your knowledge, are there (other/any) cable or phone companies or organizations where you live that would offer high-speed Internet service installed in your home, such as cable, DSL, or fiber-optic service?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

USEINT We are interested in learning about the applications and services people commonly use with the Internet. ((If a multi-person household & RESPLINE ELGFLG = 20 = random respondent) We have randomly selected one member of your household for this section.)

Consider how (you personally/NAME) currently use(s) the technologies we've been discussing, whether at home or any other location. Please focus on activities (you have/NAME has) done online at least occasionally during the past six months, using an Internet-connected device such as a computer, tablet, or cell phone.

ENTER (1) TO CONTINUE

EMAIL (Do you/Does NAME) use email?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

TEXTIM What about texting or instant messaging? (Do you/Does NAME) text or use instant messaging?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

SOCIAL What about using social networks, such as Facebook, Twitter, or Instagram?
(Do you/Does NAME) use social networks?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

CONFER In the past six months, (have/has) (you/NAME) participated in video or voice calls or conferencing over the Internet, such as with SKYPE or Face Time?
(Do you/Does NAME) participate in video or voice calls or conferencing?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

VIDEO What about streaming or watching videos? (Do you/Does NAME) watch videos over the Internet? Examples include YouTube and Netflix.

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

AUDIO What about streaming or downloading music, radio programs, or podcasts?
(Do you/Does NAME) stream or download music, radio programs, or podcasts?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

PUBLISH What about posting or uploading blog posts, original videos, or other content that (you/NAME) created? Do not include photos or videos taken for personal use and shared to social media.

(Do you/Does NAME) publish or upload original content that (you/NAME) created to the Internet?

(1) Yes

(2) No

Blind (D) Don't Know

Blind (R) Refused

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

HOMIOT What about interacting with household equipment or appliances that are connected to the Internet, such as a connected thermostat, light bulb, or security system?

(Do you/Does NAME) use the Internet to interact with household equipment or appliances?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

MEDINT *(If NUMHOU > 1 (multi-person household) Our remaining questions are about your household as a whole.) (All) I'm going to ask a couple of questions about how (you have/your household has) used the Internet for health-related activities during the past six months.*

ENTER (1) TO CONTINUE

MEDDOC (Do/Does) (you/anyone in this household, including you,) communicate with a doctor or other health professional using the Internet?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

MEDREC What about accessing health records or health insurance records online?
(Do you/Does anyone in this household) access health records or health insurance records online?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

MEDINF (Do you/Does anyone in this household) research health information online, such as with WebMD or similar services?

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

MEDMON (Do you/Does anyone in this household) use an electronic health monitoring service that collects and sends data to your doctor or health care provider through the Internet? Examples include connected devices that monitor vital statistics, blood glucose levels, or blood pressure.

- (1) Yes
- (2) No

Blind (D) Don't Know
Blind (R) Refused

UHHINT *(If multi-person household – NUMHOU > 1)* We are interested in learning generally, without identifying specific people, what challenges your household has had while using the Internet. *(If single-person household)* We are interested in learning what challenges you have had while using the Internet.

ENTER (1) TO CONTINUE

PSPRE During the past year, have concerns about privacy or security stopped (you/anyone in this household) from doing any of these activities online:

Read and select all that apply; separate by commas

- (1) **Conducting financial transactions such as banking, investing, or paying bills online?**
- (2) **Buying goods or services online?**
- (3) **Posting photos, status updates, or other information on social networks?**
- (4) **Expressing an opinion on a controversial or political issue on a blog or social network, or in a forum, email or any other venue?**
- (5) **Searching for information using a platform such as Google Search, Yahoo Search, Microsoft Bing, or another web search engine?**
- (6) None of the above

Blind (D) Don't Know
Blind (R) Refused

PSCON Overall, what concerns (you/members of this household) the most when it comes to online privacy and security risks?

Do not read answer categories; select all that apply; separate by commas

- (1) Identity theft
- (2) Credit card or banking fraud
- (3) Data collection or tracking by online services
- (4) Data collection or tracking by government
- (5) Loss of control over personal data such as email or social network profiles
- (6) Threats to personal safety, such as online harassment, stalking, or cyber-bullying
- (7) No concerns
- (8) Other; specify

Blind (D) Don't Know

Blind (R) Refused

PSCONS What other online privacy and security risks?

Enter verbatim response

PSCYBA During the past year, (have you/has any member of your household) been affected by an online security breach, identity theft, or a similar crime?

- (1) Yes
- (2) No

Blind (D) Don't Know

Blind (R) Refused

CBULLY During the past year, (have you/has any member of your household) experienced online harassment, stalking, or cyber-bullying?

- (1) Yes
- (2) No

Blind (D) Don't Know

Blind (R) Refused

NHMINT You previously mentioned that (you/members of your household) use the Internet in some places, but not at home.

ENTER (1) TO CONTINUE

NONINT *(If multi-person household)* Our remaining questions are about your household as a whole. We are interested in learning why households such as yours do not use the Internet.

(If single-person household) For our remaining questions, we are interested in learning why you do not use the Internet.

ENTER (1) TO CONTINUE

EVRHOM (Have you/Has anyone in this household) ever used the Internet from home?

(1) Yes

(2) No

Blind (D) Don't Know

Blind (R) Refused

NOHM What are the reasons why (you/members of your household) do not use the Internet at home?

Do not read answer categories; select all that apply; separate by commas

(1) Don't need it or not interested

(2) Can't afford it

(3) Not worth the cost

(4) Can use it elsewhere

(5) Not available in area

(6) No computing device, or device inadequate or broken

(7) Online privacy or cybersecurity concerns

(8) Personal safety concerns

(9) Household moved or is in the process of moving

(10) Some other reason

Blind (D) Don't Know

Blind (R) Refused

NOHMS **What other reasons?**

Enter verbatim response

PRINOH Of the reasons you just listed for not going online at home, which (do you/does your household) consider to be the most important?

Read previous responses (if needed); select best match
(Only display/fill responses chosen in NOHM)

- (1) Don't need it or not interested
- (2) Can't afford it
- (3) Not worth the cost
- (4) Can use it elsewhere
- (5) Not available in area
- (6) No computing device, or other device inadequate or broken
- (7) Online privacy or cybersecurity concerns
- (8) Personal safety concerns
- (9) Household moved or is in the process of moving
- (10) Other

PRNOHS Other reason for not going online at home?

Enter verbatim response

PSENSI Would (you/your household) buy home Internet service if it were offered at a lower price?

- (1) Yes
- (2) No

Blind (D) Don't Know

Blind (R) Refused

OUTINT You previously mentioned that (you/members of your household) use the Internet at home, but not at other locations.

ENTER (1) TO CONTINUE

EVROUT (Have you/Has anyone in this household) ever used the Internet from a location other than home?

- (1) Yes
- (2) No

Blind (D) Don't Know

Blind (R) Refused

NOOU What are the reasons why (you/members of your household) do not use the Internet outside the home?

Do not read answer categories; select all that apply; separate by commas

- (1) Don't need it or not interested
- (2) Can't afford it
- (3) Not worth the cost
- (4) Nowhere to go that has it
- (5) No computing device, or device inadequate or broken
- (6) No mobile device, or mobile device inadequate or broken
- (7) Online privacy or cybersecurity concerns
- (8) Personal safety concerns
- (9) Household moved and is no longer near previous Internet use location
- (10) Some other reason

Blind (D) Don't Know

Blind (R) Refused

NOOUS What other reasons?

ATTACHMENT 9

INDUSTRY CLASSIFICATION

Industry Classification Codes for Detailed Industry (4 digit)
(Starting January 2014)

These categories are aggregated into 52 detailed groups and 14 major groups (see pages 10-12 of this attachment). The codes in the right hand column are the NAICS equivalent.

These codes correspond to Items PEIO1ICD and PEIO2ICD, in positions 856-859 and 864-867 of the Basic CPS record layout in all months, **except March**. In the **March**, these codes correspond to PEIOIND and INDUSTRY, in positions 168-171 and 292-295 of the Person record.

