Hi Team
This is a great initiative and I like to provide few short comments below;

1- SBOM must always be a living document, maintained by Vendors throughout the service length of the customer contract. There must not be a 3rd party taking SBOM document ownership.

2- Security must always be a joint responsibility between customers and software vendor, however the responsibilities are to be detailed out for both customer and vendor must be detailed out by vendor.

Thanks
Salman Bakhtiari