CENSUS CODE	DESCRIPTION	NAICS CODE
Agriculture, Forestry, Fishing, and Hunting		
0170	Crop production	111
0180	Animal production	112
0190	Forestry except logging	1131, 1132
0270	Logging	1133
0280	Fishing, hunting, and trapping	114
0290	Support activities for agriculture and forestry	115
Mining		
0370	Oil and gas extraction	211
0380	Coal mining	2121
0390	Metal ore mining	2122
0470	Nonmetallic mineral mining and quarrying and not specified type of mining	Part of 21
0490	Support activities for mining	213
Utilities		
0570	Electric power generation, transmission and distribution	Pt. 2211
0580	Natural gas distribution	Pt. 2212
0590	Electric and gas, and other combinations	Pts. 2211, 2212
0670	Water, steam, air-conditioning, and irrigation systems	22131, 22133
0680	Sewage treatment facilities	22132
0690	Not specified utilities	Part of 22

CODE	DESCRIPTION	INDUSTRY CODE
	Construction	
0770	** Construction (Includes the cleaning of buildings and dwellings is incidental during construction and immediately after construction)	23
	Manufacturing	
	Nondurable Goods manufacturing	
1070	Animal food, grain and oilseed milling	3111, 3112
1080	Sugar and confectionery products	3113
1090	Fruit and vegetable preserving and specialty food manufacturing	3114
1170	Dairy product manufacturing	3115
1180	Animal slaughtering and processing	3116
1190	Retail bakeries	311811
1270	Bakeries, except retail	3118 exc. 311811
1280	Seafood and other miscellaneous foods, n.e.c.	3117, 3119
1290	Not specified food industries	Part of 311
1370	Beverage manufacturing	3121
1390	Tobacco manufacturing	3122
1470	Fiber, yarn, and thread mills	3131
1480	Fabric mills, except knitting	3132 exc. 31324
1490	Textile and fabric finishing and coating mills	3133
1570	Carpet and rug mills	31411
1590	Textile product mills, except carpets and rugs	314 exc. 31411
1670	Knitting mills	31324, 3151
1680	Cut and sew apparel manufacturing	3152
1690	Apparel accessories and other apparel manufacturing	3159
1770	Footwear manufacturing	3162
1790	Leather tanning and products, except footwear manufacturing	3161, 3169
1870	Pulp, paper, and paperboard mills	3221
1880	Paperboard containers and boxes	32221
1890	Miscellaneous paper and pulp products	32222, 32223, 32229
1990	Printing and related support activities	3231
2070	Petroleum refining	32411
2090	Miscellaneous petroleum and coal products	32419
2170	Resin, synthetic rubber and fibers, and filaments manufacturing	3252
2180	Agricultural chemical manufacturing	3253
2190	Pharmaceutical and medicine manufacturing	3254
2270	Paint, coating, and adhesive manufacturing B46	3255
2280	Soap, cleaning compound, and cosmetics manufacturing	3256
2290	Industrial and miscellaneous chemicals	3251, 3259
2370	Plastics product manufacturing	3261
2380	Tire manufacturing	32621
2390	Rubber products, except tires, manufacturing	32622, 32629

CODE	DESCRIPTION	INDUSTRY CODE
Durable Goods Manufacturing		
2470	Pottery, ceramics, and related products manufacturing	32711
2480	Structural clay product manufacturing	32712
2490	Glass and glass product manufacturing	3272
2570	Cement, concrete, lime, and gypsum product manufacturing	3273, 3274
2590	Miscellaneous nonmetallic mineral product manufacturing	3279
2670	Iron and steel mills and steel product manufacturing	3311, 3312
2680	Aluminum production and processing	3313
2690	Nonferrous metal, except aluminum, production and processing	3314
2770	Foundries	3315
2780	Metal forgings and stampings	3321
2790	Cutlery and hand tool manufacturing	3322
2870	Structural metals, and tank and shipping container manufacturing	3323, 3324
2880	Machine shops; turned product; screw, nut and bolt manufacturing	3327
2890	Coating, engraving, heat treating and allied activities	3328
2970	Ordnance	332992 to 332995
2980	Miscellaneous fabricated metal products manufacturing	3325, 3326, 3329 exc. 332992, 332993, 332994, 332995
2990	Not specified metal industries	Part of 331 and 332
3070	Agricultural implement manufacturing	33311
3080	Construction, mining and oil field machinery manufacturing	33312, 33313
3095	Commercial and service industry machinery manufacturing	3333
3170	Metalworking machinery manufacturing	3335
3180	Engines, turbines, and power transmission equipment manufacturing	3336
3190	Machinery manufacturing, n.e.c.	Part of 333
3365	Computer and peripheral equipment manufacturing	3341
3370	Communications, audio, and video equipment manufacturing	3342, 3343
3380	Navigational, measuring, electromedical, and control instruments manufacturing	3345
3390	Electronic component and product manufacturing, n.e.c.	3344, 3346
3470	Household appliance manufacturing	3352
3490	Electrical lighting, equipment, and supplies manufacturing, n.e.c.	3351, 3353, 3359
3570	Motor vehicles and motor vehicle equipment manufacturing	3361, 3362, 3363
3580	Aircraft and parts manufacturing	336411 to 336413
3590	Aerospace products and parts manufacturing	336414, 336415, 336419
3670	Railroad rolling stock manufacturing	3365
3680	Ship and boat building	3366
3690	Other transportation equipment manufacturing	3369

CODE	DESCRIPTION	INDUSTRY CODE
3770	Sawmills and wood preservation	3211
3780	Veneer, plywood, and engineered wood products	3212
3790	Prefabricated wood buildings and mobile homes	321991, 321992
3875	Miscellaneous wood products	3219 exc. 321991, 321992
3895	Furniture and related product manufacturing	337
3960	Medical equipment and supplies manufacturing	3391
3970	Toys, amusement, and sporting goods manufacturing	33992, 33993
3980	Miscellaneous manufacturing, n.e.c.	3399 exc. 33992, 33993
3990	Not specified manufacturing industries	Part of 31, 32, 33
Wholesale Trade		
Durable Goods Wholesale		
4070	Motor vehicles, parts and supplies, merchant wholesalers	4231
4080	Furniture and home furnishing, merchant wholesalers	4232
4090	Lumber and other construction materials, merchant wholesalers	4233
4170	Professional and commercial equipment and supplies, merchant wholesalers	4234
4180	Metals and minerals, except petroleum, merchant wholesalers	4235
4195	Electrical goods, merchant wholesalers	4236
4265	Hardware, plumbing and heating equipment, and supplies, merchant wholesalers	4237
4270	Machinery, equipment, and supplies, merchant wholesalers	4238
4280	Recyclable material, merchant wholesalers	42393
4290	Miscellaneous durable goods, merchant wholesalers	4239 exc. 42393
Nondurable Goods Wholesale		
4370	Paper and paper products, merchant wholesalers	4241
4380	Drugs, sundries, and chemical and allied products, merchant wholesalers	4242, 4246
4390	Apparel, fabrics, and notions, merchant wholesalers	4243
4470	Groceries and related products, merchant wholesalers	4244
4480	Farm product raw materials, merchant wholesalers	4245
4490	Petroleum and petroleum products, merchant wholesalers	4247
4560	Alcoholic beverages, merchant wholesalers	4248
4570	Farm supplies, merchant wholesalers	42491
4580	Miscellaneous nondurable goods, merchant wholesalers	4249 exc. 42491
4585	Wholesale electronic markets, agents and brokers	4251

14	Armed Forces	9890

APPENDIX 10

OCCUPATION CLASSIFICATION

(Beginning May 2012)

These categories are aggregated into 23 detailed groups and 11 major groups (see pages 10-13 and 10-14). The codes in the right hand column are the 2010 SOC equivalent.

These codes correspond to items PEIO1OCD and PEIO2OCD in positions 860-863 and 868-871 of the Basic CPS record layout in all months. In **ASEC**, these codes correspond to items PEIOOCC and OCCUP located in positions 172-172 and 296-299 of the Persons Record. These codes are also applicable for any other CPS supplements that collect occupation data.

5360	Human resources assistants, except payroll and timekeeping	43-4161
5400	Receptionists and information clerks	43-4171
5410	Reservation and transportation ticket agents and travel clerks	43-4181
5420	Information and record clerks, all other	43-4199
5500	Cargo and freight agents	43-5011
5510	Couriers and messengers	43-5021
5520	Dispatchers	43-5030
5530	Meter readers, utilities	43-5041
5540	Postal service clerks	43-5051
5550	Postal service mail carriers	43-5052
5560	Postal service mail sorters, processors, and processing machine operators	43-5053
5600	Production, planning, and expediting clerks	43-5061
5610	Shipping, receiving, and traffic clerks	43-5071
5620	Stock clerks and order fillers	43-5081
5630	Weighers, measurers, checkers, and samplers, recordkeeping	43-5111
5700	Secretaries and administrative assistants	43-6010
5800	Computer operators	43-9011
5810	Data entry keyers	43-9021
5820	Word processors and typists	43-9022
5840	Insurance claims and policy processing clerks	43-9041
5850	Mail clerks and mail machine operators, except postal service	43-9051
5860	Office clerks, general	43-9061
5900	Office machine operators, except computer	43-9071
5910	Proofreaders and copy markers	43-9081
5920	Statistical assistants	43-9111
5940	Office and administrative support workers, including desktop publishers	

Farming, Fishing, and Forestry Occupations

6005	First-line supervisors of farming, fishing, and forestry workers	45-1011
6010	Agricultural inspectors	45-2011
6040	Graders and sorters, agricultural products	45-2041
6050	Miscellaneous agricultural workers, including animal breeders	45-20XX
6100	Fishing and hunting workers	45-3000
6120	Forest and conservation workers	45-4011
6130	Logging workers	45-4020

Construction Trades

6200	First-line supervisors/managers of construction trades and extraction workers	47-1011
6210	Boilermakers	47-2011
6220	Brickmasons, blockmasons, and stonemasons	47-2020
6230	Carpenters	47-2031
6240	Carpet, floor, and tile installers and finishers	47-2040
6250	Cement masons, concrete finishers, and terrazzo workers	47-2050
6260	Construction laborers	47-2061
6300	Paving, surfacing, and tamping equipment operators	47-2071
6320	Construction equipment operators, except Paving, surfacing, and tamping equipment operators	47-207X
6330	Drywall installers, ceiling tile installers, and tapers	47-2080
6355	Electricians	47-2111
6360	Glaziers	47-2121
6400	Insulation workers	47-2130
6420	Painters, construction and maintenance and paperhangers	47-214X
6440	Pipelayers, plumbers, pipefitters, and steamfitters	47-2150
6460	Plasterers and stucco masons	47-2161
6500	Reinforcing iron and rebar workers	47-2171
6515	Roofers	47-2181
6520	Sheet metal workers	47-2211
6530	Structural iron and steel workers	47-2221
6600	Helpers, construction trades	47-3010
6660	Construction and building inspectors	47-4011
6700	Elevator installers and repairers	47-4021
6710	Fence erectors	47-4031
6720	Hazardous materials removal workers	47-4041
6730	Highway maintenance workers	47-4051
6740	Rail-track laying and maintenance equipment operators	47-4061
6750	Septic tank servicers and sewer pipe cleaners	47-4071
6765	Miscellaneous construction and related workers, including photovoltaic installers	

Extraction Workers

6800	Derrick, rotary drill, and service unit operators, oil, gas, and mining	47-5010
6820	Earth drillers, except oil and gas	47-5021
6830	Explosives workers, ordnance handling experts, and blasters	47-5031
6840	Mining machine operators	47-5040
6920	Roustabouts, oil and gas	47-5071
6940	Other extraction workers, including roof bolters and helpers	47-50XX

Installation, Maintenance, and Repair Workers

7000	First-line supervisors/managers of mechanics, installers, and repairers	49-1011
7010	Computer, automated teller, and office machine repairers	49-2011
7020	Radio and telecommunications equipment installers and repairers	49-2020
7030	Avionics technicians	49-2091
7040	Electric motor, power tool, and related repairers	49-2092
7100	Electrical and electronics repairers, transportation equipment, industrial and utility	49-209X
7110	Electronic equipment installers and repairers, motor vehicles	49-2096
7120	Electronic home entertainment equipment installers and repairers	49-2097
7130	Security and fire alarm systems installers	49-2098
7140	Aircraft mechanics and service technicians	49-3011
7150	Automotive body and related repairers	49-3021
7160	Automotive glass installers and repairers	49-3022
7200	Automotive service technicians and mechanics	49-3023
7210	Bus and truck mechanics and diesel engine specialists	49-3031
7220	Heavy vehicle and mobile equipment service technicians and mechanics	49-3040
7240	Small engine mechanics	49-3050
7260	Miscellaneous vehicle and mobile equipment mechanics, installers, and repairers	49-3090
7300	Control and valve installers and repairers	49-9010
7315	Heating, air conditioning, and refrigeration mechanics and installers	49-9021
7320	Home appliance repairers	49-9031
7330	Industrial and refractory machinery mechanics	49-904X
7340	Maintenance and repair workers, general	49-9071
7350	Maintenance workers, machinery	49-9043
7360	Millwrights	49-9044
7410	Electrical power-line installers and repairers	49-9051
7420	Telecommunications line installers and repairers	49-9052
7430	Precision instrument and equipment repairers	49-9060
7510	Coin, vending, and amusement machine servicers and repairers	49-9091
7540	Locksmiths and safe repairers	49-9094
7550	Manufactured building and mobile home installers	49-9095
7560	Riggers	49-9096
7610	Helpers--installation, maintenance, and repair workers	49-9098
7630	Other installation, maintenance, and repair workers, including wind turbine service technicians, commercial divers, and signal and train switch repairers	49-909X

Production Occupations

7700	First-line supervisors/managers of production and operating workers	51-1011
7710	Aircraft structure, surfaces, rigging, and systems assemblers	51-2011
7720	Electrical, electronics, and electromechanical assemblers	51-2020
7730	Engine and other machine assemblers	51-2031
7740	Structural metal fabricators and fitters	51-2041
7750	Miscellaneous assemblers and fabricators	51-2090
7800	Bakers	51-3011
7810	Butchers and other meat, poultry, and fish processing workers	51-3020
7830	Food and tobacco roasting, baking, and drying machine operators and tenders	51-3091
7840	Food batchmakers	51-3092

7850	Food cooking machine operators and tenders	51-3093
7855	Food processing workers, all other	51-3099
7900	Computer control programmers and operators	51-4010
7920	Extruding and drawing machine setters, operators, and tenders, metal and plastic	51-4021
7940	Rolling machine setters, operators, and tenders and forging machine setters, operators, and tenders, metal and plastic	51-402X
7950	Cutting, punching, and press machine setters, operators, and tenders, metal and plastic	51-4031
8000	Grinding, lapping, polishing, and buffing machine tool setters, operators, and tenders, metal and plastic	51-4033
8010	Lathe and turning machine tool setters, operators, and tenders, metal and plastic	51-4034
8030	Machinists	51-4041
8040	Metal furnace and kiln operators and tenders	51-4050
8100	Molders and molding machine setters, operators, and tenders, metal and plastic	51-4070
8130	Tool and die makers	51-4111
8140	Welding, soldering, and brazing workers	51-4120
8200	Plating and coating machine setters, operators, and tenders, metal and plastic	51-4193
8210	Tool grinders, filers, and sharpeners	51-4194
8220	Metalworkers and plastic workers, all other	51-4XXX
8250	Prepress technicians and workers	51-5111
8255	Printing press operators	51-5112
8256	Print binding and finishing workers	51-5113
8300	Laundry and dry-cleaning workers	51-6011
8310	Pressers, textile, garment, and related materials	51-6021
8320	Sewing machine operators	51-6031
8330	Shoe and leather workers and repairers	51-6041
8350	Tailors, dressmakers, and sewers	51-6050
8400	Textile cutting machine setters, operators, and tenders	51-6062
8410	Textile knitting and weaving machine setters, operators, and tenders	51-6063
8420	Textile winding, twisting, and drawing out machine setters, operators and tenders	51-6064
8450	Upholsterers	51-6093
8460	Miscellaneous textile, apparel, and furnishings workers, except upholsterers	51-60XX
8500	Cabinetmakers and bench carpenters	51-7011
8510	Furniture finishers	51-7021
8530	Sawing machine setters, operators, and tenders, wood	51-7041
8540	Woodworking machine setters, operators, and tenders, except sawing	51-7042
8550	Miscellaneous woodworkers, including model makers and pattern makers	51-70XX
8600	Power plant operators, distributors, and dispatchers	51-8010
8610	Stationary engineers and boiler operators	51-8021
8620	Water and liquid waste treatment plant and system operators	51-8031
8630	Miscellaneous plant and system operators	51-8090
8640	Chemical processing machine setters, operators, and tenders	51-9010
8650	Crushing, grinding, polishing, mixing, and blending workers	51-9020
8710	Cutting workers	51-9030
8720	Extruding, forming, pressing, and compacting machine setters, operators, and tenders	51-9041
8730	Furnace, kiln, oven, drier, and kettle operators and tenders	51-9051
8740	Inspectors, testers, sorters, samplers, and weighers	51-9061
8750	Jewelers and precious stone and metal workers	51-9071
8760	Medical, dental, and ophthalmic laboratory technicians	51-9080
8800	Packaging and filling machine operators and tenders	51-9111
8810	Painting workers	51-9120
8830	Photographic process workers and processing machine operators	51-9130

**2010
CENSUS
CODE DESCRIPTION**

**2010
SOC
CODE**

8850	Cementing and gluing machine operators and tenders	51-9191
8860	Cleaning, washing, and metal pickling equipment operators and tenders	51-9192
8910	Etchers and engravers	51-9194
8920	Molders, shapers, and casters, except metal and plastic	51-9195
8930	Paper goods machine setters, operators, and tenders	51-9196
8940	Tire builders	51-9197
8950	Helpers--production workers	51-9198
8965	Production workers, including semiconductor processors and cooling and freezing equipment operators	51-91XX

Transportation and Material Moving Occupations

9000	Supervisors, transportation and material moving workers	53-1000
9030	Aircraft pilots and flight engineers	53-2010
9040	Air traffic controllers and airfield operations specialists	53-2020
9110	Ambulance drivers and attendants, except emergency medical technicians	53-3011
9120	Bus drivers	53-3020
9130	Driver/sales workers and truck drivers	53-3030
9140	Taxi drivers and chauffeurs	53-3041
9150	Motor vehicle operators, all other	53-3099
9200	Locomotive engineers and operators	53-4010
9240	Railroad brake, signal, switch operators, conductors and yardmasters	53-40XX
9260	Subway, streetcar, and other rail transportation workers	53-30XX
9300	Sailors and marine oilers, and ship engineers	53-50XX
9310	Ship and boat captains and operators	53-5020
9350	Parking lot attendants	53-6021
9360	Service station attendants	53-6031
9410	Transportation inspectors	53-6051
9415	Transportation attendants, except flight attendants	53-6061
9420	Other transportation workers, including bridge and lock tenders	53-60XX
9510	Crane and tower operators	53-7021
9520	Dredge, excavating, and loading machine operators	53-7030
9560	Hoist and winch operators, and conveyor operators and tenders	53-70XX
9600	Industrial truck and tractor operators	53-7051
9610	Cleaners of vehicles and equipment	53-7061
9620	Laborers and freight, stock, and material movers, hand	53-7062
9630	Machine feeders and offbearers	53-7063
9640	Packers and packagers, hand	53-7064
9650	Pumping station operators	53-7070
9720	Refuse and recyclable material collectors	53-7081
9750	Material moving workers, including mine shuttle operators and tank car, truck, and ship loaders	53-71XX

Armed Forces

*9840 Armed Forces

Detailed Occupation Recodes (01-23)

These codes correspond to Items PRDTOCC1 and PRDTOCC2 in positions 476-479 of the Basic CPS record layout in all months **except** March. In **March**, these codes correspond to Item A-DTOCC and are located in positions 161-162.

CODE	CODE DESCRIPTION	OCCUPATION CODE
1	Management occupations	0010-0430
2	Business and financial operations occupations	0500-0950
3	Computer and mathematical science occupations	1000-1240
4	Architecture and engineering occupations	1300-1560
5	Life, physical, and social science occupations	1600-1965
6	Community and social service occupation	2000-2060
7	Legal occupations	2100-2160
8	Education, training, and library occupations	2200-2550
9	Arts, design, entertainment, sports, and media occupations	2600-2960
10	Healthcare practitioner and technical occupations	3000-3540
11	Healthcare support occupations	3600-3655
12	Protective service occupations	3700-3955
13	Food preparation and serving related occupations	4000-4160
14	Building and grounds cleaning and maintenance occupations	4200-4250
15	Personal care and service occupations	4300-4650
16	Sales and related occupations	4700-4965
17	Office and administrative support occupations	5000-5940
18	Farming, fishing, and forestry occupations	6000-6130

Specific Metropolitan Identifiers

(Geographic Attachment for CPS Public Use File Documentation Beginning August, 2015)

- List 1. FIPS Metropolitan Area (CBSA) Codes
- List 2. FIPS Consolidated Statistical Area (CSA) Codes
- List 3. Individual Principal Cities
- List 4: FIPS County Codes

Unless otherwise noted, all definitions for geographic areas on these lists reflect the February 28, 2013 OMB definitions.

LIST 1: FIPS Metropolitan Area (CBSA) Codes

Metropolitan Areas are defined using February 28, 2013 OMB definitions.

<u>FIPS Code</u>	<u>Metropolitan (CBSA) TITLE</u>
10180	Abilene, TX
10420	Akron, OH
10580	Albany-Schenectady-Troy, NY
10740	Albuquerque, NM
10900	Allentown-Bethlehem-Easton, PA-NJ
11100	Amarillo, TX
11460	Ann Arbor, MI
11540	Appleton, WI
11700	Asheville, NC
12020	Athens-Clarke County, GA
12060	Atlanta-Sandy Springs-Roswell, GA
12100	Atlantic City-Hammonton, NJ
12220	Auburn-Opelika, AL
12260	Augusta-Richmond County, GA-SC
12420	Austin-Round Rock, TX
12540	Bakersfield, CA
12580	Baltimore-Columbia-Towson, MD
12620	Bangor, ME
12700	Barnstable, MA
12940	Baton Rouge, LA
12980	Battle Creek, MI
13140	Beaumont-Port Arthur, TX
13460	Bend-Redmond, OR
13740	Billings, MT
13780	Binghamton, NY

LIST 2: FIPS Consolidated Statistical Area (CSA) Codes

The following CSA's (Combined Statistical Areas) contain 2 or more Metropolitan Statistical Areas that are in the CPS sample and are individually identified on the public use files. Micropolitan Statistical Areas are not specifically identified in the CPS and are not used to identify CSA's nor are parts of such areas coded as belonging to CSA's. The component CBSA's identified on the CPS Public Use Files are listed for each CSA.

CSA Code	CBSA Code	CSA Title Component Parts (CBSA's)
104	10580 24020	Albany-Schenectady, NY Albany-Schenectady-Troy, NY Glen Falls, NY

List 3: Individual Principal Cities

Please Note: You must use the CBSA code in combination with the city code to uniquely identify principal cities. If a county name is provided, you must incorporate the county code into any algorithm used to tabulate a specific city's characteristics. The same applies to state codes for multi-state CBSA's.

CBSA Code	Title City	GTINDVPC

Topcoding of Usual Hourly Earnings

This variable will be topcoded based on an individual's usual hours worked variable, if the individual's edited usual weekly earnings variable is \$999. The topcode is computed such that the product of usual hours times usual hourly wage does not exceed an annualized wage of \$150,000 (\$2,885.00 per week). Below is a list of the appropriate topcode.

Hours	Topcode	Hours	Topcode	Hours	Topcode
1	None	34	\$84.85	67	\$43.06
2	None	35	\$82.43	68	\$42.43
3	None	36	\$80.14	69	\$41.81
4	None	37	\$77.97	70	\$41.21
5	None	38	\$75.92	71	\$40.63
6	None	39	\$73.97	72	\$40.07
7	None	40	\$72.13	73	\$39.52
8	None	41	\$70.37	74	\$38.99

ALLOCATION FLAGS

Current Population Survey

For every edited item, there is a corresponding allocation flag with the prefix "PX". The last six characters of the names are the same. For example, PXMLR is the allocation flag for PEMLR. All allocation flags have the following list of possible values.

00	VALUE - NO CHANGE
01	BLANK - NO CHANGE
02	DON'T KNOW - NO CHANGE
03	REFUSED - NO CHANGE
10	VALUE TO VALUE
11	BLANK TO VALUE
12	DON'T KNOW TO VALUE
13	REFUSED TO VALUE
20	VALUE TO LONGITUDINAL VALUE
21	BLANK TO LONGITUDINAL VALUE
22	DON'T KNOW TO LONGITUDINAL VALUE
23	REFUSED TO LONGITUDINAL VALUE
30	VALUE TO ALLOCATED VALUE LONG.
31	BLANK TO ALLOCATED VALUE LONG.
32	DON'T KNOW TO ALLOCATED VALUE LONG.
33	REFUSED TO ALLOCATED VALUE LONG.
40	VALUE TO ALLOCATED VALUE
41	BLANK TO ALLOCATED VALUE
42	DON'T KNOW TO ALLOCATED VALUE
43	REFUSED TO ALLOCATED VALUE
50	VALUE TO BLANK
52	DON'T KNOW TO BLANK
53	REFUSED TO BLANK

Source of the Data and Accuracy of the Estimates for the November 2019 Current Population Survey Microdata File on Computer and Internet Use

SOURCE OF THE DATA

The data in this microdata file are from the November 2019 Current Population Survey (CPS). The U.S. Census Bureau conducts the CPS every month, although this file has only November data. The November survey uses two sets of questions, the basic CPS and a set of supplemental questions. The CPS, sponsored jointly by the Census Bureau and the U.S. Bureau of Labor Statistics, is the country's primary source of labor force statistics for the civilian noninstitutionalized population. The National Telecommunications and Information Administration sponsors the supplemental questions for November.

Basic CPS. The monthly CPS collects primarily labor force data about the civilian noninstitutionalized population living in the United States. The institutionalized population, which is excluded from the universe, consists primarily of the population in correctional institutions and nursing homes (98 percent of the 4.0 million institutionalized people in Census 2010). Starting August 2017, college and university dormitories were also excluded from the universe because most of the residents had usual residences elsewhere. Interviewers ask questions concerning labor force participation of each member 15 years old and over in sample households. Typically, the week containing the nineteenth of the month is the interview week. The week containing the twelfth is the reference week (i.e., the week about which the labor force questions are asked).

The CPS uses a multistage probability sample based on the results of the decennial census, with coverage in all 50 states and the District of Columbia. The sample is continually updated to account for new residential construction. When files from the most recent decennial census become available, the Census Bureau gradually introduces a new sample design for the CPS.

Every ten years, the CPS first-stage sample is redesigned¹ reflecting changes based on the most recent decennial census. In the first stage of the sampling process, primary sampling units (PSUs)² were selected for sample. In the 2010 sample design, the United States was divided into 1,987 PSUs. These PSUs were then grouped into 852 strata. Within each stratum, a single PSU was chosen for the sample, with its probability of selection proportional to its population as of the most recent decennial census. In the case of strata consisting of only one PSU, the PSU was chosen with certainty.

¹ For detailed information on the 2010 sample redesign, please see Bureau of Labor Statistics (2014).

² The PSUs correspond to substate areas (i.e., counties or groups of counties) that are geographically contiguous.

Approximately 70,000 housing units were selected from the sampling frame in November. Based on eligibility criteria, nine percent of these housing units were sent directly to computer-assisted telephone interviewing (CATI). The remaining units were assigned to interviewers for computer-assisted personal interviewing (CAPI).³ Of all housing units in sample, about 60,000 were determined to be eligible for interview. Interviewers obtained interviews at about 50,000 of these units. Noninterviews occur when the occupants are not found at home after repeated calls or are unavailable for some other reason.

November 2019 Supplement. In November 2019, in addition to the basic CPS questions, interviewers asked supplementary questions of the noninstitutionalized population three years and older on computer and internet use.

Estimation Procedure. This survey's estimation procedure adjusts weighted sample results to agree with independently derived population controls of the civilian noninstitutionalized population of the United States, each state, and the District of Columbia. These population controls⁴ are prepared monthly as part of the Census Bureau's Population Estimates Program.

The population controls for the nation are distributed by demographic characteristics in two ways:

- Age, sex, and race (White alone, Black alone, and all other groups combined).
- Age, sex, and Hispanic origin.

The population controls for the states are distributed by:

- Race (Black alone and all other race groups combined).
- Age (0-15, 16-44, and 45 and over).
- Sex.

The independent estimates by age, sex, race, and Hispanic origin, and for states by selected age groups and broad race categories, are developed using the basic demographic accounting formula whereby the population from the 2010 Census data is updated using data on the components of population change (births, deaths, and net international migration) with net internal migration as an additional component in the state population controls.

The net international migration component of the population controls includes:

- Net international migration of the foreign born;

³ For further information on CATI and CAPI and the eligibility criteria, please see U.S. Census Bureau (2019).

⁴ For additional information on population controls, including details on the demographic characteristics used and net international components, please see Chapter 1-3 and Appendix: History of the Current Population Survey of U.S. Census Bureau (2019).

- Net migration between the United States and Puerto Rico;
- Net migration of natives to and from the United States; and
- Net movement of the Armed Forces population to and from the United States.

Because the latest available information on these components lags behind the survey date, it is necessary to make short-term projections of these components to develop the estimate for the survey date.

ACCURACY OF THE ESTIMATES

A sample survey estimate has two types of error: sampling and nonsampling. The accuracy of an estimate depends on both types of error. The nature of the sampling error is known given the survey design; the full extent of the nonsampling error is unknown.

Sampling Error. Since the CPS estimates come from a sample, they may differ from figures from an enumeration of the entire population using the same questionnaires, instructions, and enumerators. For a given estimator, the difference between an estimate based on a sample and the estimate that would result if the sample were to include the entire population is known as sampling error. Standard errors, as calculated by methods described in “Standard Errors and Their Use,” are primarily measures of the magnitude of sampling error. However, the estimation of standard errors may include some nonsampling error.

Nonsampling Error. For a given estimator, the difference between the estimate that would result if the sample were to include the entire population and the true population value being estimated is known as nonsampling error. There are several sources of nonsampling error that may occur during the development or execution of the survey. It can occur because of circumstances created by the interviewer, the respondent, the survey instrument, or the way the data are collected and processed. Some nonsampling errors, and examples of each, include:

- Measurement error: The interviewer records the wrong answer, the respondent provides incorrect information, the respondent estimates the requested information, or an unclear survey question is misunderstood by the respondent.
- Coverage error: Some individuals who should have been included in the survey frame were missed.
- Nonresponse error: Responses are not collected from all those in the sample or the respondent is unwilling to provide information.
- Imputation error: Values are estimated imprecisely for missing data.
- Processing error: Forms may be lost, data may be incorrectly keyed, coded, or recoded, etc.

To minimize these errors, the Census Bureau applies quality control procedures during all stages of the production process including the design of the survey, the wording of questions, the review of the work of interviewers and coders, and the statistical review of reports.

Two types of nonsampling error that can be examined to a limited extent are nonresponse and undercoverage.

Nonresponse. The effect of nonresponse cannot be measured directly, but one indication of its potential effect is the nonresponse rate. For the November 2019 basic CPS, the household-level unweighted nonresponse rate was 17 percent. The person-level unweighted nonresponse rate for the Computer and Internet Use supplement was an additional 26 percent.

Since the basic CPS nonresponse rate is a household-level rate and the Computer and Internet Use supplement nonresponse rate is a person-level rate, we cannot combine these rates to derive an overall nonresponse rate. Nonresponding households may have fewer persons than interviewed ones, so combining these rates may lead to an overestimate of the true overall nonresponse rate for persons for the Computer and Internet Use supplement.

In accordance with Census Bureau and Office of Management and Budget Quality Standards, the Census Bureau will conduct a nonresponse bias analysis to assess nonresponse bias in the Computer and Internet Use.

Responses are made up of complete interviews and sufficient partial interviews. A sufficient partial interview is an incomplete interview in which the household or person answered enough of the questionnaire for the supplement sponsor to consider the interview complete. The remaining supplement questions may have been edited or imputed to fill in missing values. Insufficient partial interviews are considered to be nonrespondents. Refer to the supplement overview attachment in the technical documentation for the specific questions deemed critical by the sponsor as necessary to answer in order to be considered a sufficient partial interview.

As a result of sufficient partial interviews being considered responses, individual items/questions have their own response and refusal rates. As part of the nonsampling error analysis, the item response rates, item refusal rates, and edits are reviewed. For the Computer and Internet Use supplement, the unweighted item refusal rates range from 0.0 percent to 9.4 percent. This survey is fully allocated, and the item allocation rates range from 2.1 percent to 55.0 percent.

Undercoverage. The concept of coverage with a survey sampling process is defined as the extent to which the total population that could be selected for sample “covers” the survey’s target population. Missed housing units and missed people within sample households create undercoverage in the CPS. Overall CPS undercoverage for November 2019 is estimated to be about 12 percent. CPS coverage varies with age, sex, and race. Generally, coverage is higher for females than for males and higher for non-Blacks than for Blacks. This differential coverage is a general problem for most household-based surveys.

The CPS weighting procedure mitigates bias from undercoverage, but biases may still be present when people who are missed by the survey differ from those interviewed in ways

other than age, race, sex, Hispanic origin, and state of residence. How this weighting procedure affects other variables in the survey is not precisely known. All of these considerations affect comparisons across different surveys or data sources.

A common measure of survey coverage is the coverage ratio, calculated as the estimated population before poststratification divided by the independent population control. Table 1 shows November 2019 CPS coverage ratios by age and sex for certain race and Hispanic groups. The CPS coverage ratios can exhibit some variability from month to month.

Table 1. Current Population Survey Coverage Ratios: November 2019

Age group	Total			White only		Black only		Residual race ^A		Hispanic ^B	
	All people	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
0-15	0.84	0.84	0.84	0.89	0.87	0.70	0.71	0.72	0.79	0.79	0.76

0+	0.88	0.88	0.89	0.91	0.92	0.73	0.77	0.78	0.81	0.78	0.82

Source: U.S. Census Bureau, Current Population Survey, November 2019.

^A The Residual race group includes cases indicating a single race other than White or Black, and cases indicating two or more races.

^B Hispanics may be any race.

Note: For a more detailed discussion on the use of parameters for race and ethnicity, please see the “Generalized Variance Parameters” section.

Comparability of Data. Data obtained from the CPS and other sources are not entirely comparable. This is due to differences in interviewer training and experience and in differing survey processes. These differences are examples of nonsampling variability not reflected in the standard errors. Therefore, caution should be used when comparing results from different sources.

Data users should be careful when comparing the data from this microdata file, which reflects 2010 Census-based controls, with microdata files which reflect 2000 Census-based controls. Ideally, the same population controls should be used when comparing any estimates. In reality, the use of the same population controls is not practical when comparing trend data over a period of 10 to 20 years. Thus, when it is necessary to combine or compare data based on different controls or different designs, data users should be aware that changes in weighting controls or weighting procedures can create small differences between estimates. See the discussion following for information on comparing estimates derived from different populations or different sample designs.

Microdata files from previous years reflect the latest available census-based controls. Although the most recent change in population controls had relatively little impact on summary measures such as averages, medians, and percentage distributions, it did have a significant impact on levels. For example, use of 2010 Census-based controls results in about a 0.2 percent increase from the 2000 Census-based controls in the civilian noninstitutionalized population and in the number of families and households. Thus, estimates of levels for data collected in 2012 and later years will differ from those for earlier years by more than what could be attributed to actual changes in the population. These differences could be disproportionately greater for certain population subgroups than for the total population.

Users should also exercise caution because of changes caused by the phase-in of the 2010 Census files (see “Basic CPS”).⁵ During this time period, CPS data were collected from sample designs based on different censuses. Two features of the new CPS design have the potential of affecting published estimates: (1) the temporary disruption of the rotation pattern from August 2014 through June 2015 for a comparatively small portion of the sample and (2) the change in sample areas. Most of the known effect on estimates during and after the sample redesign will be the result of changing from 2000 to 2010 geographic definitions. Research has shown that the national-level estimates of the metropolitan and nonmetropolitan populations should not change appreciably because of the new sample design. However, users should still exercise caution when comparing metropolitan and nonmetropolitan estimates across years with a design change, especially at the state level.

Caution should also be used when comparing Hispanic estimates over time. No independent population control totals for people of Hispanic origin were used before 1985.

A Nonsampling Error Warning. Since the full extent of the nonsampling error is unknown, one should be particularly careful when interpreting results based on small differences between estimates. The Census Bureau recommends that data users incorporate information about nonsampling errors into their analyses, as nonsampling error could impact the conclusions drawn from the results. Caution should also be used when interpreting results based on a relatively small number of cases. Summary measures (such as medians and percentage distributions) probably do not reveal useful information when computed on a subpopulation smaller than 75,000.

For additional information on nonsampling error, including the possible impact on CPS data, when known, refer to U.S. Census Bureau (2019) and Brooks & Bailar (1978).

Standard Errors and Their Use. A sample estimate and its standard error enable one to construct a confidence interval. A confidence interval is a range about a given estimate that has a specified probability of containing the average result of all possible samples. For example, if all possible samples were surveyed under essentially the same general conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then approximately 90 percent of the intervals from

⁵ The phase-in process using the 2010 Census files began April 2014.

1.645 standard errors below the estimate to 1.645 standard errors above the estimate would include the average result of all possible samples.

A particular confidence interval may or may not contain the average estimate derived from all possible samples, but one can say with the specified confidence that the interval includes the average estimate calculated from all possible samples.

Standard errors may also be used to perform hypothesis testing, a procedure for distinguishing between population parameters using sample estimates. The most common type of hypothesis is that the population parameters are different. An example of this would be comparing the percentage of men who were part-time workers to the percentage of women who were part-time workers.

Tests may be performed at various levels of significance. A significance level is the probability of concluding that the characteristics are different when, in fact, they are the same. For example, to conclude that two characteristics are different at the 0.10 level of significance, the absolute value of the estimated difference between characteristics must be greater than or equal to 1.645 times the standard error of the difference.

The Census Bureau uses 90-percent confidence intervals and 0.10 levels of significance to determine statistical validity. Consult standard statistical textbooks for alternative criteria.

Estimating Standard Errors. The Census Bureau uses replication methods to estimate the standard errors of CPS estimates. These methods primarily measure the magnitude of sampling error. However, they do measure some effects of nonsampling error as well. They do not measure systematic biases in the data associated with nonsampling error. Bias is the average over all possible samples of the differences between the sample estimates and the true value.

There are two ways to calculate standard errors for the CPS microdata file on Computer and Internet Use.

1. Direct estimates created from replicate weighting methods;
2. Generalized variance estimates created from generalized variance function (GVF) parameters a and b .

While replicate weighting methods provide the most accurate variance estimates, this approach requires more computing resources and more expertise on the part of the user. The GVF parameters provide a method of balancing accuracy with resource usage as well as a smoothing effect on standard error estimates. For more information on calculating direct estimates, see U.S. Census Bureau (2009). For more information on GVF estimates, refer to the “Generalized Variance Parameters” section.

Generalized Variance Parameters. While it is possible to estimate the standard error based on the survey data for each estimate in a report, there are a number of reasons why this is not done. A presentation of the individual standard errors would be of limited use,

since one could not possibly predict all of the combinations of results that may be of interest to data users. Additionally, data users have access to CPS microdata files, and it is impossible to compute in advance the standard error for every estimate one might obtain from those data sets. Moreover, variance estimates are based on sample data and have variances of their own. Therefore, some methods of stabilizing these estimates of variance, for example, by generalizing or averaging over time, may be used to improve their reliability.

Experience has shown that certain groups of estimates have similar relationships between their variances and expected values. Modeling or generalizing may provide more stable variance estimates by taking advantage of these similarities. The GVF is a simple model that expresses the variance as a function of the expected value of the survey estimate. The parameters of the GVF are estimated using direct replicate variances. These GVF parameters provide a relatively easy method to obtain approximate standard errors for numerous characteristics.

In this source and accuracy statement:

- Tables 3 through 7 provide illustrations for calculating standard errors;
- Table 8 provides the GVF parameters for labor force estimates;
- Table 9 provides GVF parameters for characteristics from the November 2019 supplement; and
- Tables 10 and 11 provide factors and population controls to derive U.S. state and regional parameters.

The basic CPS questionnaire records the race and ethnicity of each respondent. With respect to race, a respondent can be White, Black, Asian, American Indian and Alaskan Native (AIAN), Native Hawaiian and Other Pacific Islander (NHOPI), or combinations of two or more of the preceding. A respondent's ethnicity can be Hispanic or non-Hispanic, regardless of race.

The GVF parameters to use in computing standard errors are dependent upon the race/ethnicity group of interest. Table 2 summarizes the relationship between the race/ethnicity group of interest and the GVF parameters to use in standard error calculations.

Table 2. Estimation Groups of Interest and Generalized Variance Parameters

Race/ethnicity group of interest	Generalized variance parameters to use in standard error calculations
Total population	Total or White
White alone, White alone or in combination (AOIC), or White non-Hispanic population	Total or White
Black alone, Black AOIC, or Black non-Hispanic population	Black
Asian alone, Asian AOIC, or Asian non-Hispanic population	Asian, American Indian and Alaska Native (AIAN), Native Hawaiian and Other Pacific Islander (NHOPI)
AIAN alone, AIAN AOIC, or AIAN non-Hispanic population	Asian, AIAN, NHOPI
NHOPI alone, NHOPI AOIC, or NHOPI non-Hispanic population	Asian, AIAN, NHOPI
Populations from other race groups	Asian, AIAN, NHOPI
Hispanic ^A population	Hispanic ^A
Two or more races ^B – employment/unemployment and educational attainment characteristics	Black
Two or more races ^B – all other characteristics	Asian, AIAN, NHOPI

Source: U.S. Census Bureau, Current Population Survey, internal data files.

^A Hispanics may be any race.

^B Two or more races refers to the group of cases self-classified as having two or more races.

When calculating standard errors for an estimate of interest from cross-tabulations involving different characteristics, use the set of GVF parameters for the characteristic that will give the largest standard error. If the estimate of interest is strictly from basic CPS data, the GVF parameters will come from the CPS GVF table (Table 8). If the estimate is using Computer and Internet Use supplement data, the GVF parameters will come from the Computer and Internet Use supplement GVF table (Table 9).

Standard Errors of Estimated Numbers. The approximate standard error, s_x , of an estimated number from this microdata file can be obtained by using the formula:

$$s_x = \sqrt{ax^2 + bx} \quad (1)$$

Here x is the size of the estimate, and a and b are the parameters in Table 8 or 9 associated with the particular type of characteristic.

Illustration 1

Suppose there were 2,890,000 unemployed men (ages 16 and up) in the civilian labor force. Table 3 shows how to use the appropriate parameters from Table 8 and Formula (1) to estimate the standard error and confidence interval.

Table 3. Illustration of Standard Errors of Estimated Numbers

Number of unemployed males in the civilian labor force (x)	2,890,000
a-parameter (a)	-0.000031
b-parameter (b)	2,947
Standard error	91,000
90-percent confidence interval	2,740,000 to 3,040,000

Source: U.S. Census Bureau, Current Population Survey, Computer and Internet Use, November 2019.

The standard error is calculated as

$$s_x = \sqrt{-0.000031 \times 2,890,000^2 + 2,947 \times 2,890,000},$$

which, rounded to the nearest thousand, is 91,000. The 90-percent confidence interval is calculated as $2,890,000 \pm 1.645 \times 91,000$.

A conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all possible samples.

Standard Errors of Estimated Percentages. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends on both the size of the percentage and its base. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. When the numerator and denominator of the percentage are in different categories, use the parameter from Table 8 or 9 as indicated by the numerator.

The approximate standard error, $s_{y,p}$, of an estimated percentage can be obtained by using the formula:

$$s_{y,p} = \sqrt{\frac{b}{y} p(100 - p)} \quad (2)$$

Here y is the total number of people, families, households, or unrelated individuals in the base or denominator of the percentage, p is the percentage $100 \cdot x/y$ ($0 \leq p \leq 100$), and b is the parameter in Table 8 or 9 associated with the characteristic in the numerator of the percentage.

Illustration 2

Suppose there were 130,286,000 households in the U.S., and 79.9 percent had an internet connection in their home. Table 4 shows how to use the appropriate parameters from Table 9 and Formula (2) to estimate the standard error and confidence interval.

Table 4. Illustration of Standard Errors of Estimated Percentages

Percentage of households with an internet connection (p)	79.9
Base (y)	130,286,000
b-parameter (b)	2,208
Standard error	0.16
90-percent confidence interval	79.6 to 80.2

Source: U.S. Census Bureau, Current Population Survey, Computer and Internet Use, November 2019.

The standard error is calculated as

$$s_{y,p} = \sqrt{\frac{2,208}{130,286,000} \times 79.9 \times (100.0 - 79.9)} = 0.16$$

and the 90-percent confidence interval for the estimated percentage of households with an internet connection in the home is from 79.6 to 80.2 percent (i.e., $79.9 \pm 1.645 \times 0.16$).

Standard Errors of Estimated Differences. The standard error of the difference between two sample estimates is approximately equal to

$$s_{x_1-x_2} = \sqrt{(s_{x_1})^2 + (s_{x_2})^2} \quad (3)$$

where s_{x_1} and s_{x_2} are the standard errors of the estimates, x_1 and x_2 . The estimates can be numbers, percentages, ratios, etc. This will result in accurate estimates of the standard error of the same characteristic in two different areas or for the difference between separate and uncorrelated characteristics in the same area. However, if there is a high positive (negative) correlation between the two characteristics, the formula will overestimate (underestimate) the true standard error.

Illustration 3

Suppose that of the 24,801,000 rural households in the U.S., 77.5 percent have an internet connection at home, and of the 102,987,000 urban households in the U.S., 80.3 percent have an internet connection at home. Table 5 shows how to use the appropriate parameters from Table 9 and Formulas (2) and (3) to estimate the standard error and confidence interval.

Table 5. Illustration of Standard Errors of Estimated Differences

	Rural (x_1)	Urban (x_2)	Difference
Percentage of households with internet connection (p)	77.5	80.3	2.8
Base (y)	24,801,000	102,987,000	-
b-parameter (b)	3,312	2,208	-
Standard error	0.48	0.18	0.51
90-percent confidence interval	76.7 to 78.3	80.0 to 80.6	2.0 to 3.6

Source: U.S. Census Bureau, Current Population Survey, Computer and Internet Use, November 2019.

Note: For the rural households, the b-parameter (3,312) is obtained by multiplying the original b-parameter (2,208) by 1.5 as indicated in the note below Table 9.

The standard error of the difference is calculated as

$$s_{x_1-x_2} = \sqrt{0.48^2 + 0.18^2} = 0.51$$

and the 90-percent confidence interval around the difference is calculated as $2.8 \pm 1.645 \times 0.51$. Since this interval does not include zero, we can conclude with 90-percent confidence that the percentage of rural households with an internet connection is less than the percentage of urban households with an internet connection.

Accuracy of State Estimates The redesign of the CPS following the 1980 census provided an opportunity to increase efficiency and accuracy of state data. All strata are now defined within state boundaries. The sample is allocated among the states to produce state and national estimates with the required accuracy while keeping total sample size to a minimum. Improved accuracy of state data was achieved with about the same sample size as in the 1970 design.

Since the CPS is designed to produce both state and national estimates, the proportion of the total population sampled and the sampling rates differ among the states. In general, the smaller the population of the state, the larger the sampling proportion. For example, in Vermont, approximately 1 in every 250 households is selected each month. In New York, the sample is about 1 in every 2,000 households. Nevertheless, the size of the sample in New York is four times larger than in Vermont because New York has a larger population.

Standard Errors of State Estimates. The standard error for a state may be obtained by determining new state-level a- and b-parameters and then using these adjusted parameters in the standard error formulas mentioned previously. To determine a new state-level b-parameter (b_{state}), multiply the b-parameter from Table 8 or 9 by the state factor from Table 10. To determine a new state-level a-parameter (a_{state}), use the following:

- (1) If the a-parameter from Table 8 or 9 is positive, multiply it by the state factor from Table 10.
- (2) If the a-parameter in Table 8 or 9 is negative, calculate the new state-level a-parameter as follows:

$$a_{state} = \frac{-b_{state}}{POP_{state}} \quad (4)$$

where POP_{state} is the state population found in Table 10.

Illustration 4

Suppose there were 11,378,000 of 14,235,000 households in California, or 79.9 percent, with an internet connection in the home. Following the method mentioned above, obtain

the needed state parameter by multiplying the parameter in Table 9 by the state factor in Table 10 for the state of interest.

Table 6 shows how to use formula (2) with the b_{state} -parameter, 2,561, to estimate the standard error and confidence interval.

Table 6. Illustration of Standard Errors of State Estimates

Percentage of households in California with an internet connection (p)	79.9
Base (x)	14,235,000
State factor	1.16
State b-parameter (b_{state})	$2,208 \times 1.16 = 2,561$
Standard error	0.54
90-percent confidence interval	79.0 to 80.8

Source: U.S. Census Bureau, Current Population Survey, Computer and Internet Use, November 2019.

Standard Errors of Regional Estimates. To compute standard errors for regional estimates, follow the steps for computing standard errors for state estimates found in “Standard Errors for State Estimates” using the regional factors and populations found in Table 11.

Illustration 5

Suppose there were 8,475,000 households in the South where no one used the internet. Use Formulas (1) and (4) and the appropriate parameter, factor, and population from Tables 9 and 11 to get

Table 7. Illustration of Standard Errors of Regional Estimates

Number of households in the South with no internet use (x)	8,475,000
b-parameter (b)	2,208
South regional factor	1.11
Regional population	124,058,761
Regional a-parameter (a_{region})	-0.000020
Regional b-parameter (b_{region})	2,451
Standard error	139,000
90-percent confidence interval	8,246,000 to 8,704,000

Source: U.S. Census Bureau, Current Population Survey, Computer and Internet Use, November 2019.

Obtain the region-level b-parameter by multiplying the b-parameter, 2,208, by the regional factor, 1.11. This gives $b_{region} = 2,208 \times 1.11 = 2,451$. Obtain the needed region-level a-parameter by

$$a_{region} = \frac{-2,451}{124,058,761} = -0.000020$$

The standard error of the estimate of the number of households in the South with no one using the internet can be found by using Formula (1) and the new region-level a- and b-parameters, -0.000020 and 2,451, respectively. The standard error is given by

$$s_x = \sqrt{-0.000020 \times 8,475,000^2 + 2,451 \times 8,475,000} = 139,000$$

and the 90-percent confidence interval of the number of households in the South without internet use is calculated as $8,475,000 \pm 1.645 \times 139,000$.

Standard Errors of Groups of States. The standard error calculation for a group of states is similar to the standard error calculation for a single state. First, calculate a new state group factor for the group of states. Then, determine new state group a- and b-parameters. Finally, use these adjusted parameters in the standard error formulas mentioned previously.

Use the following formula to determine a new state group factor:

$$state\ group\ factor = \frac{\sum_{i=1}^n POP_i \times state\ factor_i}{\sum_{i=1}^n POP_i} \quad (5)$$

where POP_i and $state\ factor_i$ are the population and factor for state i from Table 10. To obtain a new state group b-parameter ($b_{state\ group}$), multiply the b-parameter from Table 8 or 9 by the state factor obtained by Formula (5). To determine a new state group a-parameter ($a_{state\ group}$), use the following:

(1) If the a-parameter in Table 8 or 9 is positive, multiply it by the state group factor determined by Formula (5).

(2) If the a-parameter in Table 8 or 9 is negative, calculate the new state group a parameter as follows:

$$a_{state\ group} = \frac{-b_{state\ group}}{\sum_{i=1}^n POP_i} \quad (6)$$

Illustration 6

Suppose the state group factor for the state group Illinois-Indiana-Michigan was required. The appropriate factor would be

$$state\ group\ factor = \frac{12,497,291 \times 1.16 + 6,635,543 \times 1.14 + 9,920,473 \times 1.15}{12,497,291 + 6,635,543 + 9,920,473} = 1.15$$

Standard Errors of Quarterly or Yearly Averages. For information on calculating standard errors for labor force data from the CPS which involve quarterly or yearly averages, please see Bureau of Labor Statistics (2006).

Technical Assistance. If you require assistance or additional information, please contact the Demographic Statistical Methods Division via e-mail at dsmd.source.and.accuracy@census.gov.

Table 8. Parameters for Computation of Standard Errors for Labor Force Characteristics: November 2019

Characteristic	<i>a</i>	<i>b</i>
Total or White		
<i>Civilian labor force, employed</i>	-0.000013	2,481
<i>Unemployed</i>	-0.000017	3,244
<i>Not in labor force</i>	-0.000013	2,432
<i>Civilian labor force, employed, not in labor force, and unemployed</i>		
Men	-0.000031	2,947
Women	-0.000028	2,788
Both sexes, 16 to 19 years	-0.000261	3,244
Black		
<i>Civilian labor force, employed, not in labor force, and unemployed</i>		
Total	-0.000117	3,601
Men	-0.000249	3,465
Women	-0.000191	3,191
Both sexes, 16 to 19 years	-0.001425	3,601
Asian, American Indian and Alaska Native (AIAN), Native Hawaiian and Other Pacific Islander (NHOPI)		
<i>Civilian labor force, employed, not in labor force, and unemployed</i>		
Total	-0.000245	3,311
Men	-0.000537	3,397
Women	-0.000399	2,874

Hispanic, may be of any race		
<i>Civilian labor force, employed, not in labor force, and unemployed</i>		
Total	-0.000087	3,316
Men	-0.000172	3,276
Women	-0.000158	3,001
Both sexes, 16 to 19 years	-0.000909	3,316

Source: U.S. Census Bureau, Internal Current Population Survey data files for the 2010 Design.

Notes: These parameters are to be applied to basic CPS monthly labor force estimates. The Total or White, Black, and Asian, AIAN, NHOPI parameters are to be used for both alone and in combination race group estimates. For nonmetropolitan characteristics, multiply the a- and b-parameters by 1.5. If the characteristic of interest is total state population, not subtotaed by race or ethnicity, the a- and b-parameters are zero. For foreign-born and noncitizen characteristics for Total and White, the a- and b-parameters should be multiplied by 1.3. No adjustment is necessary for foreign-born and noncitizen characteristics for Black, Hispanic, and Asian, AIAN, NHOPI parameters. For the groups self-classified as having two or more races, use the Asian, AIAN, NHOPI parameters for all employment characteristics.

Table 9. Parameters for Computation of Standard Errors for Computer and Internet Use Characteristics: November 2019

Characteristics	Total or White		Black		Asian, AIAN, NHOPI		Hispanic	
	<i>a</i>	<i>b</i>	<i>a</i>	<i>b</i>	<i>a</i>	<i>b</i>	<i>a</i>	<i>b</i>

Income	-0.000009	2,393	-0.000043	2,613	-0.000165	2,613	-0.000052	4,403
Marital status, household, and family								
Educational attainment, population by age/sex	-0.000008	2,208	-0.000033	1,998	-0.000127	1,998	-0.000040	3,367
Poverty	0.000109	2,608	0.000109	2,608	0.000109	2,608	0.000184	4,395

Source: U.S. Census Bureau, Current Population Survey, Computer and Internet Use, November 2019.

Notes: These parameters are to be applied to the November 2019 Computer and Internet Use Supplement data. AIAN is American Indian and Alaska Native and NHOPI is Native Hawaiian and Other Pacific Islander. Hispanics may be any race. For a more detailed discussion on the use of parameters for race and ethnicity, please see the "Generalized Variance Parameters" section. The Total or White, Black, and Asian, AIAN, NHOPI parameters are to be used for both alone and in combination race group estimates. For nonmetropolitan characteristics, multiply the a- and b-parameters by 1.5. If the characteristic of interest is total state population, not subtotaled by race or ethnicity, the a- and b-parameters are zero. For foreign-born and noncitizen characteristics for Total and White, the a- and b-parameters should be multiplied by 1.3. No adjustment is necessary for foreign-born and noncitizen characteristics for Black, Asian, AIAN, NHOPI, and Hispanic parameters. For the group self-classified as having two or more races, use the Asian, AIAN, NHOPI parameters for all characteristics except employment, unemployment, and educational attainment, in which case use Black parameters.

**Table 10. Factors and Populations for State Standard Errors and Parameters:
November 2019**

State	Factor	Population	State	Factor	Population
Alabama	1.13	4,827,166	Montana	0.22	1,059,333
Alaska	0.18	708,973	Nebraska	0.51	1,915,793
Arizona	1.16	7,226,277	Nevada	0.72	3,081,922
Arkansas	0.73	2,974,618	New Hampshire	0.35	1,348,715
California	1.16	39,251,506	New Jersey	1.15	8,831,849
Colorado	1.17	5,709,959	New Mexico	0.44	2,062,110
Connecticut	0.88	3,520,541	New York	1.19	19,239,718
Delaware	0.23	966,002	North Carolina	1.18	10,332,445
District of Columbia	0.18	700,577	North Dakota	0.18	750,268
Florida	1.12	21,406,212	Ohio	1.15	11,554,492
Georgia	1.16	10,454,547	Oklahoma	1.07	3,876,510
Hawaii	0.33	1,360,763	Oregon	1.06	4,211,252
Idaho	0.40	1,781,803	Pennsylvania	1.16	12,622,756
Illinois	1.16	12,497,291	Rhode Island	0.28	1,042,480
Indiana	1.14	6,635,543	South Carolina	1.12	5,072,882
Iowa	0.78	3,129,819	South Dakota	0.23	876,279
Kansas	0.81	2,850,209	Tennessee	1.14	6,747,094
Kentucky	1.16	4,404,947	Texas	1.17	28,733,811
Louisiana	1.06	4,543,259	Utah	0.51	3,212,904
Maine	0.42	1,328,128	Vermont	0.20	621,969

Notes: The state population counts in this table are for the 0+ population. For foreign-born and noncitizen characteristics for Total and White, the a- and b-parameters should be multiplied by 1.3. No adjustment is necessary for foreign-born and noncitizen characteristics for Black, Asian, AIAN, NHOPI, and Hispanic parameters.

**Table 11. Factors and Populations for Regional Standard Errors and Parameters:
November 2019**

Region	Factor	Population
Northeast	1.08	55,434,463
Midwest	1.09	67,554,736
South	1.11	124,058,761
West	1.03	77,807,929
